"The Fables of Pilpay" is the alternative title of "Kalilah and Dimnah," the Arabic translation of the Pahlavi translation of the Sanskrit original of the Panchatantra. Pindar (pin'där). [L. *Pindarus*, Gr. Πίνδαρος.] Born at Cynoscephalæ, near Thebes, Greece, about 522 B. C.: died at Argos, 443 B. C. The greatest of the Greek lyric poets. He resided chiefly at Thebes, but spent about four years at the court of Hieron in Syracuse. Little is known of his life. See the extract.

The remains of Pindar's work represent almost every kind of lyric poem. The fragments may be classified as follows: 1. *Hymns* to Persephone, to Fortune, and in praise of Thebes and its gods. 2. *Pæans* to Apollo of Delphi and Zeus of Dodona. 3. *Choral dithyrambs* to Dionysus. 4. *Processional songs*, for the people of Delos and of Ægina. 5. *Choral songs for maidens:* one addressed to "Pan, lord of Arcadia, watcher of the awful shrine" (of Cybele). 6. *Choral dance-songs* — "hyporchemes," as the Greeks called them — in which the words were accompanied by a lively dance or pantomime expressive of the action; they arose from the early Cretan war-dances, and were used especially in the worship of Apollo, as a relief to the solemn pæan. One of these was written for the Thebans, and was connected with a propitiatory rite following an eclipse of the sun, probably in 463 B. C. 7. *Encomia:* laudatory odes (in praise of men, and thus distinguished from *hymns* in praise of gods) sung by the festive troop or *comus*. 8. *Scolia:* festive songs to be sung at banquets by a *comus* or festive troop. 9. *Dirges*, to be sung to the flute, with choral dance. Besides the fragments, we have forty-four complete *Epinicia*, or Odes of Victory, in which Pindar celebrated victories in great national games. Fourteen odes belong to the games at Olympia, held once in four years: the prize was a wreath of wild olive. Twelve odes belong to the Pythian games, held at Delphi, in honour of Apollo, once in four years, in the 3rd year of each Olympiad: the prize was a wreath of laurel. Seven odes belong to the Nemean games, held at Nemea, in honour of Zeus, once in two years, the 2nd and 4th of each Olympiad: the prize was a wreath of pine. Eleven odes belong to the Isthmian games, held at the Isthmus of Corinth, in honour of Poseidon, once in two years, in the 1st and 3rd years of each Olympiad: the prize was a wreath of parsley. Among all these odes of which the dates can be fixed, the earliest is the 10th Pythian, in 502 B. C.; the latest, the 5th Olympian, in 452 B. C.

Another story is that he found in Rom old manuscript which he gave to Columbus, and in w it was stated that Asia might be reached by sailing w ward. It is more probable that he joined Columbu his voyage of 1492 because he was part owner of the sm vessels. He commanded the Pinta. In Nov., 1492 parted company with Columbus on the coast of Cuba; the first to discover Haiti; and rejoined the admira the coast of that island, Jan. 6, 1493. Piruas (pē-rō'äs). The traditional name of the rulers of a very ancient people, the Hatun Runas, who occupied the highlands of Peru and Bo- livia previous to the rise of the Inca dynasty. That such a people existed is evident from the remains of Cyclopean architecture of a type different from and older than the Inca edifices (see *Tiahuanucu* and *Sacsahuana*), and all the traditions collected by authors soon after the conquest agree in pointing to a powerful kingdom or con- federation which was broken up before the Incas came into power at Cuzco. The first Piruas are said to have come from the south, and they have been connected with the Aymaras of Bolivia; but at that time the Aymaras and Quichuas may have formed one race. Montesinos gives a list of 65 chiefs or "kings" of the Pirua line, and this list, long discredited, has received incidental support from the mention of some of the names in recently discovered manuscripts. As the Pirua line ceased before the 10th century, the list, if correct, carries it back to a time earlier than the Christian era.

The Piruas governed a vast empire, erected imperishable Cyclopean edifices, and developed a complicated civiliza- tion, which is dimly indicated to us by the numerous sym- bolical sculptures on the monolith (at Tiahuanucu). They also, in a long course of years, brought wild plants under cultivation, and domesticated the animals of the lofty Andean plateau. But it is remarkable that the shores of Lake Titicaca, which are almost treeless, and where corn will not ripen, should have been chosen as the center of this most ancient civilization. Yet the ruins of Tiahua- nucu conclusively establish the fact that the capital of the Piruas was on the loftiest site ever selected for the seat of a great empire.

Pisa (pē'zä or pē'sä). A province of Tuscany, Italy. Area, 1,179 square miles. Population (1891), 302,349.

Pisa, F. **Pise** (pēz). The capital of the province of Pisa, Italy, situated on the Arno, 6 miles from the sea, in lat. 43° 43′ N., long. 10° 23′ E.: the ancient Pisæ and Colonia Julia Pisana. It is now a winter health-resort. The cathedral, with the campanile, the baptistery, and the Campo Santo (which see), forming a world-famous group of four buildings, was begun in 1067, and consecrated in 1118. In plan it is a Latin cross, 311 feet long, 106½ across nave and four aisles and 237 across the transepts, and 91 feet high to the wooden ceiling of the nave. The interior is arcaded, with fine monolithic shafts, arcaded triforium-gallery, clearstory, and a great elliptical dome at the crossing. The semi-dome of the apse is filled with mosaics on gold ground, in part by Cimabue. The façade, in alternated courses of dark and light marble, has five superposed tiers of arcades, with small columns, and a similar arcade is carried around the church under the roof. The bronze doors of the façade are fine Renaissance productions by Giovanni da Bologna; that of the south transept is Romanesque, with curious reliefs in square panels. The sculptured marble pulpit, of the type of that in the baptistery, was the masterpiece of Giovanni Pisano: it was shattered in the fire of 1596, but has lately been re- stored. There are many fine paintings, particularly a beau- tiful St. Agnes by Andrea del Sarto, and admirable choir- stalls and church furniture. The baptistery, one of the most beautiful of Italian buildings, is circular and domed, with two tiers of superposed Pisan arcades, and above these, below the dome, coupled cusped windows with deco- rated pointed canopies. The lowest story, with round wall-arcades inclosing windows, is of the 12th century; the parts above are later. The little arcades of the second tier are joined two and two by beautiful traceried and crocketed pediments, separated by slender pinnacles. The middle of the building is occupied by the octagonal font, 14 feet in diameter, with most delicate geometrical carving and mosaics on its panels. Its chief boast, however, is the famous pulpit (1260) of Niccola Pisano. This is hexag- onal, raised on seven columns, three of the outer ones with bases, three resting on lions, and the central one sup- ported by a fantastic group of men and animals. One side is taken by the stair; the five others bear remarkable reliefs from the life of Christ, strongly influenced by the antique. At one angle is an eagle, forming a lectern. The diameter of the baptistery is 117 feet, its total height 180. The campanile, or Leaning Tower, is cylindrical, in eight stages, that at the base solid with a wall-arcade, the six above lower, and surrounded within their small columned ar- cades with galleries. The highest stage appears recessed, since it has no exterior arcade; its wall-arcade is inter- rupted by six large arches to allow the sound of the bells to escape. The campanile, begun in 1174, with its super- posed tiers of small arches is the exemplar of the peculiar Pisan type of medieval architecture. It is 181 feet high, 51½ in diameter at the base, and inclines 13 feet 8 inches toward the south. About half of the sinking took place during the construction, and the efforts made to correct it by diminishing the height of the stages on the north side resulted in a convexity of 10 inches on the south. The spire originally designed was not built, on account of the continued sinking of the foundation. San Paolo a Ripa d'Arno was the original cathedral, founded by Charle- magne, but altered in the 12th century. The façade is built of gray, yellow, and black marble; it has five blind arches below, three of them inclosing doors, and three tiers of columned galleries above. The interior has granite columns with quaintly carved white marble capitals. In the cloister there is a highly picturesque and curious hepta- gonal structure with a pointed roof, apparently the bap- tistery of the old cathedral. The university, organized in 1343, had 76 professors and 1,030 students in 1896–97: the building, locally called La Sapienza, was begun in 1493, and enlarged by Cosmo de' Medici. Pisa was probably of Etruscan origin. It became a Roman colony and was flourishing under the empire. After his return from Venice he made the bronze door of the baptistery in Florence, which is his chief and enduring title to fame (finished 1330). He also executed the bas-reliefs designed by Giotto for the lower story of the campanile, and some figures on Arnolfo's façade of the duomo. He strengthened the Palazzo Vecchio with great walls and fortifications to render it a safe residence for Walter de Brienne, titular duke of Athens, whom the Florentines had made governor of the city.

At this time he transformed the Oratory of Santa Maria del Porto into the present Church of Santa Maria della Spina, the first edifice built in Italy in the Pointed style, and built the first and most beautiful Campo Santo in Italy: in the Campo Santo are still many works of Giovanni. About 1248 he built the Santa Trinità at Florence, the San Domenico at Arezzo, the duomo at Volterra, and the Pieve and Santa Marguerita at Cortona. In 1260 he produced the famous pulpit in the baptistery at Pisa. In 1265 he began the Arca di San Domenico at Bologna, in which he was assisted by Fra Guglielmo Agnelli. In 1266 he began the pulpit of the cathedral at Siena, assisted by his son Giovanni and his pupils Arnolfo del Cambio, Donato, and Lapo. It is similar to the one in Pisa, but larger, and octagonal instead of hexagonal. In 1269 Charles of Anjou commissioned him to erect the abbey and convent of La Scorgola to commemorate the victory of Tagliacozzo, which occurred in the neighboring valley. In 1274 was begun the fountain in Perugia finished by his son Giovanni. The 24 statuettes of this fountain which are ascribed to Niccola Pisano are simply designed and broadly treated.

Peisistratus, in the last period of his rule (537–527 B. C.), is said to have commissioned some learned men, of whom the poet Onomacritus was the chief, to collect the poems of Homer. It is now generally believed that an Iliad and an Odyssey already existed in writing at that time, but that the text had become much deranged, especially through the practice of reciting short passages without regard to their context. Besides these two poems, many other epic poems or fragments of the Ionian school went under Homer's name. The great task of the commission was to collect *all* these "poems of Homer" into one body. From this general stock they may have supplied what they thought wanting in the Iliad and Odyssey. Their work cannot, in any case, have been critical in a modern sense. But it can hardly be doubted that some systematic attempt to preserve "the poems of Homer" was made in the reign of Peisistratus. *Jebb*, Greek Lit., p. 32.

Pizarro (pi-zä'rō; Sp. pron. pē-thär'rō), **Francisco.** Born at Trujillo, Estremadura, about 1471: died at Lima, June 26, 1541. A Spanish soldier, conqueror of Peru. He was the illegitimate son of a Spanish officer under whom he served in Italy. It is not known when he went to America, and he first appears at Darien, where, for a short time, he was left in charge of the colony (1510). He was with Balboa in the discovery of the Pacific (1513); and in 1519 settled at Panama. Here, in 1522, he joined with Diego de Almagro and a priest named Hernando de Luque in a scheme for conquest toward the south, whence rumors had come of a rich empire. They purchased two small vessels, and Pizarro left Panama Nov. 14, 1524, with one ship and about 100 men, following the coast to about lat. 7° N. After enduring great suffering, he was obliged to return. Almagro, who had sailed later and passed him, met with no better success. Aided by Gaspar de Espinosa they sailed again in larger vessels (about Sept., 1526), penetrated to the equator, and saw large cities and evidences of wealth. Almagro now returned for reinforcements, leaving Pizarro and a part of the men on the little island of Gallo (lat. 1° 52′ N.), where they suffered greatly. The new governor of Panama, Los Rios, refused to authorize further exploration, and sent two ships to take Pizarro off; but he, with 16 of his men, chose to remain rather than give up the scheme, and was left on the island. Another vessel arrived about Dec., 1527, with positive orders to take them off; but, instead of obeying, they used the vessel for further exploration. This time they reached Tumbez and other Inca towns, were well received, saw evidences of great wealth, and at length returned to Panama with the assurance that they had discovered the long-sought southern empire. Pizarro now hastened to Spain, where (July 26, 1529) he received a concession to conquer and govern Peru. Returning to Panama, Pizarro sailed for the south in Jan., 1531, with 3 vessels and 185 men; landed at the island of Puná in the Gulf of Guayaquil, where he was joined by Hernando de Soto with reinforcements; and thence crossed to Tumbez and pushed inland. On Nov. 15, 1532, he reached Cajamarca, where the Inca Atahualpa was encamped with a large army. On the next day the Inca was treacherously seized, and his attendants were massacred. He was promised his liberty if he would fill a room with gold, and he actually did collect through his officers 326,539 pesos of gold and 51,610 marks of silver, equal to 4,605,670 ducats, estimated at $15,000,000 of modern money. In the end the captive was slain on a false charge of conspiring against the Spaniards, Aug. 29, 1533. (See *Atahualpa.*) Almagro arrived soon after, but too late to share in the distribution of the booty. Hitherto there had been no armed resistance, but in the march to Cuzco which followed, the Spaniards were repeatedly attacked. On Nov. 15, 1533, Pizarro entered Cuzco. Manco Inca, the legitimate heir to the throne, tendered his submission, and Pizarro made a puppet monarch of him: he himself was the real ruler, and Cuzco was pillaged and turned into a Spanish city. In Jan., 1535, he founded Lima as his capital; soon after he received from Spain the title of marquis, and his territory was defined as extending from the river Santiago (lat. 1° 2′ S.) southward for 270 leagues. Almagro, at the same time, was granted the region adjoining this on the south, and he set out with an army to conquer Chile. Meanwhile Benalcazar, with a part of Pizarro's force, had conquered Quito, and Pizarro took possession of it. In April, 1536, the Indians rose in revolt under Manco, and for a time threatened to drive the Spaniards out, but were finally conquered. Almagro, returning from Chile, claimed Cuzco as lying within his territory; war followed between him and Pizarro; and Almagro was defeated at Las Salinas (April 26, 1538), and soon after was executed. His followers were generally allowed to go free; but they plotted against Pizarro, and at length a party of them attacked him in his palace and slew him with several attendants.

In 1541–42 he led an unsuccessful expedition eastward of Quito to the Napo, and was deserted there by Orellana, who made the first descent of the Amazon. In 1544 he consented, after some hesitation, to lead the opposition to Vasco Nuñez Vela and the "New Laws"; war ensued; and Vela was defeated and killed at the battle of Anaquito, Jan. 18, 1546. Pizarro was recognized by the colonists as ruler, and his officers seized the Isthmus of Panama. The Spanish government now sent Pedro de la Gasca, with extraordinary powers, to take possession of the government. By politic means he obtained possession of the isthmus. Pizarro refused to treat with him, and Gasca landed at Tumbez June 13, 1547. Alarmed by numerous desertions, Pizarro attempted to retreat southward. At Huarina, near Lake Titicaca, he and his lieutenant, Carbajal, met and defeated the royalist force of Centeno. Pizarro now returned to Cuzco, and met the army of Gasca in the valley of Sacsahuana, April 9, 1548; but his disheartened soldiers deserted or fled, and there was no battle. Pizarro gave himself up, and was executed soon after.

He went back to Peru; commanded in the defense of Cuzco against Manco Inca in 1536; and was seized by Almagro, April 18, 1537, but was released on his promise to leave the country. Instead of doing so, he took command of his brother's army; defeated Almagro at Las Salinas, April 26, 1538; and put him to death. For this conduct he was afterward kept in mild confinement in Spain for 20 years (1540–60). They had many lowers.

French, after all, despite a strong Teutonic admixture, s a Latin tongue, and recurrence to Latin, and to the ll more majestic and fertile language which had had much to do in shaping the literary Latin dialect, was tural and germane to its character. In point of fact, e Pléiade made modern French—made it, we may say, rice over; for not only did its original work revolutionise e language in a manner so durable that the reaction of e next century could not wholly undo it, but it was ainly study of the Pléiade that armed the great masters the Romantic movement, the men of 1830, in their revolt ainst the cramping rules and impoverished vocabulary of e eighteenth century. The effect of the change indeed as far too universal for it to be possible for any Malherbe any Boileau to overthrow it. The whole literature of ance, at a time when it was wonderfully abundant and glorous, "Ronsardised" for nearly fifty years, and such metice at such a time never fails to leave its mark.

Pliny (plin'i), "The Elder" (**Caius Plinius Secundus**). Born at Como (Roman Novum Comum), Italy, 23 A. D.: perished in the eruption of Vesuvius, 79 A. D. A celebrated Roman naturalist. He went to Rome in early youth; served in Africa, and, at the age of 23, as commander of a troop of cavalry in Germany; returned to Rome and studied law; was procurator in Spain under Nero (about 70–72); and was charged with other official duties in various parts of the empire. His literary work, which was conducted with extraordinary industry in the intervals of his official labors (scarcely a waking moment of day or night being left unoccupied), extended into the departments of tactics, history, grammar, rhetoric, and natural science. Of his writings, only his "Natural History" is extant. (See the extract.) His death, an account of which is preserved in a letter of Pliny the Younger, was the result of his efforts to observe more closely the eruption of Vesuvius and to aid those who were in danger.

We possess of the works of Pliny [the Elder] only his "Naturalis historia" in 37 books, a work presented a. 77 to Titus, but constantly enriched and enlarged by the author until his death. It is a kind of encyclopedia of natural science, but chiefly concerned with its application in human life and art; and accordingly it includes geography, medicine, and the history of art. The materials are compiled from a great number of works, often hastily and without adequate knowledge or discrimination, hence very unequal in value. The style also is uneven, sometimes merely bent upon the subject-matter and discarding artistic form, sometimes mannered and rhetorical. On the whole, the work is an inexhaustible storehouse of information, and testifies to the earnest, studious, and patriotic spirit of the author. It long exercised great influence both in its original shape and in various abridgments.

Plotinus (plō-tī'nus). [Gr. Πλωτῖνος.] Born at Lycopolis, Egypt, about 204 A. D.: died in Italy about 270. A celebrated Neoplatonic philosopher. He studied in Alexandria under Ammonius Saccas, and afterward taught philosophy in Rome. His works (called "Enneads") were edited by Creuzer in 1835.

The relation in which Plotinus stood to his predecessors among the Greek philosophers is very easily stated. He had made himself acquainted with every system, and culled from them all whatever seemed to support his solution of the great problems of thought and existence. Plato is the chief authority and the starting-point in his speculations. But he takes full cognizance of Aristotle, whose system of categories he directly opposes; and he endeavours in all essential points to identify the doctrines of the Old Academy and the Lyceum. To effect this, he is obliged to have recourse to an overstrained latitude of interpretation, sometimes making his own inferences from opinions half expressed, and not unfrequently quoting from memory. Although he is strongly at variance with the Stoics on the grounds of knowledge, treating with great contempt their doctrine of intellectual conception, he borrows a good deal from Chrysippus wherever he can find an agreement even in expression. The older writers also furnished him with suggestive materials. He was acquainted with Anaxagoras, Democritus, Empedocles, Parmenides, and the most ancient Pythagoreans. And he refers directly to the later Peripatetics Aristoxenus and Dicæarchus. He cannot, then, be termed strictly or exclusively a Neo-Platonist; he is equally a Neo-Aristotelian and a Neo-Philosopher in general.

Plutarch (plō'tärk). [Gr. Πλούταρχος.] Born at Chæronea, Bœotia, Greece, about 46 A. D. A Greek historian, celebrated as the author of forty-six "Parallel Lives" of Greeks and Romans. He also wrote various philosophical, ethical, and other works, grouped as "Opera moralia." He was a Platonist, but occupied himself chiefly with ethical and religious reflections.

In spite of all exceptions on the score of inaccuracy, want of information, or prejudice, Plutarch's lives must remain one of the most valuable relics of Greek literature, not only because they stand in the place of many volumes of lost history, but also because they are written with a graphic and dramatic vivacity, such as we find in few biographies, ancient or modern; because they are replete with reflexions which, if not profound, are always moderate and sensible; and because the author's aim throughout is to enforce the highest standard of morality of which a heathen was capable. As one of his most enthusiastic admirers has said, "He stands before us as the legate, the ambassador, and the orator on behalf of those institutions whereby the old-time men were rendered wise and virtuous."

She was the daughter of the chief Powhatan, and was about 12 years of age when John Smith was brought a captive before her father in 1607. According to the account of his captivity given by Smith in his "General History of Virginia," published in 1624 after the appearance of Pocahontas in England, she saved his life by interposing her body between him and the war-clubs of his executioners and by interceding for him with her father. This episode is omitted from the accounts of his captivity given in his "True Relation" and his "Map of Virginia," published in 1608 and 1612 respectively, before Pocahontas's appearance in England, and is commonly discredited by recent historians. She had married one of Powhatan's captains, and was living with a tributary band, when Samuel Argall secured possession of her by intimidation or bribery in 1612. He demanded as her ransom a tribute of corn and the restitution of the English captives and goods in the hands of Powhatan. Pocahontas was, nevertheless, detained, and in 1613 was baptized by the name of Rebecca and married to John Rolfe, one of the settlers at Jamestown. In 1772 it comprised, besides the present Prussian Poland, Austrian Poland and Russian Poland (see those headings), the Russian governments of Kovno, Vilna, Vitebsk, Mohileff, Minsk, Grodno, Volhynia, Podolia, and most of Kieff. The capital from about 1326 was Cracow; from the reign of Sigismund III. (1587–1632) it was Warsaw. The early history of Poland is legendary and obscure. A Polish duchy, acknowledging the suzerainty of the German emperor, with its center at Gnesen, appeared in the reign of Mieczyslaw (962–992), who embraced Christianity. Under Boleslaus, his successor, Poland became a kingdom and had a momentary greatness. After a period of great decline it was highly prosperous in the reign of Casimir the Great (1333–70). The dynasty of Piasts ended with him. Poland and Hungary were united 1370–82. Lithuania was united with Poland in 1386, and the Jagellon dynasty then began. Under Wladislaw III., who died in 1444, Poland and Hungary were for a short time united. West Prussia was acquired in 1466. The kingdom flourished in the reigns of Sigismund I. and Sigismund II. (1506–72). Livonia was acquired in 1561. A close union between Poland and Lithuania was effected at the Diet of Lublin in 1569. The Jagellon dynasty ended in 1572 and the crown became elective. It made cessions of Livonia to Sweden in 1660, and of the territory east of the Dnieper to Russia in 1667. Sobieski reigned 1674–96. It was united with Saxony under Augustus II. (1697–1704, 1709–33) and Augustus III. (1733–63). It took part in the Northern War, and about this time suffered greatly from factional troubles. Stanislaus Poniatowski was elected king in 1764. Pompeii (pom-pā'yē; L. pron. pom-pē'yī). An ancient city of Italy, situated on the Bay of Naples, 13 miles southeast of Naples, nearly at the foot of Mount Vesuvius. It was a flourishing provincial town, containing many villas of Romans. It was severely injured by an earthquake in 63 A. D., and was totally destroyed by an eruption of Vesuvius in 79, and buried under ashes. The site was discovered in 1748, and excavations have been carried on down to the present time. Owing to the preservation of the ruins practically intact to the present day by the superincumbent layer of ashes and pumice, the remains of Pompeii afford in many ways the most complete information we possess of Roman material civilization. In this quiet provincial town no civic buildings on a magnificent scale existed, but its modest temples and public offices are not without instruction, while the many handsome private dwellings have afforded a rich store of knowledge, elsewhere unattainable, concerning Roman decorative art and home life. Not the least important yield of the excavations has been the remarkable collection of antique sculptures and utensils, the best part of which is in the Museo Nazionale at Naples. Some excavations were made on the site in antiquity, in the effort to recover buried treasure; but Pompeii and its tragic end were soon forgotten. In 1748 some peasants came accidentally upon a few ancient works of art in a ruined house, and the Bourbon sovereigns of Naples thereupon caused searches to be made for similar objects. Between 1808 and 1815 Murat instituted the first scientifically conducted excavations. After his fall the work went on more or less irregularly until the Bourbon kingdom ended in 1860. Since then it has progressed with admirable system and regularity under Fiorelli. About half of the oval area included within the walls has been thoroughly explored. The great theater, of the time of Augustus, is one of the most perfect of Roman antiquity, semicircular in plan, with a diameter of 322 feet. The cavea has 2 precinctions: below the lower one there are 4 tiers of seats of honor; the upper one has communication by passages and stairs with the triangular forum, and above it there are raised tiers of seats for women and a platform for working the awnings. The cavea had 7 cunei. The temple of Isis is a small Corinthian tetrastyle prostyle structure raised on a basement in a peristyle court upon which open the lodgings of the priests. Many interesting objects connected with the cult were found here, and skeletons of the priests amid surroundings indicating that they had sought, too late, to flee. The house of Castor and Pollux is curious as being a double house with a large peristyle court common to the two parts. Each part has its atrium and all its subdivisions complete. Here were found the paintings of Andromeda and Medea, now at Naples. The exterior of the house contrasts with the usual plainness by its stucco decoration in panels and arabesques. The house of Marcus Lucretius is a double house, remarkable also for having had three stories, and for its beautiful reception-room (tablinum) and dining-room. The house of Meleager is notable for its paintings and other decorations. In the atrium there is a marble table supported by winged griffins. The peristyle court, with 24 Ionic columns, is the finest in Pompeii. At the back there is a large room with a colonnaded gallery resting on columns connected by arches instead of architraves. The house of Pansa is one of the largest and most elaborate dwellings of Pompeii, measuring 120 by 300 feet. The street fronts were occupied by small shops. The vestibule leads to the atrium, which is bordered by small square sleeping-rooms, and connected by a passage with the handsome peristyle court. Upon this open more bedrooms, the triclinium, and the kitchen and servants' quarters. At the back there were a two-storied portico and a spacious garden. The house was ornamented with abundant mosaics, wall-paintings, and other art works. The house of Sallust is a large and richly decorated mansion, in general arrangement similar to the house of Pansa. The garden is bordered by a Doric portico and arranged for flowers in boxes. In one corner there is a summer dining-room. Beside the atrium there is a subordinate colonnaded court, with beautifully painted rooms forming a women's apartment. The house of the Faun is perhaps the best in style of the ancient city. The usual wall-paintings are here replaced by mosaics. The famous Dancing Faun and the mosaic of the Battle of Issus, in the Naples Museum, came from this house. The villa of Diomed is a large and rich residence outside the Herculaneum gate. In the middle is a large peristyle serving as an atrium, upon which open bedrooms, one of them semicircular with windows, the handsomest in Pompeii. Beyond were baths with glass windows, and at the back a fine garden with pavilion and fish-pond. The women's apartments were in an upper story. The cellars contained amphoræ and the skeletons of 18 unfortunate occupants. The old thermæ, consisted of three divisions: the fire-rooms for heating, the bath for men, and the bath for women. Each of the baths included a disrobing-room (apodyterium) and cold, warm, and vapor baths. The men's division is the handsomer: it is decorated with masks and figures in stucco, and with graceful arabesques and reliefs, and had glass windows and marble piscines. The new thermæ were similar, but had many more subdivisions.

On Feb. 27, 1514, he received, in Spain, a grant to settle "the Island of Bimini and the Island of Florida"; but, being occupied with Indian wars in Porto Rico, he was unable to attempt the enterprise until March, 1521. Popul Vuh (pō-pōl′ vō). The sacred or national book of the Quiché Indians of Guatemala. It was originally written in hieroglyphics, but has come down to us in a copy in the Quiché language, with a translation into Spanish by a Dominican missionary, Francisco Ximenez, who wrote about 1721. "This, according to Father Ximenez himself, and according to internal evidence, is a translation of a literal copy of an original book, written by one or more Quichés, in the Quiché language, in Roman letters, after the Christians had occupied Guatemala and after the real original Popul Vuh had been lost or destroyed." (*Bancroft,* Indian Tribes, III. 42.) The manuscript of Ximenez is preserved at Guatemala. The Spanish text was first published by Dr. Scherzer in 1857, and in 1861 Brasseur de Bourbourg published a French translation founded on a careful study of the Quiché text. The substantial authenticity of the Popul Vuh is generally admitted. The book is divided into two parts, the first containing the Quiché cosmogony and mythology, and the second dealing with the early history of the tribe. Also written *Popol Vuh.*

"Against the Christians," in fifteen books [by Porphyry]. This celebrated work, which was answered by Eusebius in twenty-five books, is known to us only from the notices of it in Jerome's commentary and other ecclesiastical writings. Its loss is due to Theodosius II., who ordered it to be publicly burned in A. D. 435, a proceeding which only shows that the apologists had not been successful in answering all its allegations. Modern biblical criticism has sanctioned many of the opinions to which Porphyry first gave a definite expression. But, whether right or wrong, it is to be regretted that we no longer possess a book exhibiting a real acquaintance with the subject, and stating the difficulties which must, sooner or later, have demanded a solution.

Once in the Rigveda, and often in the Atharvaveda and Vajasaneyisanhita and Brahmanas, Prajapati is a supreme god over the other gods of the Vedic period. This Prajapati becomes the Brahma of later philosophical speculation. The name is also given to Manu Svayambhuva, as the son of Brahma and the secondary creator of the ten Rishis from whom mankind has descended.

Prakrit (prä′krit). [Skt. *prākṛta*, natural, unchanged, common; from *prakṛti*, original, natural form. Prakrit is the 'natural, unchanged' idiom, as distinguished from the Sanskrit ('adorned, elaborated, perfected' as subjected to artificial regulation); the common, popular language, in distinction from the Sanskrit as the sacred and classic. But the grammarians use the word in the sense of 'derived,' thereby denoting the connection of the Prakrit with the original Sanskrit, much of the Prakrit of books being formed in accordance with rules from the Sanskrit.] The general name under which are comprised the various dialects which appear to have arisen in India out of the corruption of the Sanskrit during the centuries immediately preceding our era. They form the connecting-link between Sanskrit and the modern Aryan languages of India. The sacred languages of the Buddhists of Ceylon (Pali) and the Jainas of India (Jaina Prakrit) are only different forms of Prakrit, and Pali seems to have been chosen as the Buddhist sacred language to appeal to the sympathies of the people. In Alexander's time Prakrit seems to have been the spoken dialect of the people. The language of the rock-inscriptions of King Ashoka, which record the names of Antiochus and other Greek princes (about 250 B. C.), is also a form of Prakrit, and it is found on the bilingual coins of the Greek kings of Bactria. It plays an important part in all the ancient Hindu dramas, the higher male characters speaking Sanskrit, the women and subordinate male characters using various forms of Prakrit, the language varying according to the rank of the speaker. The oldest Prakrit grammarian, Vararuchi, distinguishes 4 dialects (the Maharashtri, the Paishachi, the Magadhi, and the Shauraseni), while the Sahityadarpana enumerates 14. Prakrit almost always assumes the Sanskrit bases, altering and eliding certain letters in the original word. It continually affects a concurrence of vowels, which is utterly repugnant to Sanskrit.

The camp was included by Aurelian in his new line of fortifications, and still forms an abrupt projection in the wall on the northeast. The fortifications of Aurelian are 3 times as high as those of Tiberius, and not so well built. The latter, embedded as they are in the newer work, can still be followed for a considerable distance. Within the camp there were monumental buildings with mosaics and marble incrustation. Constantine abolished the Pretorian Guard, and pulled down the wall of their camp on the side toward the city.

Pretorian Guard, The. See the extract.

> Some remembrance of this fact lingering in the speech of the people gave always to the term Prætorium (the Prætor's house) a peculiar majesty, and caused it to be used as the equivalent of palace. So in the well-known passages of the New Testament, the palace of Pilate the Governor at Jerusalem, of Herod the King at Cæsarea, of Nero the Emperor at Rome, are all called the Prætorium. From the palace the troops who surrounded the person of the Emperor took their well-known name "the Prætorian Guard." Under Augustus the cohorts composing this force, and amounting apparently to 9,000 or 10,000 men, were scattered over various positions in the city of Rome. In the reign of Tiberius, on pretence of keeping them under stricter discipline, they were collected into one camp on the northeast of the city. The author of this change was the notorious Sejanus, our first and most conspicuous example of a Prefect of the Prætorians who made himself all-powerful in the state. The fall of Sejanus did not bring with it any great diminution of the power of the new functionary. As the Prætorians were the frequent, almost the recognised, creators of a new Emperor, it was natural that their commanding officer should be a leading personage in the state, as natural (if another English analogy may be allowed) as that the Leader of the House of Commons should be the first Minister of the Crown. Still it is strange to find the Prætorian Prefect becoming more and more the ultimate judge of appeal in all civil and criminal cases, and his office held in the golden age of the Empire, the second century, by the most eminent lawyers of the day. This part of his functions survived. When Constantine at length abated the long-standing nuisance of the Prætorian Guards — setting an example which was unconsciously followed by another ruler of Constantinople, Sultan Mahmoud, in his suppression of the Janissaries — he preserved the Prætorian Prefect, and, as we have already seen, gave him a position of pre-eminent dignity in the civil and judicial administration of the Empire. But of military functions he was now entirely deprived, and thus this officer, who had risen into importance in the state solely as the most conspicuous Guardsman about the court, was now permitted to do almost anything that he pleased in the Empire so long as he in no way touched soldiering.

By the first partition Poland (1772) West Prussia was acquired with the Netze rict and Lumeland. Prussia was at war with France 92–95. By the partitions of Poland in 1793 and 1795 Po- sen and the Polish territories as far as the Pilica, Vistula, and Bug were annexed. Prussia lost to France her territories west of the Rhine in 1801; received in 1803 the bishoprics of Paderborn and Hildesheim, and large parts of Munster, Nordhausen, Goslar, Erfurt, the Eichsfeld, and Mühlhausen; received Hannover in 1805 in return for Ansbach, Cleves, and Neuchâtel; was totally overthrown (at Jena, etc.) by France in 1806; lost in 1807 about half its territories, including its possessions on the left of the Elbe, Kottbus, and the larger part of its territories acquired from Poland in 1793 and 1795, and was reduced to a second-rate state; and took a prominent part in the War of Liberation (1813), and in the overthrow of Napoleon (1814 and 1815). By the Congress of Vienna it acquired nearly all its former possessions (but not Hannover or the Polish territory lost in 1807), also parts of the electorates of Cologne and Treves, Swedish Pomerania, Berg, Julich, Westphalia, Siegen, and large parts of Saxony (Wittenberg, Torgau, etc.). It entered the Germanic Confederation, and belonged to the Holy Alliance. Revolutionary outbreaks occurred in 1848. It was at war with Denmark in 1848–49, and suppressed insurrections in Saxony, Baden, and elsewhere in 1849. Prussia, Saxony, and Hannover were united in an alliance in 1849. A constitution was adopted in its final form in 1850. Concessions were made to Austria in the Conference of Olmutz, 1850. Prussia interfered in Schleswig-Holstein in 1851, and renounced its rights to Neuchâtel in 1857. After the accession of William I. in 1861 a parliamentary struggle took place between Bismarck and the liberals. The complications resulting from the Danish war of 1864 (see *Schleswig-Holstein wars*) led in 1866 to the war (in conjunction with Italy) against Austria allied with the South German states, Saxony, and Hannover. By the victory of 1866 Prussia acquired Hannover, Nassau, Frankfort, Hesse-Cassel, and Schleswig-Holstein, became the first German state, and formed the North German Confederation. By the war between France and Germany in 1870–71 the new German Empire was formed, with the crown hereditary in the Prussian dynasty. More recent events are the accession of Frederick III. and of William II. (both in 1888), and the retirement of Bismarck in 1890. (Compare *Germany*.) Area, 134,463 square miles. Psalms (sämz), or **the Book of Psalms.** A book of the Old Testament which contains 150 psalms and hymns. The authorship of a large number of the psalms is ascribed traditionally to David. Many of them, however, are supposed to date from the time of the exile or later. The book is often called the "Psalter," but that term is usually restricted to those versions of or compends from it which are arranged especially for the services of the church. The translation of the Psalter in the Book of Common Prayer is not that of the authorized version, but that of the earlier version of Cranmer's Bible.

The Psalter, as we have it, unquestionably contains Psalms of the Exile and the new Jerusalem. It is also generally admitted to contain Psalms of the period of David, thus embracing within its compass poems extending over a range of some five hundred years.

P. T. Letters. A series of letters published by Pope.

Never, surely, did all the arts of the most skilful diplomacy give rise to a series of intrigues more complex than those which attended the publication of the "P. T. Letters." An ordinary man says that he is obliged to publish by request of friends, and we regard the transparent device as, at most, a venial offence. But in Pope's hands this simple trick becomes a complex apparatus of plots within plots, which have only been unravelled by the persevering labours of the most industrious literary detectives. The whole story is given for the first time at full length in Mr. Elwin's edition of Pope, and the revelation borders upon the incredible.

Leslie Stephen, Hours in a Library, p. 101.

Ptolemais (tol-e-mā′is). [Gr. Πτολεμαΐς.] In ancient geography: (*a*) A city in Cyrenaica, west of Cyrene. (*b*) A later name of Accho. See *Acre*. (*c*) Ptolemais Theron, a town on the west coast of the Red Sea, about lat. 18° N.

Ptolemy (tol′e-mi) **I.**, surnamed **Soter** ('Preserver') and **Lagi** ('son of Lagus'). [L. *Ptolemæus*, from Gr. Πτολεμαῖος.] Died 283 B. C. King of Egypt, founder of the Greek dynasty in that country. He was the alleged son of Lagus, a Macedonian of ignoble birth, and Arsinoë; but, as Arsinoë had been the concubine of Philip II. of Macedon, he was commonly supposed by his contemporaries to be the son of that monarch. He rose to a high command in the army under Alexander the Great, and in the distribution of the provinces on the latter's death in 323 obtained the government of Egypt. He formed an alliance with Antipater against Perdiccas, the regent in Asia, who invaded Egypt in 321 but was murdered by his own troops. He afterward concluded an alliance with Cassander, Seleucus, and Lysimachus against Antigonus, who fell in the battle of Ipsus in 301. He assumed the title of king in 306. He was captured during an invasion of Egypt by Antiochus Epiphanes, king of Syria, in 170, whereupon his younger brother Ptolemy VII. proclaimed himself king. He was presently released by Antiochus, and for a time reigned conjointly with his brother. Alexander to the throne in his stead. He succeeded, however, in maintaining himself in Cyprus, which he held as an independent kingdom, until the death of his mother in 89, when he was recalled by the Alexandrians, who had in the meantime expelled his brother.

Ptolemy XI., surnamed **Neus Dionysus** and **Auletes** ('Flute-player'). Died 51 B. C. King of Egypt, illegitimate son of Ptolemy VIII. Lathyrus. Ptolemy XII. Died in 48 or 47 B. C. King of Egypt, son of Ptolemy XI. Auletes. He ascended the throne in 51 conjointly with his sister Cleopatra, whom he expelled in 49. The reinstatement of Cleopatra by Cæsar in 48 gave rise to war. Ptolemy was defeated on the Nile, and was drowned in the flight.

Ptolemy, L. Claudius Ptolemæus (klâ′di-us tol-e-mē′us). Born at Alexandria: flourished in the first half of the 2d century A. D. A celebrated Alexandrian astronomer, geographer, and mathematician. He "built up a mathematical system of astronomy and geography which was universally received until, in the course of the 16th and 17th centuries, the system of Copernicus displaced it. Ptolemy believed that the sun, planets, and stars revolved round the earth. His error in calculating the circumference of the globe warranted Columbus in supposing that the distance from the western coast of Europe to the eastern coast of Asia was about one third less than it actually is; and thus encouraged the enterprise which led to the discovery of America" (*Jebb*). His recorded observations (at Canopus) extend from 127 to 151 A. D. His astronomical and mathematical work is contained in the "Syntaxis," called by the Arabs "Almagest" (which see).

Puck (puk). A playful, mischievous elf in folk-lore: otherwise Robin Goodfellow, Will-o'-the-Wisp, etc. Shakspere introduces him in the "Midsummer Night's Dream" as a household fairy, the jester to King Oberon, and he plays many pranks in the wood near Athens. In "Faust" Goethe introduces him as a pervading, whimsical, perverse element rather than as an individual. The tricksy nature of Shakspere's Puck harmonizes better with the etymology. Puck came to England with the Scandinavian or Danish settlers. "Puki in old Norse was a devil, usually a wee devil. His Danish name was Pokker. To the Celts he was Puca or Pwca. He is Pug when Pug is an imp's name, and Bug in the sense of hobgoblin, bugbear, and humbug." *Morley*.

The character of Puck, or, as he is properly called, Robin Goodfellow, is literally no other than our own "guter Knecht Ruprecht"; and it is curious that from this name in German the word "Rüpel" is derived, the only one by which we can give the idea of the English clown, the very part which, in Shakespeare, Puck plays in the kingdom of the fairies. This belief in fairies was far more diffused through Scandinavia than through England; and again in Scotland and England it was far more actively developed than in Germany. Robin Goodfellow especially, of whom we hear in England as early as the thirteenth century, was a favourite in popular traditions, and to his name all the cunning tricks were imputed which we relate of Eulenspiegel and other nations of others.

He was city chronologer in 1639. Among his works (largely sacred poems) are "Divine Emblems" (1635), "Hieroglyphics" (1638), and a prose work, "Enchiridion" (1640).

The enormous popularity of Francis Quarles's "Emblems" and "Enchiridion," a popularity which has not entirely ceased up to the present day, accounts to some extent for the very unjust ridicule which has been lavished on him by men of letters of his own and later times. It is, of course, sufficiently absurd that such hasty and slovenly work should have been reprinted as fast as the presses could give it, when the "Hesperides" remained almost unnoticed. But the silly antithesis of Pope, a writer who, great as he was, was almost as ignorant of literary history as his model, Boileau, ought to prejudice no one, and it is strictly true that Quarles's enormous volume hides, to some extent, his merits.

Quetzalcohuatl (kät-zäl-kō-wät'l). [Nahuatl: *quetzalli*, green feather, and *cohuatl*, snake.] A hero-god of the ancient Mexicans. Some stories represent him as one of the four principal gods, controlling the air and wind, and assisting in the creation of the world and man. But commonly he is a man with more or less supernatural attributes, and there are various confused accounts of how he came from a distant country, in the time of the Toltecs or before them, and ruled in Anahuac for many years with great wisdom. Then he went to Cholula, where he lived for 20 years and taught the people to weave, build stone houses, and make pottery and featherwork; but because he wished to abolish human sacrifices he was opposed by the priests, and at length journeyed on to Tlapallan (probably on the Gulf Coast) and disappeared over the sea. He was worshiped, especially at Cholula, as the god of the air and rain, and human sacrifices were made to him. It would appear that the myth was greatly embellished by the Jesuit authors, who made of Quetzalcohuatl a kind of prophet or apostle, a white and bearded man wearing a strange dress and practising severe penances, eventually identifying him with St. Thomas. Probably these later authors are also responsible for the story that he foretold the coming of white men who should give the Indians a better government and religion. It is possible that Quetzalcohuatl was a real personage of very ancient times. The Maya (Quiché) creative deity Gucumatz somewhat resembles Quetzalcohuatl, and the name has the same meaning.

Quevedo y Villegas (kā-vā'ᵺō ē vēl-yā'gäs), **Francisco de.** Born at Madrid, Sept. 26, 1580: died at Villanueva de los Infantes, Spain, Sept. 8, 1645. A Spanish satirist, humorist, and novelist. He was employed in the civil service, and was imprisoned for political libel. Among his satirical works is "Sueños" ("Visions").

By these [prose satires] he is remembered and will always be remembered throughout the world. The longest of them, called "The History and Life of the Great Sharper, Paul of Segovia," was first printed in 1626. It belongs to the style of fiction invented by Mendoza in his "Lazarillo," and has most of the characteristics of its class; showing, notwithstanding the evident haste and carelessness with which it was written, more talent and spirit than any of them except its prototype. Like the rest, it sets forth the life of an adventurer, cowardly, insolent, and full of resources, who begins in the lowest and most infamous ranks of society, but, unlike most others of his class, never fairly rises above his original condition; for all his ingenuity, wit, and spirit only enable him to struggle up, as it were by accident, to some brilliant success, from which he is immediately precipitated by the discovery of his true character. *Ticknor*, Span. Lit., II. 286.

Quiches (kē-chās'). A powerful Indian tribe of western Guatemala at the time of the conquest. They were one of the chief branches of the Maya stock, and, according to tradition, had originally formed a part of the great Maya nation. After the breaking up of the original Maya empire, a series of struggles took place until the 12th or 13th century, when the Quiche dynasty became established. Later the Cakchiquels separated from them, and in time became divided into two tribes by the breaking off of the Zutugils. Thus at the beginning of the 16th century there were three great Maya tribes in Guatemala—the Quiches, Cakchiquels, and Zutugils: but of these the Quiches had a certain political and cultural preeminence.

Their capital was Utatlan, near the present town of Santa Cruz Quiché, northwest of Guatemala, and it is described as a large and fine city, fortified with great skill. The Quiches were ruled by hereditary chiefs, had a complicated system of laws and religion, and kept records in picture-writing. (See *Popul Vuh.*) They were the first Indians encountered by Alvarado when he entered Guatemala in 1524. Their chief, Tecum Uman, brought a vast army against the Spaniards, but was defeated and killed; his son, Oxib Quieh, was seized and hanged; the city of Utatlan was destroyed; and within a few months the Quiches were completely conquered, many of them being enslaved. Their descendants now form the peasantry of the same region.

Quichuas (kē-chō′äs). The dominant Indian race of Peru at the time of the Spanish conquest. Before the time of the Incas the highlands of Peru were inhabited by many tribes, all or most of which spoke dialects of the Quichua tongue and resembled each other in customs: possibly they were descended from the ancient Piruas (which see). One of these tribes, in the valleys near Cuzco, rose to prominence under the Inca sovereigns during the 13th and 14th centuries; partly by conquest, partly by a liberal and conciliatory policy, they amalgamated the other tribes, and eventually established an empire which extended from Quito to central Chile. (See *Inca Empire.*) The later conquests along the coast and in the south and east brought in many tribes which were not of Quichua stock, and were never thoroughly amalgamated with the conquerors. In many respects the Quichuas were the most remarkable of American Indians. Their government was a form of state socialism, controlled by a hereditary aristocracy, the whole under the absolute control of a hereditary sovereign. (See *Incas.*) Their internal polity was singularly perfect. They planted maize, potatoes, coca, etc., and they had long domesticated the llama and alpaca, using the former as a beast of burden and for food, and the latter for its wool, from which they spun fine cloth. They excelled in the making of pottery and in building; and they constructed roads from Cuzco to all parts of the country. They had no knowledge of writing or hieroglyphics, records and accounts being imperfectly kept by means of *quipus*, or knotted cords. Their religion included the recognition of a supreme being, who was worshiped as Pachacamac or Uiracocha: at Cuzco he was represented by a stone statue covered with gold, and also, it would appear, by a polished gold plate. The sun, moon, stars, and many lesser deities were adored with various ceremonies, the sun-worship being particularly prominent. Animals were sometimes sacrificed at the festivals, but human sacrifices, if they existed, were very rare. After the fall of the Incas most of the Quichua tribes submitted to the Spaniards, and were permitted to keep their hereditary chiefs under the Spanish rule. Many of their laws were retained (see *Libro de Tasas*), and from the old system of common labor for the state the colonial *mitta* was evolved, by which every Indian community paid taxes in the enforced labor of a part of its members. This became, as a matter of course, a kind of slavery under which the Indians perished by thousands in the mines. In 1780 Tupac Amaru, a descendant of the Incas, led them in a formidable rebellion which was at length suppressed with great bloodshed. Quichua is still the common language in the interior of Peru, and a large proportion, even of the upper classes, are of Quichua blood. Some of the mountain tribes retain their old organization. The name *Quichua* was not originally a tribal designation, but referred to any mountaineer: it was first used for the language by the Jesuit missionaries. Also written *Quechuas*, *Kichuas*, and *Kechuas.*

Quichua stock. A linguistic stock of South American Indians, embracing the various Quichua tribes of Peru, the Quitus of Ecuador, etc. Several tribes of northeastern Peru, Ecuador, and Colombia have adopted the Quichua language. Many ethnologists are inclined to unite the Aymaras of Bolivia with this stock.

In compliance with the wishes of his father, Thomas Rabelais, he became a monk and spent some 15 years in conscientious work at the Cordelier convent of Fontenay-le-Comte (1509–24). He was transferred thence to the order of Benedictine monks at Maillezais, and his occupations during the 6 years that follow are not well defined. In 1530 he is found studying medicine at Montpellier, and two years later practising the profession at Lyons, though he took the doctor's degree in 1537 only. He devoted a great deal of his time to writing, and yet led a wandering life in France and in Italy. He was in charge of the parish of Meudon 1550–52, and died shortly afterward, presumably in Paris. Besides composing yearly almanacs, of which but a few fragments are preserved to this day, Rabelais edited various old medical treatises, and made his lasting reputation with the novels "Pantagruel" (1533) and "Gargantua" (1535), of which the latter comes first in point of the story they both tell. They were published under the name of Alcofribas Nasier, which is simply the anagram of François Rabelais. Their success was such as to encourage a sequel. Subsequent volumes came out under Rabelais's own name, the third in 1545, the fourth in 1552, and the fifth as a posthumous work in 1564.

A celebrated French tragedienne, of Hebrew descent. She was a street-singer in Lyons in 1831 with her sister Sophie, known as Sarah. Choron, director of a school of music, hearing her, was struck with the quality of her voice, and took her with her family to Paris, where she entered his academy. She soon lost her voice, however, and studied the dramatic art with Saint-Aulaire. He had a small theater known as "La Salle Molière," where he produced plays with his pupils as actors. Rachel played soubrettes and tragic rôles there from 1834 to 1836. She began to attract attention, and was admitted to the Conservatoire in 1836; made rapid progress; resigned in 1837; appeared at the Gymnase in July of that year; and in 1838 appeared as Camille in "Horace" at the Théâtre Français. Her success was extraordinary, in the greenroom and orchestra as well as in the house. From this time her reputation was secure. She went to England in 1841, and to America in 1855, where she contracted a cold that ended in her fatal illness. Her finest parts were in the plays of Corneille and Racine, and in "Adrienne Lecouvreur." She also played Jeanne Darc, Mademoiselle de Belle Isle, Cléopâtre, etc.

Racine (rä-sēn'), **Jean Baptiste.** Born at La Ferté-Milon, Dec. 21, 1639: died at Paris, April 26, 1699. A celebrated French tragic poet. He lost his parents at a very early age, and was brought up by his grandparents. His studies, begun when he was ten years old at the College of Beauvais, were continued at Port Royal, and finished at the Collège d'Harcourt (1658–1659). On graduating, he went to live with a cousin of his, who was in the service of the Duc de Luynes. He was well received in society, and made stanch friends among men of literary bent. His early training in Greek and Latin classics, especially the former, had been very thorough, and his tastes all ran in the direction of intellectual pursuits. He attracted attention in this line for the first time by an ode written for the marriage of Louis XIV., and entitled "Les nymphes de la Seine" (1660). A couple of short comedies, "Amasie" (1660) and "Les amours d'Ovide" (1661), are among his first attempts as a playwright, and unfortunately are now lost. His friendly relations with men like La Fontaine, Boileau, and Molière led him to devote himself to writing for the stage: he thus produced a couple of plays, "La Thébaïde" (1664) and "Alexandre" (1665). His first real success as a dramatic poet was scored in "Andromaque" (1667), which is the initial tragedy in a long series of masterpieces. He attempted comedy next in "Les plaideurs" (1668), but reverted completely to tragedy in "Britannicus" (1669), "Bérénice" (1670), "Bajazet" (1672), "Mithridate" (1673), "Iphigénie" (1674), and "Phèdre" (1677). Racine's enemies conspired against him at this juncture, and preferred to him a minor poet named Pradon, who had written a rival tragedy on "Phèdre" which they extolled far

ber of years from composing tragedies, but fina
the request of Madame de Maintenon, wrote a co
plays of great lyric beauty, dealing with subjects fr
Bible: "Esther" (1689) and "Athalie" (1691). Besi
above, Racine composed four hymns that rank
the finest productions in lyric poetry of his day,
"Abrégé de l'histoire de Port-Royal," and a few
minor writings. The best edition of Racine's wor

It had been cut up by Osorkon II., e Twenty-second Dynasty, to build a pylon gateway; it was from the fallen blocks of this gateway that Petrie recognized what it had originally been. Among fragments were found an ear, part of a foot, pieces of n, part of the pilaster which supported the statue up ck, and part of the breast, on which are carved the ovals. *Ex pede Herculem.* These fragments (mere of a few tons each), although they represent but a small portion of the whole, enabled Mr. Petrie to ure, describe, and weigh the shattered giant with ab-e certainty. He proved to have been the most stu-ous colossus known. Those statues which approach st to him in size are the colossi of Abû-Simbel, the of the Ramesseum, and the colossi of the Plain. e, however, are all seated figures, and, with the ex-ion of the torso, are executed in comparatively soft rials. But the Rameses of Tanis was not only sculp-l in the obdurate red granite of Assûan, and designed a larger scale than any of these, but he stood erect crowned, ninety-two feet high from top to toe, or one dred and twenty-five feet high including his pedestal. *Edwards,* Pharaohs, Fellahs, etc., p. 53.

Rask (räsk), **Rasmus Kristian.** Born at Brändekilde, Denmark, Nov. 22, 1787: died at Copenhagen, Nov. 14, 1832. A Danish philologist and writer, one of the founders of the modern science of comparative philology. He went to the Copenhagen University without means, but obtained a subsidiary position in the university library, and eked out a support by giving private instruction while he continued the linguistic studies to which he had devoted himself. His earliest work was particularly in the direction of Old Norse. In 1808 he published a translation of the Edda; in 1811 an Icelandic grammar. In 1813, with government assistance, he made a journey to Iceland to study the language, returning by the way of Scotland in 1815. In the meantime he had been awarded the gold medal of the Royal Society of Antiquaries for an essay on the origin of the Old Norse language. In 1816, with public support, he started on an extended journey to the East. He was first for some months in Stockholm, then in St. Petersburg, whence he set out in the summer of 1819 for Tiflis. He traveled through Persia in 1820, and then went on to Bombay, everywhere actively engaged in studying the languages of the countries through which he passed. In India he remained two years, engaged in linguistic study and in collecting and copying MSS. He finally returned to Copenhagen in 1823. His labors for a long time failed of a just recognition. A small pension was given him for three years by the government; in 1825 he was made professor extraordinarius of the history of literature, but without a stipend. In 1829, however, he was appointed university librarian; and at the end of 1831, barely a year before his death, he finally received the professorship of Oriental languages which he had so long desired. His linguistic studies covered a most extraordinary range. He published, among others, grammars of Icelandic, Anglo-Saxon, Singalese, Spanish, Friesian, Italian, Danish (in English), Lapp, and English, and wrote monographs on especial points of many languages and dialects. In numerous instances he cleared the way, by his preliminary labors and suggestions, for other workers in the same field. The principle of the relative correspondence of consonants in the Indo-Germanic languages, for instance, was discovered by him, although it was formulated as a law by Jacob Grimm whose name it bears. His collected essays ("Samlade Afhandlinger") were published at Copenhagen, 1834–38, in 3 vols.

See *Democratic Party.*—2. A party formed in 1854, having as its original purpose opposition to the extension of slavery into the Territories. It was composed of Free-soilers, of antislavery Whigs, and of some Democrats (who unitedly formed the group known as Anti-Nebraska men), and was joined by the abolitionists, and eventually by many Know-nothings. During the period of the Civil War many war Democrats acted with it. It first nominated a candidate for President in 1856. In 1856 it elected its candidate (Banks) for speaker of the House of Representatives, and in 1861 it gained control of the executive and both houses of Congress. The presidents from 1861 to 1885, Lincoln, Johnson, Grant, Hayes, Garfield, and Arthur, were Republicans, and the presidency was again filled by a Republican, Harrison, from 1889 to 1893, and by another, McKinley, 1897–. The Republicans held the power in Congress until 1875; they then lost the House, regained it in 1881, lost it in 1883, again regained it in 1889, and lost it again in 1891, regaining it once more in 1895, and holding it in 1897. The Senate, however, they continued to hold, except for 1879–83, until 1893, when the executive and both branches of Congress passed into the hands of the Democrats; in 1897 they obtained one half of the total number of senators and the Vice-President. The party favors generally a broad construction of the Constitution, liberal expenditures, extension of the powers of the national government, and a high protective tariff. Among the measures with which it has been identified in whole or in part are the suppression of the rebellion, the abolition of slavery, reconstruction, and the resumption of specie payments.

Robbia (rob'bē-ä), **Andrea della.** Born in 1437: died about 1528. The nephew of Luca della Robbia, noted for his work in terra-cotta, the secret of which he inherited. He, with his son Luca, spent eleven years upon the frieze of the Ceppo hospital at Pistoia. He also executed the decorations of the Loggia di San Paolo at Florence, the medallions of the façade of the Hospital of the Innocents, the decoration of Or San Michele, and a long series of bas-reliefs executed for the churches of Arezzo, Prato, Pistoia, Siena, etc. He very rarely worked in marble: a marble Pietà is in the Church of Santa Maria delle Grazie, near Arezzo.

Robbia, Giovanni della. Born about 1469: died about 1529. Son of Andrea della Robbia, noted as a worker in terra-cotta.

Robbia, Girolamo della. Died about 1566. Son of Andrea della Robbia, noted as a worker in terra-cotta and as an architect. None of the sons of Andrea della Robbia did so much in applying Robbia ware to architectural purposes as Girolamo, his fourth son, who was architect, sculptor, and painter, and had already obtained notice for his works in bronze and marble when he was taken to France by some Florentine merchants, and there found employment during the remaining 45 years of his life under four kings of the house of Valois. On his arrival he was employed by Francis I. to build the Château de Madrid in the Bois de Boulogne, which he decorated throughout with Robbia ware. This palace was leveled in the Revolution, and its beautiful terra-cottas were used to mend roads.

Robbia, Luca della (real name **Luca di Simone di Marco della Robbia**). Born at Florence about 1400: died at Florence (?), Sept. 22, 1482. A celebrated Italian sculptor. He was early apprenticed to Leonardo di Ser Giovanni, the best goldsmith of the city. In 1443 he made the first work in Robbia ware after long study and repeated experiments. At first he employed a simple combination of white figures with blue draperies and occasionally green in the backgrounds. He and his family afterward multiplied the number of colors and carried them into the flesh and draperies of their figures. The first bas-reliefs of Robbia ware are those of the Resurrection and Ascension in the lunettes of the doors leading into the sacristy of the Duomo. The earliest memorials of the first 43 years of his life are the bas-reliefs set into the side of Giotto's Campanile 1435–40, and 2 unfinished reliefs of the imprisonment and crucifixion of St. Peter. He made the well-known reliefs of singing boys for the screen of one of the organ-lofts of the cathedral 1431–40. To 1445 belong the bronze doors of the sacristy of the Duomo. It is difficult to distinguish his works from those of Andrea and his four sons, Giovanni, Luca II., Ambrogio, and Girolamo. Among the most remarkable of those which may be attributed to Luca alone, or Luca and Andrea, are the altarpiece in the Church of the Osservanza near Siena (which represents the Coronation of the Virgin), a bas-relief over the door of the Church of San Pierino in the Via di Terra Vecchia in Florence, the ceiling of the Chapel of San Miniato, some of the medallions on the outside of Or San Michele, a Virgin and Child, an Annunciation in the cloister of the Innocenti Hospital in Florence, a Madonna with two saints in the Via della Scala, a Coronation of the Virgin, an adoring Madonna formerly at Pisa, and a fountain in the sacristy of Santa Maria Novella. After lasting nearly a century, the school of Della Robbia died out.

He ascended the throne about 710 and was overthrown and probably slain by the Saracens under Tarik in 711. According to legend he violated Florinda or Cava, daughter of Count Julian of Ceuta, whose father avenged her dishonor by calling in the Saracens. Roderick was overcome in a seven days' fight, and fled to the mountains, where he became a hermit.

The fate of Roderick has remained a mystery to this day. His horse and sandals were found on the river-bank the day after the battle, but his body was not with them. Doubtless he was drowned and washed out to the great ocean. But the Spaniards would not believe this. They clothed the dead king with a holy mystery which assuredly did not enfold him when alive. They made the last of the Goths into a legendary saviour like King Arthur, and believed that he would come again from his resting-place in some ocean isle, healed of his wound, to lead the Christians once more against the infidels. In the Spanish legends, Roderick spent the rest of his life in pious acts of penance, and was slowly devoured by snakes in punishment for the sins he had committed, until at last his crime was washed out, "the body's pang had spared the spirit's pain," and "Don Rodrigo" was suffered to depart to the peaceful isle, whence his countrymen long awaited his triumphant return. *Poole,* Story of the Moors, p. 21.

He was a Norwegian viking who ascended the Seine and took Rouen at the head of a band of Scandinavian pirates, and in 911 or 912 compelled Charles III. the Simple to invest him with the sovereignty of the region between the Seine and the Epte, which received the name of Normandy. Roman comique (rō-moṅ′ kō-mēk′). [F., 'comical romance.'] A work by Scarron, "an unfinished history of a troupe of strolling actors, displaying extraordinary truth of observation and power of realistic description in the style which Le Sage and Fielding afterwards made popular throughout Europe" (*Saintsbury*). It was versified by M. d'Orvilliers, and published at Paris (1733). Roman de la Rose (rō-moṅ′ dė lä rōz). [F., 'Romance of the Rose.'] An early French poem, begun by Guillaume de Lorris before 1260, and continued forty or fifty years later by Jean de Meung. The part written by the former extends to 4,670 lines, and the entire poem contains more than 20,000. It is an elaborate allegory the theme of which is the art of love. For a long time it enjoyed extraordinary popularity. See *Romaunt of the Rose.*

But the real secret of its vogue, as of all such vogues, is that it faithfully held up the mirror to the later middle ages. In no single book can that period of history be so conveniently studied. Its ingrained religion and its nascent free-thought; its thirst for knowledge and its lack of criticism; its sharp social divisions and its indistinct aspirations after liberty and equality; its traditional morality and asceticism, and its half-pagan half-childish relish for the pleasure of sense; its romance and its coarseness, all its weakness and all its strength, here appear.

Roman de Troie (rō-moṅ′ dė trwä). A poem by Benoît de Sainte-Maure, written about 1160.

The principal poem of this class is the "Roman de Troie" of Benoist de Sainte-More. This work, which extends to more than thirty thousand verses, has the redundancy and the longwindedness which characterise many, if not most, early French poems written in its metre. But it has one merit which ought to conciliate English readers to Benoist: it contains the undoubted original of Shakespeare's "Cressida."

It is not surprising that from the same somewhat vague premises the following very different conclusions are drawn by their respective authors: Bunsen fixes the population of Rome (B. C. 15) at 1,300,000, Marquardt at 1,630,000, Zumpt at 1,970,000, Hoeck at 2,265,000. I take this comparison of their different results from Von Wietersheim, who himself arrives at results very similar to those of Bunsen, making the total population of the city 1,350,000. The "Curiosum Urbis," a description of the city of Rome assigned to the age of Constantine, gives the number of the dwellings therein as 1790 Domus and 46,602 Insulæ. Scholars are generally agreed that the former are the great self-contained mansions of the rich, and the latter the blocks of what we should call "tenemented property" let out in flats and rooms to the poorer classes. From this number of dwellings Gibbon infers a population of 1,200,000 and Von Wietersheim 1,470,000 at the beginning of the fourth century. It is obvious, however, how exceedingly liable to error are all calculations of the population of a city from a conjectural allowance of so many inhabitants to each house.

Hodgkin, Italy and her Invaders, I. 304.

For ages the Empire remained Roman in the fullest sense, Roman even in keeping possession of the Old Rome. It was Roman too in one most distinctive characteristic of the older Roman power. From the first Julius to the last Palaiologos, the Roman Empire was a power and not a nation. Of no phase of the Roman power is this more true than of its Eastern or Byzantine phase. The name *Roman*, in the use of Procopius, when it does not refer geographically to the elder Rome, means any man, of whatever race, who is a subject of the Roman Empire or who serves in the Roman armies. His nationality may be not only Greek, Macedonian, or Thracian, but Gothic, Persian, or Hunnish. *Freeman*, Hist. Essays, III. 246.

Romeo and Juliet. A tragedy by Shakspere, surreptitiously printed in 1597 (a correct edition in 1599), and produced between 1591–96. The legend of the lovers is founded on a tale found among the "Novelle" of Masuccio di Salerno, of whom little is known. It was printed at Naples in 1476. The story next appears in "La Giulietta," a tale by Luigi da Porta, in 1535; then "a Dominican monk, Matteo Bandello, took up the tale, rehandled it, and included it among his somewhat unclerical 'Novelle,' which appeared at Lucca in 1554. Five years later it passed the Alps—a version of Bandello's 'Novelle,' with variations and additions, being given to French readers by Pierre Boaistuau among his 'Histoires Tragiques.' In 1562 Arthur Brooke produced the English poem, 'The Tragicall History of Romeus and Juliet,' on which Shakspere founded his tragedy. Brooke speaks of having seen 'the same argument lately set forth on stage'; no such drama of early Elizabethan days survives; rude indeed must have been the attempt of any playwright in England of 1562. Again five years, and Boaistuau's French paraphrase of Bandello was translated into English prose by William Painter for his 'Palace of Pleasure'; this also Shakspere consulted. In Italy before the close of the sixteenth century the legend had been versified in ottava rima, professedly by a noble lady of Verona naming herself 'Ciftia'—really, it is supposed, by Gherardo Bolderi; it had been dramatized by the blind poet and actor Luigi Groto, with scene and time and names of persons changed; it had been recorded as grave matter of history by De la Corte, who states that he had many times seen the tomb or sarcophagus of the lovers, then used as a washing-trough, at the well of the orphanage of St. Francis" (*Dowden*). Garrick produced a version of "Romeo and Juliet" in 1748, with a different ending, for Barry and Mrs. Cibber; James Howard's adaptation appeared about 1668. Lope de Vega and Francisco de Roxas also wrote Spanish plays on the subject. The story is of the love and tragic death of two impassioned lovers. The subject has often been used by composers of opera, notably by Zingarelle, Bellini, and Gounod. Berlioz used the subject for his dramatic fifth symphony ("Roméo et Juliette," 1839).

The artistic aim of the novel is to show the conflict between liberal and classical culture and the Christian faith aroused by the influence of the reformer Savonarola in the heart of Romola, a daughter of the Florentine house of Bardi. Her marriage with the Greek Tito Melema having proved a failure, and all the ties of her life having been broken, she devotes herself to the service of a plague-stricken people, and attains peace through self-sacrifice.

After a brief stay at the Collège de Navarre in Paris, he became page to Charles, duke of Orléans, second son of Francis I. of France. He spent also a couple of years in the service of James V. of Scotland, and then returned to his former post, and was attached to various diplomatic embassies. On his final return to France in 1542, he lost his sense of hearing in consequence of a severe illness. This infirmity compelled him to give up the life at court, and led him to turn all his attention to literary labors. Together with his friend Baïf, he took up a course of study that extended over 7 years (1542–49) and made of him an excellent Greek scholar. The ultimate end he had in view was to regenerate his native tongue, and demonstrate in his own works that the French language was capable of as much power and nobility of expression as it had of acknowledged grace and refinement. About 1552 he began to publish his poetic works: "Odes," "Sonnets à Cassandre," "Le bocage," "Les amours," etc. His greatest success was attained in his "Hymnes" (1555–56), and he became a great favorite with Charles IX., king of France from 1560 to 1574. On the death of his royal patron, Ronsard was gradually relegated to the background: finally he left the court in utter discouragement. The last years of his life (1574–85) were spent in quiet and sad retirement. Ronsard was the father of lyric poetry in France. His great ambition, however, had been to rank as the Homer or Vergil of his country, and in this spirit he undertook to write a long poem, "La Franciade": he labored on it for 25 years, and finally left it unfinished.

The table would seat 150 knights. One seat was called the siege or seat perilous because it was death to any knight to sit upon it unless he were the knight whose achievement of the Holy Grail was certain. The Order of the Round Table was an institution founded by King Arthur at the advice of Merlin. It was originally military, but it ultimately became a military and theocratic organization. The romances of the grail and of the Round Table are closely connected. There were legends of the latter before 1155, but between 1155 and 1200 several books were collectively called "Romances of the Round Table." The first poet who is distinctively of the 18th century, and not the least remarkable, was Jean Baptiste Rousseau (1669–1741). Rousseau's life was a singular and rather an unfortunate one. In the first place, he was exiled for a piece of scandalous literature of which in all probability he was quite guiltless; and, in the second, meeting in his exile with Voltaire, who professed (and seems really to have felt) admiration for him, he offended the irritable disciple and was long the butt of his attacks.

Rousseau, Jean Jacques. Born at Geneva, June 28, 1712: died at Ermenonville, near Paris, July 2, 1778. An eminent Swiss-French philosopher. His mother died in giving him birth, and his father, a man of selfish and careless nature, spent his time mending watches and teaching dancing as a means of livelihood. For education Jean Jacques read Plutarch and some novels. He was successively an engraver's apprentice, a lackey, a musician, a student in a seminary, a clerk, a private tutor, and a music-copyist. He changed his religion repeatedly, even on pecuniary inducements. He lived thus from hand to mouth until the age of 38, and the only time that he knew no need was during the years spent with the notorious Madame de Warens. His first real awakening to his latent talents dates from the summer of 1749, when he undertook to compete for a prize offered by the Academy of Dijon for the best dissertation on the subject "Whether the progress of the sciences and of letters has tended to corrupt or to elevate morals." So eloquent was he in his paradoxical condemnation of civilization, that he achieved at once a brilliant success. The following years witnessed of literary triumphs, such as "Le devin du village" "Discours sur l'inégalité des conditions" (1754), " sur les spectacles" (1758), "La nouvelle Héloïse" "Le contrat social" (1762), and "Emile, ou de l'édu (1762). The ideas expressed in this last work led t seau's exile from France, and laid the foundation ern pedagogy. He lived in Switzerland and Englan he was allowed to come back, in 1767, on condition would not write any more. And in fact his last w consequence, "Les confessions" and "Réveries d'un neur solitaire," were not published until 1782, 4 yea his death. Rousseau's home life is an enigma: h with a woman unworthy of him, Thérèse Le Vasse bore to him 5 children, whom he sent one after th to the Foundling Asylum. He died of apoplexy aft ing been for many years a victim to the mania of p tion.

ustam (Pers. pron. rĕs-tem'). A hero of the hahnamah, son of Zal and Rudabah, daughter f Mihrab, king of Kabul. On the first day of his fe he became as large as a child a year old, and ten nurses were necessary to provide him with milk. While a mere child he kills a raging elephant, and while still a youth he avenges the death of his great-grandfather Nariman by taking the fortress of Sipand, which he enters disguised as a salt-merchant. In the reign of Garshasp, Zal gives over the dignity of Pahlavan, or champion of the realm, to Rustam, who takes the club of Sam and chooses his horse Rakush. On the death of Garshasp, Rustam is sent to offer the crown to Kaiqubad, who is at Mount Alburz. Returning with Kaiqubad, Rustam defeats without help the armies of Afrasyab. Rustam fights with Afrasyab himself, and drags him fastened by his girdle to Raksh. The girdle breaks, and Afrasyab is hidden by his warriors. He advises Pashang, the king of Turan, to make peace. In the next reign (that of Kaikawus) Rustam has his seven adventures, encountered in delivering Kaikawus from the King of Mazandaran. Raksh kills a lion, Rustam finds a spring in a burning desert, slays a dragon eighty feet long, slays an enchantress, subdues Aulad and spares his life on condition that he shall guide him to the caves of the White Demon, slays the demon chief Arzang, and finally slays the White Demon. After the return of Kaikawus, Rustam goes to hunt in Turan, where his horse Raksh is captured as Rustam sleeps. Rustam goes to the city of Samangan to recover the steed; is received with honor by its king; and weds his daughter Tahminah. Summoned away before the birth of his son, Rustam leaves for him a bracelet by which he is to recognize him. When Suhrab the son is born, Tahminah, fearing that the child will be taken away to Iran, pretends that it is a daughter. Suhrab grows up unknown to his father, and becomes a great warrior. The Turanians and Iranians fight. A council of chiefs decides for single combat between the leaders Suhrab and Rustam, when Rustam kills Suhrab. Learning from the bracelet that he has slain his son, he returns in grief to Zabulistan, whence he comes later to kill Sudabah, the treacherous wife of Kaikawus, and to continue the war with Turan, in which he performs endless exploits in the reigns of Kaikhusrau, Luhrasp, and Gushtasp, the most considerable being the combat with Asfandiyar. (See *Isfendiyar.*) Zal, father of Rustam, had by a slave a son, Shaghad, who, the astrologers said, was to be the ruin of his race. This Shaghad, becoming the son-in-law of the King of Kabul, was irritated at the annual tribute of a cowskin paid by Kabul to Zabul, and by a ruse drew Rustam and a hundred knights to Kabul, where they were lured into a hunting-park in which had been dug concealed trenches filled with javelins. Raksh sank into one of these. Rustam came up wounded unto death, but before his death was able to pierce with an arrow the treacherous Shaghad.

Rutebœuf (rüt-bef'). Born probably about 1230: died about 1280. A French trouvère of the 13th century. Very little is known concerning him beyond what may be gathered from his own writings. Gaston Paris passes the following judgment on his works: "The Parisian poetry of Rutebœuf is semi-popular in form. It stands by itself in subject-matter and inspiration. The poet celebrates the events and the people of note in his day, or he interests himself keenly in the dissensions existing between the church and the University of Paris; or again, and this is most frequently the case, he relates his own troubles in his humble clerkship where he depends for the support of his family upon either the favor of the nobles or public charity." Besides being a caustic satirist, Rutebœuf wrote a number of fableaux, among others "Charlot le Juif," "L'Âme du vilain," "Frère Denise," and "Le testament de l'âne"; he is also the author of the poetic compositions "Notre-Dame," "La voie de Paradis," "Le miracle de Théophile" (a sort of miracle-play which might be said to contain the germ of Calderon's "El Magico Prodigioso," and thus remotely of Goethe's "Faust"—*Lowell*), "Sainte-Marie l'Égyptienne," "Sainte-Élisabeth de Hongrie," etc.

Ruthwell Cross. See the extract.

> Among the remains of the Northumbrian Saxon is the runic writing combined with sculpture from sacred subjects and Latin inscriptions upon the stone obelisks at Ruthwell, on the Scottish border—an obelisk or cross that was flung down by the Presbyterians in 1642, and had part of its writing then effaced. The Ruthwell runes had been misread by Repp and Professor Finn Magnusen as half Danish or as some perfectly new language, and they were first rightly interpreted by John Mitchell Kemble, in a paper on Anglo-Saxon Runes read to the London Society of Antiquaries, as an inscription in what was the English of Northumbria during the seventh, eighth, and ninth centuries. Mr. Kemble then pointed out that they set forth a few couplets of a religious poem on the events sculptured in the two principal compartments of the stone, namely, the washing of our Saviour's feet by Mary Magdalene and the glorification of Christ through His Passion. The correctness of his interpretation was afterwards proved by the discovery of lines similar to those read by him in one of the poems of the Vercelli Book.

Sadducees (sad'ū-sēz). A religious and political party in Judea in the last centuries of its existence as a Jewish state. They were the rivals of the Pharisees. The name is probably derived from Zadok, one of the leaders of the party. The Sadducees were recruited from among the aristocracy and the wealthy class, and formed the following of the Hasmonean princes. From them the officers of the state and army were taken. Contrary to the Pharisees, they placed secular interests above those of religion. They did not absolutely reject the tradition and the oral law, but considered only the ordinances which appeared clearly expressed in the Pentateuch as binding, regarding the traditional precepts as subordinate. In like manner they did not exactly deny the immortality of the soul, but repudiated the idea of judgment after death. Owing to this tenet and to their liberal interpretation of the Mosaic code, they were very rigorous in the administration of justice. In the last struggle of Judea for independence, the Sadducees mostly sided with Rome. After the fall of Jerusalem, they vanish from history.

Sadi (sa-dē'). [Pers. *Sa'di*.] One of the most celebrated Persian poets. His real name was Shaikh Muslihu'd-Din. Sadi being a nom de plume said to be taken from the king Sad ben Zangi, and so meaning 'the Sadyan.' He was born and died at Shiraz, and lived, it is said, 1190–1291 A. D.; but there is great uncertainty as to these dates, as also with regard to many statements concerning his life. He is said to have been educated at Bagdad, to have made the pilgrimage to Mecca 15 times, and to have traveled in parts of Europe and in all the countries between Barbary and India. When near Jerusalem he was captured by the Crusaders and forced to work upon the fortifications of Tripoli, but was ransomed by a citizen of Aleppo, sometimes described as a chief, sometimes as a merchant, who married him to a beautiful but termagant daughter. After her death he married again and unhappily. His son and daughter were children of the first wife. The son died in infancy; the daughter lived to become the wife of the poet Hafiz. Sadi is honored as a saint, and his tomb near Shiraz is still visited. He wrote many works in both prose and verse and in both Arabic and Persian, and Garcin de Tassy declares that he was the first poet who wrote in Hindustani. Among his writings are a divan, or collection of odes, the "Gulistan" ("Rose-Garden"), "Bustan" ("Tree-Garden"), and "Pandnamah," or "Book of Counsel." (See *Gulistan*, *Bustan*.) Elegance, simplicity, and wit are Sadi's chief merits. The first complete edition of his works was that of Harrington (Calcutta, 1791–95). The "Gulistan," first edited with a Latin translation by Gentius (Amsterdam, 1651), has been translated into English by Eastwick in Trübner's Oriental Series; the "Bustan" by Davie (London, 1882).

He began his studies in his native city, and completed them in Paris at the colleges Charlemagne and Bourbon. On graduation he took a course in medicine, but gave it up a year later as uncongenial. A few book-reviews brought him favorably into notice in literary circles. Among the many friends he made there was Victor Hugo. In 1827 he con-

peted without success for a prize offered by the French Academy for a dissertation on the subject "Tableau de la poésie française au XVI^e siècle." An improved edition of this work appeared in 1843, and is considered an authority on the subject and period in question. He was also a contributor to "La Revue de Paris," "La Revue des Deux Mondes," "Le Constitutionnel," "Le Moniteur," and "Le Temps." The revolution of 1830 developed the political instinct within him, and he became closely connected with "Le Globe" and "Le National." His early work embraces some collections of poems, "Poésies de Joseph Delorme" (1829), "Consolations" (1830), and "Pensées d'août" (1837); also a novel, "Volupté" (1832). Of a more serious nature are "L'Histoire de Port-Royal" (1840–1842), and "Châteaubriand et son groupe" (1849). His contributions to periodicals include most of his work as a critic. These so-called "Portraits" and "Causeries" have since been collected, and constitute his strongest claim to literary recognition. They are published as "Portraits littéraires" (1st series, 1832–39; 2d series, 1844), "Portraits de femmes" (1844), "Portraits contemporains" (1846), "Causeries du lundi" (1851–57), "Nouveaux lundis" (1863–72), "Premiers lundis" (1875). In 1845 Sainte-Beuve was elected to the French Academy. He gave a series of lectures on literary subjects at Lausanne in 1837, and at Liège in 1848. For a brief period thereafter he filled the chair in Latin poetry at the Collège de France. His last work as an educator was done in connection with the lectureship he held at the École Normale 1857–61. He was made senator in 1865.

Sainte-Chapelle (saṅt′shä-pel′). [F., 'holy chapel.'] A chapel in Paris, built by St.-Louis as the chapel of his palace, and to receive and enshrine a precious relic—the crown of thorns—preserved in the treasury of the Byzantine emperor. Baudouin (Baldwin), son-in-law of the Emperor of Constantinople, Jean de Brienne, and his designated successor, had bound himself during a visit to Paris to secure this relic for Louis IX. On his return to Constantinople he found the emperor dead, the crown of thorns in pawn with the Venetians, and the treasury without money to redeem it. St.-Louis paid the required ransom (about 100,000 francs, present value), and the relic was sent to him. It arrived Aug. 18, 1239, and was deposited at Vincennes, whence it was carried with great pomp by the king himself to Notre Dame. It was afterward placed in the Chapel of St. Nicholas, then the chapel of the palace. Sainte-Chapelle was then built, and consecrated April 25, 1248. It is now that of the Palais de Justice. It is the most perfect example of its type produced during the best period of Pointed architecture. It consists of two chapels, one below the other. The lower chapel was dedicated to the Virgin, has nave and narrow aisles, and is in itself architecturally remarkable. The upper chapel, 36 by 115 feet, is vaulted in a single span 66 feet high. Almost the entire wall-space is occupied by the great traceried windows, which are all filled with 13th-century glass of indescribable richness of color. The Flamboyant rose-window which occupies the entire upper half of the west end was inserted in the 15th century in place of the original window. All the stonework of the interior is decorated in gold and brilliant color, and there is much delicate sculpture. Beneath the windows is a range of arcades whose quatrefoils are filled with illuminations representing martyrdoms. The graceful wooden tabernacle at the east end is of the 13th century. The upper chapel was built to receive the crown of thorns and other relics. Before the west end there is a two-storied arcaded porch.

St. John Lateran. [It. *San Giovanni in Laterano.*] A famous church in Rome, "the mother and head of all churches." The original basilica, erected by Constantine in the palace of the Lateran (which see), was destroyed by an earthquake in 896. It was rebuilt, and was twice destroyed by fire (1308, 1360), and at various times remodeled. Extensive changes were made in the latter half of the 16th century. The present classical front is of the 18th century; the heavy Renaissance ornaments of the nave, mostly in stucco, date from 1644. The flat wooden roof is richly coffered. The beautiful 13th-century cloisters have round arcades, slender coupled columns, and mosaics. The octagonal baptistery was founded by Constantine, and is essentially unaltered; it possesses a much-revered font and beautiful old mosaics.

If it could be ascertained at what period in the life of Constantine these churches were built, some light might be thrown on the history of his personal religion. For, the Lateran being an imperial palace, the grant of a basilica within its walls for the Christian worship (for such we may conjecture to have been the first church) was a kind of direct recognition, if not of his own regular personal attendance, at least of his admission of Christianity within his domestic circle. The palace was afterwards granted to the Christians, the first patrimony of the popes.

The spire (235 feet high) is especially admired, and has been pronounced the most graceful in outline and appropriate in details erected since the medieval period.

Stow, usually very clear, rather contradicts himself at once about the origin of the name of the church. In one place he says it was so called because it was the first London Church built on arches; and elsewhere he says it took its name from certain stone arches supporting a land on the top of the tower. The latter is more probably the true derivation, for St. Paul's could also boast its arched crypt. *Walford and Thornbury,* London, I.

St. Paul's (pâlz). A cathedral in London, begun 1675, according to the designs of Sir Christopher Wren, in place of the old cathedral of the 11th–13th centuries, which was destroyed in the great fire of 1666. Old St. Paul's was a very notable church, 590 feet long, and with a 14th-century wooden central spire 460 feet high. The existing cathedral was first used for divine service in 1697, and was completed in 1710, the cost being about $3,500,000. In plan and architecture it is akin to St. Peter's at Rome, but only one half as great in area, and relatively longer and narrower. Its dimensions are 500 by 118 feet; length of transepts, 250; inner height of dome, 225; height to top of cross, 364; diameter of dome, 112 feet—the diameter of that of St. Peter's being 139½ feet, and of the Pantheon 143. The exterior is classical, with two stories; the front and transepts are pedimented, and the former is flanked by bell-towers. The upper story on the sides is merely a mask, the actual structure of lofty nave and low aisles being the same as in a medieval cathedral. The dome is magnificent: it is perhaps the most imposing in existence. Its drum is surrounded by a range of Corinthian columns, and it is surmounted by a lantern. The interior is impressive from its size, and is not dwarfed like St. Peter's by disproportionate size of its classical details; but its decoration is far from finished, and the effect is bare and cold. The vaulted crypt, like the church itself, contains many tombs of famous men. The modern reredos, in the Italian Renaissance style, is elaborately sculptured.

The flat wooden ceiling is elaborately carved. The main cloister is a beautiful work of the 13th century, with round arcades and coupled columns in great variety.

St. Peter's (pē'tėrz). The metropolitan church of the Roman see. The ancient basilica had become ruinous in 1450, and it was decided to replace it. Little was accomplished until 1506, when the carrying out of the plans of Bramante was begun. Advance was slow until 1534, when Michelangelo's designs were substituted; but the dome was not completed until 1590, and the basilica was dedicated only in 1626. The plan is a Latin cross, 613½ by 446½ feet, with rounded apse and transepts, and a vestibule. The height of the nave is 152½ feet, its width 87½. The interior diameter of the dome is 139½ feet, its height to the top of the cross 448. The architecture is heavy pseudo-Roman, all the members being of such huge size that much of the natural effect of magnitude is lost. The interior is lavishly decorated with stucco ornament and gilding, with colossal statues of saints. The pedimented dome, resting on its four enormous piers, is one of the most magnificent achievements of architecture. The high altar is canopied with a bronze baldacchino 95 feet high, with spiral columns. Parts of the walls and vaults are covered with mosaics. There are many papal and princely tombs rich in statuary, some of it fine. The spacious crypts are in part of the time of Constantine, and contain many interesting memorials and art works.

St. Petersburg. [F. *Saint-Pétersbourg*, G. *Sankt-Petersburg*, *Petersburg*, Russ. *Sanktpeterburg*, *Peterburg.*] The capital of the Russian empire, situated in the government of St. Petersburg, at the mouth of the Neva, in lat. 60° N., long. 30° 19' E. It stands partly on the mainland and partly on low islands formed by the mouths of the river. It is the largest city in the empire, and the fifth in population of Europe; has important manufactures, including cotton, leather, glass, porcelain; and has extensive commerce, foreign (directly and through Kronstadt) and internal, by its system of railways and by the Neva and its connections. St. Isaac's Cathedral is a building of Renaissance style, imposing from its size (364 by 315 feet) and the magnificence of its materials: completed after the middle of this century. The plan is a Greek cross crowned by a fine dome 336 feet high, with lantern and cross. From each face projects an octastyle Corinthian portico with columns 60 feet high, the shafts monoliths of polished granite, and the capitals of bronze. The pediments are filled with sculpture in bronze. The huge doors are of bronze covered with reliefs. In the interior the iconostasis is adorned with remarkable columns of malachite, over 30 feet high, and its royal doors are flanked by great pillars of lapis lazuli. The Kazan cathedral is in plan a Latin cross with hexastyle porticos before the nave and transepts, and an apsidal chevet. Though one third smaller than St. Isaac's, it is still an imposing structure. The chief entrance, which is in the north transept, is preceded by curved porticos of admirable effect, in imitation of those of St. Peter's, Rome. The dome rests on 4 piers from which extend 4 fine double ranges of columns with granite shafts and bronze capitals and bases. The iconostasis is of silver, from the spoils of Napoleon I.; the cathedral contains many other martial trophies. The Cathedral of St. Peter and St. Paul, in the fortress, has been since the foundation of St. Petersburg the mausoleum of Russian sovereigns. In plan it is rectangular, 3-aisled, 98 by 210 feet; it is rococo in style and crowned by a slender pyramidal spire, of Dutch design, 302 feet high, covered with gilded copper. The imperial tombs are interesting, and the icons and other church ornaments of extreme richness. The interior contains a great number of warlike trophies. The palace of the grand duke Michael,

built 1820, is architecturally the finest palace in St. Petersburg, and of a stateliness and harmony of design which would command attention anywhere. The garden front presents long ranges of Corinthian columns resting on a single story of rusticated masonry, the total height being 87 feet. The 12 columns of the central portion stand free, forming a portico. At each end a pavilion projects slightly, and is adorned by six engaged columns surmounted by a pediment. The opposite front is of varied but kindred disposition. The entrance-hall, with the grand staircase, is 80 feet square, and all the interior arrangements are at once appropriate and magnificent. The cottage of Peter the Great, built by the czar in 1703, and inhabited by him during the building of St. Petersburg, is carefully preserved as a memorial, and contains many relics of Peter. It is 20 by 55 feet, of wood, with 2 rooms and a kitchen. The czar's bedroom is now arranged as a chapel. The Moscow gate, a fine triumphal arch in a neo-Greek style, was erected in 1838 in commemoration of Russian victories in Poland, Turkey, and Persia. Twelve columns, 68 feet high and 17 in diameter, support an attic which bears 12 angels in relief and inscriptions. Other objects of interest are the winter palace, Hermitage (which see), Anitchkoff palace, Nikolai and Alexander bridges, equestrian statue of Peter the Great, and Alexander column. The Nevskii Prospekt is the principal street. The city is the seat of the imperial library (over 1,000,000 vols.), Academy of Sciences (with rich collections), Academy of Arts, various museums, military, mining, naval, medical, and other schools, and learned societies. The university, founded in 1819, has faculties of history and philosophy, physics and mathematics, law, and Oriental studies, and is attended by about 3,000 students. The winter is long and the climate unhealthy. St. Petersburg was founded by Peter the Great in 1703, and thousands were compelled by the emperor to remove their residences to it. It was largely developed by Catharine II., Alexander I., and Nicholas. Population (1897), 1,267,023.

St. Peter's College, or **Peterhouse** (pē'tėr-hous). The oldest college of Cambridge University, England, founded as a hospital in 1257 and as a college 1280–86 by Hugh de Balsham, bishop of Ely, and named from the parish church of St. Peter, which was at first used by the scholars for their devotions. Saint-Simon (saṅ-sē-môṅ'; Anglicized sānt sī'mon), **Claude Henri, Comte de.** Born at Paris, Oct. 17, 1760: died there, May 19, 1825. A French philosopher, the founder of French socialism. He came of an ancient and noble though impoverished family, studied under D'Alembert, and served as a volunteer in the American Revolution. He was prevented by his aristocratic birth from playing a prominent part in the French Revolution (being indeed for a time imprisoned), but accumulated a fortune by speculating in confiscated lands, and devoted himself to the study of philosophy. The latter years of his life were spent in poverty, his fortune having been wasted in costly experiments. His first work, "Lettres d'un habitant de Genève à ses contemporains," appeared in 1802; but it was not until 1817 that a distinct approach to a system of socialism was made in "L'Industrie." The fullest exposition of his socialistic views, which are frequently confused and contradictory, is that given in his "Nouvean Christianisme" (1825). These views were developed by his disciples into the complete system known as St.-Simonism. "According to this system the state should become possessed of all property; the distribution of the products of the common labor of the community should not, however, be an equal one, but each person should be rewarded according to the services he has rendered the state, the active and able receiving a larger share than the slow and dull; and inheritance should be abolished, as otherwise men would be rewarded according to the merits of their parents and not according to their own. The system proposes that all should be occupied alike, but differently, according to their position and capacity, the labor of each being assigned to grades in a regiment, by the will of the directing society." (*J. S. Mill*, Polit. Econ., II. i. § 4.) Among his works are "De la réorganisation de la société européenne" (1814), "L'Organisateur," "Système industriel," and "Catéchisme des industriels" (1824).

The registers of the university, which begin back of the assigned date for such council, have been examined in vain for any reference to it. *Winsor*, Christopher Columbus, p. 162.

The plan has a square chevet with projecting Lady chapel, double transepts, and long nave. The west front, while lacking the clearness and structural propriety of French designs, is a notable work: it is flanked by low towers, and possesses 3 canopied portals, the central one triple. The wall-space and that of the towers is covered with six bands of arcades and quatrefoils, the arcades containing ranges of statues. The capital exterior feature is the superb central tower and spire (406 feet high). The interior is excellently proportioned, with graceful arches and pillars but sober decoration. There is a rich modern metal choir-screen of openwork, and there are a number of fine medieval tombs. The dimensions of the cathedral are 473 by 99 feet; length of west transepts, 230; height of nave-vaulting, 81. The very large 13th-century cloister is of great beauty, and the octagonal chapter-house, vaulted from a central clustered column and arcaded below the windows, is admirable. Population (1891), 15,980.

Salvador (säl-vä-ᵺôr'). [Sp. *República del Salvador;* incorrectly *San Salvador* from its capital.] The smallest but most thickly populated of the Central American republics, lying between Guatemala on the northwest, Honduras on the north and northeast, Nicaragua on the east (separated by the Gulf of Fonseca), and the Pacific Ocean on the south. The surface is traversed by several mountain-chains with intervening fertile valleys and plains: there are many active or quiescent volcanoes, and earthquakes are frequent. The principal products and exports are coffee, indigo, sugar, and balsam of Peru; the manufactures are unimportant. About 5 per cent. of the inhabitants are whites of Spanish descent; the remainder are Indians (55 per cent.), mixed races (40 per cent.), and a few negroes. Spanish is the common language, and the prevailing religion is the Roman Catholic. The government is a centralized republic: the president is elected for 4 years, and congress consists of a single house, the members elected for one year. The territory of Salvador was invaded by Pedro de Alvarado 1524, and conquered by Jorge de Alvarado 1528. Independence was proclaimed in 1821, and from 1823 to 1839 the country was a state of the Central American Union. Since then there have been frequent revolutions and wars with the other Central American republics. The present constitution dates from 1886. Area, 7,225 square miles. Samuel (sam'ū-el). [F. *Samuel*, It. *Samuele*, D. G. *Samuel*, LL. *Samuel*, Gr. *Σαμουήλ*, Heb. *Shemuēl.*] A Hebrew prophet. He was the son of Elkanah and Hannah, of the tribe of Ephraim (according to 1 Chron. vi. 27, 34, of the tribe of Levi), and grew up in the sanctuary of Shiloh, under the eyes of the high priest Eli. In his early youth he felt himself called to the exalted vocation of prophet, and obtained a place in the history of Israel second only to that of Moses. He was the preserver of the work of Moses, reuniting the people and averting the threatening decay and internal corruption. After the fall of the sanctuary of Shiloh and the defeat of Israel by the Philistines, Samuel rallied the people in Mizpah (modern Nebi Samwil), renewed the covenant with Jehovah, and repelled the Philistines. He thus became the religious and political reformer of Israel. To spread a healthy and pure religious life in Israel, he established the so-called "Schools of Prophets," a special feature of which was the cultivation of sacred poetry and song. His sons Joel and Abijah shared with Samuel the management of the affairs of the people. They were disliked, being accused of misusing their power. In addition to this, need for a leader in case of war became more and more felt. This resulted in the demand by the people for Samuel to place a king at the head of the Israelite community. With a heavy heart the aged prophet acceded to the wish of the people, in which he saw the loss of their liberty and independence, and anointed Saul. Saul's disobedience in the war against Amalek caused a rupture between the prophet and himself, and his virtual deposition. Later he anointed David as king, and this is the last act recorded of him. He died at an advanced age in Ramah. The time of his activity falls at the end of the 12th and the beginning of the 11th century B. C. The books of Samuel owe their title to the circumstance that they begin with the history of the prophet: they were not composed by him, nor does his history form the chief part of their contents. Like the books of Kings, the books of Samuel formed originally one book: the division was introduced in the old Greek and Latin versions. The books of Samuel comprise the history of Israel from the birth of Samuel to the death of David (which, however, is not distinctly recorded in the book)—*i. e.*, a period of more than 100 years. The first book relates the birth of Samuel, the establishing of the monarchy in Israel, and the conflict between Saul and David, closing with the death of Saul. The second book gives the history of David's reign.

At first he is introduced as the opposite of Don Quixote, and used merely to bring out his master's peculiarities in a more striking relief. It is not until we have gone through nearly half of the First Part that he utters one of those proverbs which form afterwards the staple of his conver-

sation and humor; and it is not till the opening of the Second Part, and, indeed, not till he comes forth, in all his mingled shrewdness and credulity, as governor of Barataria, that his character is quite developed and completed to the full measure of its grotesque, yet congruous, proportions. *Ticknor*, Span. Lit., II. 146.

Sanchuniathon (san-kū-nī'ą-thon), or **Sanchoniathon** (san-kō-nī'ą-thon). [Gr. Σαγχουνιάθων, Σαγχωνιάθων, Σαγχωνιαίθων, said by Movers to mean 'the whole law of Chon,' and thus the name, not of a person, but of a collection of writings.] An (alleged) ancient Phenician writer, said to have lived before the Trojan war, whose works (founded upon records preserved in the temples) Philo Byblius pretended to have translated.

Great importance is usually attributed to the so-called fragments of Sanchoniathon. It is well known that in Eusebius there are complete extracts of a Phœnician history written by a certain Philo of Byblos who lived in the first and second centuries A. D. This Philo of Byblos is said to have translated his history from the Phœnician original of a certain Sanchoniathon. But now the question remains, did this ancient Phœnician document ever exist, or did Philo only wish to cover his own work by the authority of an ancient, more or less mythical, name? This last opinion was formerly maintained by Movers, and quite lately defended with important arguments by Baudissin. This opinion is supported by the strong syncretistic and euhemeristic tendency of the fragments, which betray far too much knowledge of Egyptian, Greek, and perhaps even Persian ideas to be regarded as reliable statements as to the original form of the Phœnician religion.

Sand (sońd; E. sand), **George:** nom de plume of **Armandine Lucile Aurore Dupin,** Baroness **Dudevant.** Born at Paris, July 5, 1804: died at Nohant, Indre, June 8, 1876. A noted French novelist and playwright. Her early life was spent in the quiet of her grandmother's country house, and in 1817 she entered the Couvent des Dames Anglaises in Paris, where she remained till 1820. Her marriage with Baron Dudevant, a retired army officer, was celebrated in 1822. Their union, although blessed with two children, was not happy, and in 1831 she went to Paris with Jules Sandeau in search of a life of independence born of literary work. Her first writing was done in collaboration with Jules Sandeau, and was signed jointly "Jules Sand." On St. George's day, Sandeau urged her to work on her own account and receive the full credit due her. From this concourse of circumstances arose her nom de plume. Embracing the views of advanced republicanism, she mingled freely in politics: she published a couple of open letters, and made prefatory remarks, at the request of Louis Blanc, to his "Histoire de la révolution française" (1847), and also to the official "Bulletins de la république." At various times she contributed to "La Revue Indépendante" and "La Commune de Paris," and in 1848 she even started a newspaper of her own, "La Cause du Peuple." The preface to a work with socialistic tendencies, "Les conteurs ouvriers" (1849), was written by her, and under the title "République et royauté en Italie" (1850) she published a translation of a book by the celebrated Italian revolutionist Joseph Mazzini. But her best work is in her novels, as for instance in "Indiana" (1831), "Valentine" (1832), "Lélia" (1833), "Le secrétaire intime" (1834), "Jacques" (1834), "Mauprat" (1836), "Consuelo" (1842), "François le Champi," "La mare au diable," "La petite Fadette" (1846–48), "Les maîtres sonneurs" (1853), "Mont-Revêche" (1855), "Elle et lui" (1858) (which called out De Musset's "Lui et elle"), "L'Homme de neige" (1859), "Jean de la Roche" (1860), "Mlle. de la Quintinie" (1864), "Pierre qui roule" (1869), "Nanon" (1872), etc. Most of these books appeared first in serial form in "La Revue des Deux-Mondes." Of the above, "Le secrétaire intime" and "Elle et lui," and also another work, "Lettres d'un voyageur" (1830–36), deal with the period of George Sand's intimacy with Alfred de Musset. The great novelist herself dramatized her story of "François le Champi" in 1849; most of her plays, however, were written direct for the stage, and include "Claudie" (1851), "Le pressoir" (1853), and many others.

Sand, Maurice. The pseudonym of Maurice Dudevant, the son of George Sand.

Sandabar (sen-de-bär'). The Mishle Sandabar, 'Parables of Sandabar,' are a medieval collection of tales in Hebrew. They are substantially the same book as the Greek "Syntipas, the Philosopher," and the Arabic "Romance of the Seven Vizirs." The name *Sandabar* is supposed (Keith-Falconer's "Bidpai's Fables," p. lxxii.) to come from a misreading of the unpointed Arabic name *Baidaba* (the Sanskrit *vidyapati*, 'lord of wisdom'), which has become *Bidpai* and *Pilpay*. *Baidaba* may have had in an earlier form a final *d* to represent the *t* of *pati*: thus, when misread, yielding the form *Sandabad* (pron. sen-de-bä'd), which also occurs. As written in Hebrew the final *d* might be confounded with *r*, thus giving the form *Sandabar*. The "Parables of Sandabar" must not be confounded with the Hebrew versions of the Arabic "Kalilah and Dimnah." See "Paraboles de Sendabar, traduites de l'Hébreu par E. Carmoly," Paris (1849); "Syntipas. De Syntipa et Cyri filio Andreopuli narratio edita a Boissonade," Paris (1828); and for the "Seven Vizirs," "Tales, Anecdotes and Letters," translated from the Arabic and the Persian by Jonathan Scott, Shrewsbury (1800); also Comparetti, "Researches Respecting the Book of Sindibad" publication ix. of the Folk-lore Society; and "Sindban oder die 7 weisen Meister. Syrisch u. deutsch von Fr. Baethgen," Leipsic (1879).

The famous collection which in the East went under the title of *Sendabad* was translated into Latin at least early in the 13th century, and became very popular in almost every language of Western Europe under the name of the Romance of the Seven Sages. *T. Wright*, Essays, II. 60.

In 1853 he was made librarian of the Mazarin Library, and curator in 1859. He wrote, under the joint nom de plume "Jules Sand," in collaboration with George Sand, the novel "Rose et Blanche" (1831). Independently he wrote the novel "Marianna" and others. Sankhya (säṅ′khyạ). [Skt.: from *saṅkhyā*, 'reckoning, enumeration,' comes the adjective *sāṅkhya*, 'relating to number, reckoning, calculating,' of which *Sāṅkhya* is the masc. or neuter sing. used substantively in the sense of the primitive.] The third of the six systems of Hindu philosophy, ascribed to the sage Kapila. It repudiates the notion that matter can originate from spirit, and that anything can be produced from nothing. Instead of an analytical inquiry into the universe as existing, it proceeds synthetically, starting from an original primordial tattva, or 'eternally existing essence,' called prakriti, a word meaning in philosophy 'that which evolves or produces everything else.' Beginning with this original, eternal germ, the Sankhya reckons up (whence its name) 23 other tattvas or 'entities,' all productions of the first and evolving themselves spontaneously out of it. Of these 23, 7 are produced and producers, whence come 16 productions. The 7 are (1) intellect (buddhi), (2) self-consciousness (ahankara, the "I-making" faculty), (3) five principles called tanmatras ("subtle elementary particles"). The 16 are the 5 mahabhuta or grosser elements (viz., ether, air, fire or light, water, and earth, these being produced by the tanmatras), followed by the 11 organs produced by the ahankara (viz., 5 organs of sense and 5 organs of action, together with an 11th, standing between the two sets, called manas, 'mind,' an internal organ of perception, volition, and action). Purusha, 'the soul,' is the 25th entity. It is neither producer nor produced, but eternal like prakriti, and quite distinct from the produced and producing elements of the phenomenal world. The 8 producers, the 5 grosser elements, and the 11 organs constitute the phenomenal world; but as ahankara or 'self-consciousness' is after prakriti the most important producer, the whole world of sense is, according to the Sankhya, practically created by the Ego. Prakriti again is viewed as constituted of 3 principles in equipoise called gunas, 'qualities,' viz. goodness or purity, passion or activity, and darkness or ignorance. As the ingredients of prakriti they affect all that is evolved from it. The ethical end of the Sankhya system is to effect the liberation of the purusha or 'soul' from the fetters in which it is involved by union with prakriti. This is done by prama or 'correct knowledge of the 24 constituent principles of creation, and discriminating the soul from them, its pramanas, or 'means of obtaining the correct measure of existing things,' being 3—viz., sense-perception, inference, and credible assertion or trustworthy testimony. Some adherents of the Sankhya maintain the existence of a supreme soul called Hiranyagarbha. The Sankhya proper not so much denies the existence of a supreme being as ignores it as incapable of dialectical demonstration. "He must be free from desires and not bound by troubles," say in substance the 92d and following aphorisms. "If he were free from desires, he could have no wish to create. If he were bound by desires of any kind, he would be under bondage and deficient in power."

Sappho (saf'ō). [Gr. Σαπφώ, F. *Sapho,* It. *Saffo.*] A Greek lyric poet who flourished about 600 B. C. She appears to have been a native of Mytilene, in Lesbos, where she probably spent her life. According to Suidas, her father's name was Scamandronymus, her mother's Cleïs. She had a brother, Larichus, who in his youth acted as cup-bearer in the prytaneum of Mytilene, an office assigned only to beautiful youths of noble birth. Another brother, Charaxus, a merchant, became enamoured of the courtezan and slave Doricha, surnamed Rhodopis, at Naucratis, in Egypt, and purchased her freedom at an immense price. So much is known of the brothers from Sappho's poems. She also mentions a daughter, named Cleïs. Her husband's name is said to have been Cercolas or Cercylas of Andros. She was a contemporary of Alcæus, with whom she maintained friendly relations, and with whom she shared the supremacy of the Æolian school of lyric poetry. She appears to have given instruction in the art of versification, and to have been the center of a literary coterie of women. There is no foundation for the story that she threw herself from the Leucadian promontory into the sea, out of love for a beautiful youth, Phaon, who disdained her advances. She wrote nine books of lyric poems, all of which are lost except an ode to Aphrodite and a number of fragments. She was called "the tenth Muse."

Among the ancients Sappho enjoyed a unique renown. She was called "The Poetess," as Homer was called "The Poet." Aristotle quoted without question a judgment that placed her in the same rank as Homer and Archilochus. Plato, in the Phædrus, mentioned her as the tenth Muse. *Symonds,* Studies of the Greek Poets, I. 309.

The Saracens conquered Syria, Palestine, Persia, and Egypt between 634 and 641; completed the conquest of northern Africa in 709; invaded Spain in 711, and soon conquered it; invaded France, and were overthrown at Poitiers in 732. Their subsequent conquests included that of Sicily in 827–878. The disruption of their realm began with the establishment of the kingdom (later caliphate) of Cordova in 756.

[Skt., 'rich in waters.'] **1.** In the Rigveda, the name of a mighty river emptying into the sea (conjectured by Roth to be the Indus), and of its genius, who protects the dwellers upon its banks, and bestows upon them blessings of every kind. Roth regards Sarasvati as the special and sacred Sindhu as the general and profane, name of the stream, and thinks that its name and sacred attributes were transferred in later times to the little river in Madhyadesha, to which in his opinion the description in the Rigveda cannot with probability be applied.

2. Several times in the Rigveda, and very often in the later literature, a little river, regarded as sacred, that with the Drishadvati forms the boundaries of Brahmavarta, and is lost in the sand, but at last, according to the view of the Hindus, running on under the earth, unites itself with the Ganges and the Jumna. Muir ("Original Sanskrit Texts," V. 337–343) refers the name only to the latter river, and explains the development of the idea of the goddess. The region between the Sarasvati and the Drishadvati, called Brahmavarta, having long been a stronghold of Brahmanic culture, the Sarasvati became to the early Indians what the Ganges has been to their descendants; hence the Sarasvati personified became the patroness of sacrifice, and was imagined to have a part in the composition of the hymns and so identified with Vach, the goddess of speech. As Brahma is essentially in origin the personification of the Brahmanic order and of Brahmanism, Sarasvati is Brahma's wife.

Sardou (sär-dō′), **Victorien.** Born at Paris, Sept. 7, 1831. A noted French dramatist. His extreme poverty as a young man compelled him to give up his medical studies. In 1854 he wrote a play, "La taverne des étudiants," which proved a complete failure. Discouraged and broken down in health, he fell dangerously ill. He was cared for by a charitable neighbor, Mademoiselle de Brécourt, whom he subsequently married, and who was largely instrumental in restoring his enthusiasm for dramatic writing. A fortunate introduction into theatrical circles enabled him to place his plays: his first success may be said to date from his productions of "M. Garat" and "Les prés Saint-Gervais" (1860–61). Among his numerous plays are the comedies "Les pattes de mouche" (1861), "Nos intimes" (1861), "La famille Benoîton" (1865), "Les bons villageois" (1866), "Maison neuve" (1866), "Ferréol" (1875), "Dora" (1877), "Daniel Rochat" (1880), "Divorçons" (1880), "Odette" (1881), "Georgette" (1885), "Marquise" (1889), and "Belle-Maman" (1889). He is also the author of "Rabagas" (1871), a political satire; "L'Oncle Sam" (1873), a satire on American society; "Les bourgeois de Pont-Arcy" (1878); "Fédora" (1882); "Le crocodile" (1886); and "Madame Sans-Gêne" (with others, 1894). Sardou has acquired reputation for a more serious style of work, as "Patrie" (1869), "La haine" (1874), and "Théodora" (1884), "La Tosca" (1887), "Cléopâtre" (1890), "Thermidor" (1891). The accusation of plagiarism has repeatedly been brought against Sardou: for instance, "Les pattes de mouche" has been said to be based on "The Purloined Letter" by Edgar Allan Poe; "L'Oncle Sam" to have been borrowed from Alfred Assollant's "Scènes de la vie des Etats-Unis" (1858), etc. In addition to winning cases of this kind before the courts, Sardou wrote "Mes plagiats" (1883) in refutation of such attacks. He was elected to the French Academy June 7, 1877.

Satire Ménippée (sä-tēr' mā-nē-pā'). A French political satire (in prose and verse) which appeared in 1594, and was directed against the

League. It was written by 7 men (Leroy, Gillot, Passerat, Rapin, Chrestien, Pithou, and Durant), most of them lawyers.

The plan of the [Satire] Ménippée (the title of which, it is hardly necessary to say, is borrowed from the name of the cynic philosopher celebrated by Lucian) is for the time singularly original and bold; but the spirit in which the subject is treated is more original still. Generally speaking, the piece has the form of a *compte-rendu* of the assembly of the states at Paris. The full title is "De la Vertu du Catholicon d'Espagne et de la Tenue des États de Paris." The preface contains a sarcastic harangue in orthodox charlatan style on the merits of the new Catholicon or Panacea. Then comes a description (in which, as throughout the work, actual facts are blended inextricably with satirical comment) of the procession of opening. To this succeeds a sketch of the tapestries with which the hall of meeting was hung, all of which are, of course, allegorical, and deal with murders of princes, betrayal of native countries to foreigners, etc. Then comes "L'Ordre tenu pour les Séances," in which the chief personages on the side of the League are enumerated in a long catalogue, every item of which contains some bitter allusion to the private or public conduct of the person named. Seven solemn speeches are then delivered by the Duke de Mayenne as lieutenant, by the legate, by the Cardinal de Pelvé, by the Bishop of Lyons, by Rose the fanatical rector of the University, by the Sieur de Rieux as representative of the nobility, and, lastly, by a certain Monsieur d'Aubray for the Tiers-État. A burlesque *coda* concludes the volume, the joints of which are, first, a short verse satire on Pelvé; secondly, a collection of epigrams; and, thirdly, Durant's "Regret Funèbre à Mademoiselle ma Commère sur le Trépas de son Âne," a delightful satire on the Leaguers, which did not appear in the first edition, but which yields to few things in the book. *Saintsbury*, French Lit., p. 259.

Saturn (sat'ėrn). [L. *Saturnus*.] **1.** An ancient Italic deity, popularly believed to have appeared in Italy in the reign of Janus, and to have instructed the people in agriculture, gardening, etc., thus elevating them from barbarism to social order and civilization. His reign was sung by the poets as "the golden age." He became early identified with the Cronus of the Greeks. Ops, the personification of wealth and plenty, was his wife, and both were the especial protectors of agriculture and of all vegetation. **2.** The most remote of the anciently known planets, appearing at brightest like a first-magnitude star. It revolves in an orbit inclined 2½° to the ecliptic. Its mean distance from the sun is 9½ times that of the earth, or 883,000,000 miles. Its sidereal revolution occupies 29 Julian years and 167 days; its synodical, 378 days. The eccentricity of the orbit is considerable, the greatest equation of the center being 6°.4. Owing to the fact that the period of Saturn is very nearly 2½ times that of Jupiter, these planets exercise a curious mutual influence, analogous to that of one pendulum upon another swinging from the same support. Since 1790, when in consequence of this influence Saturn had lagged 50′ behind and Jupiter had advanced 20′ beyond the positions they would have had if undisturbed, Saturn has been moving continually faster, and the whole period of the inequality is 629 years. This is the largest perturbation of those affecting the motions of the principal bodies of our system. Saturn is the greatest planet except Jupiter, its diameter (75,800 miles) being about 9 times, its volume 697 times, and its mass 93.0 times that of the earth. Its mean density is 0.7, water being unity. Gravity at the surface has 1½ the intensity of terrestrial gravity. Its albedo is 0.5 (about that of a cloud), but its color is decidedly orange; it shows some bands and spots upon the surface which are not constant. The compression of the spheroid of Saturn exceeds that of every other planet, amounting to $\frac{1}{10}$ of its diameter. Its rotation, according to Asaph Hall, is performed in 10 h. 14.4 m. Its equator is nearly parallel to that of the earth. After the discovery by Galileo of the 4 satellites of Jupiter, Kepler conjectured that Mars should have 2 and Saturn 6 or 8 moons. In fact, Saturn has 10 satellites: Mimas, Enceladus, Tethys, Dione, Rhea, Titan, Hyperion, Iapetus, one discovered in 1898, and one in 1905. This planet has the unique appendage of a surrounding ring—consisting really of three apparent rings lying in one plane. The ring is 5,900 miles from the surface of Saturn, and its total breadth is 48,500 miles, its total diameter being thus 172,800 miles. The thickness of the ring is considerably less than 100 miles. Its plane is inclined 7° to the planet's equator and 28° 10′ to the earth's orbit. It is best seen when the planet is in Taurus or in Scorpio. The symbol of Saturn is ♄, probably representing a scythe.

2. The heroine of an episode of the Mahabharata. The divine seer Narada warns against the choice, as Satyavant, though handsome, magnanimous, and pious, has only a year to live. Savitri is firm, weds Satyavant, and lives in joy with him until the approach of the fatal day. On that day Satyavant and Savitri go together into the forest. Satyavant sinks to the ground in deadly illness; and, while Savitri supports his head upon her bosom, Yama the death-god appears and withdraws Satyavant's soul. As Yama turns to go, Savitri follows him, asking her husband's life. Yama urges her to return, offering her other gifts but not Satyavant. She obtains the restoration of Dyumatsena's sight and kingdom, for her father a hundred sons, and a hundred sons for herself and Satyavant, but still insists upon following Satyavant into the realm of death if his life is not restored. At last Yama relents, and when Savitri goes back to Satyavant's body and again takes his head upon her bosom, he awakes as from a sleep, and the two live happy many years in the recovered kingdom of the now-seeing Dyumatsena. The Savitri episode has been translated into German by Bopp, Rückert, Höfer, Holtzmann, Meier, and Merkel.

It was occupied in ancient times by the Allobroges; passed to Rome about 122 B. C.; was conquered by the Burgundians in the 5th century, and by the Franks in the 6th century; and later was part of the kingdom of Arles until 1032, passing then under German suzerainty. Savoy was made a county of the empire in 1111; Valais was annexed in the 13th century; and Nice was added in the 14th century. Savoy, The. A former London palace, now a chapel royal. On Feb. 12, 1246, a grant of land lying between the "Straunde" and the Thames was made by Henry III. to Peter of Savoy, uncle of Queen Eleanor, and he built the palace there. Peter died and left his property to the friars of Montjoy, who sold the palace to Queen Eleanor in 1270. In 1284 she gave it to Edmund, earl of Lancaster, and later it became the town seat of the dukes of Lancaster. When the Savoy was occupied by John of Gaunt in 1376, it was twice attacked by a mob and again by Wat Tyler's followers in 1381, who completely destroyed the palace. It was rebuilt about 1505 as a hospital, and endowed by the will of Henry VII.; suppressed by Edward VI.; refounded by Mary; and finally dissolved by Elizabeth. The present chapel royal was built on the ruins of a chapel of John of Gaunt, dedicated in 1511. The style is Perpendicular; the wooden ceiling is modern; there is excellent glass. This is the only one of the old buildings remaining, and was made a chapel royal by George III. in 1773; in 1864 it was partly destroyed by fire, and was reopened in 1865: it is entirely supported from the queen's privy purse. The French Protestants had a chapel here from the time of Charles II. till about 1737: this is the origin of the name Savoy, given in the 18th century to the psalm-tune known as "Old Hundredth." The Savoy Theatre was built near here on the Strand, and opened in 1881.

Saxo Grammaticus (sak'sō gra-mat'i-kus). A Danish historian of the 13th century. Little is known with certainty of his personal history, except that he was a clerk, and that his father and grandfather fought under Waldemar the Great. He had the surname Longus, but is commonly known as Grammaticus from his fluent style as a writer. His history, called "Gesta Danorum" or "Historia Danica," is written in Latin, and was undertaken at the instance of Archbishop Absalom, whose secretary he probably was. Parts of the work, from internal evidence, were written before 1202; he is supposed to have died shortly after the year 1208. The history consists of 16 books: the first 9 are purely legendary; the 2 following partly; authentic history begins with the twelfth book. The whole ends with the year 1186. The material for the earliest part was oral traditions, myths, legends, and poems, most of which have else been lost, although a few have been preserved in the original Old Norse form. Among others of the kind it contains the Hamlet ("Amleth") legend, of which it is the single extant source. The oldest edition is that of Kristiern Pedersen, Paris, 1514, according to which all subsequent editions have been printed. The classical Danish translation is by Anders Sörensen Vedel (1542–1616), published first at Copenhagen in 1575.

Compare the extract.

> There is some question whether Frisian or Saxon tribes were not settled on the eastern coasts of Britain before the landing of Cæsar. This theory rests chiefly on the supposed Germanic names of two tribes, the Coritavi and the Catieuchlani; on a remark of Tacitus that the Caledonians were large-limbed and red-haired like the Germans; on the title "Comes Litoris Saxonici," given to the Roman officer who governed the littoral from the Wash to the Adur; and on the fact that the Saxons in the fifth century seem to have found a kindred people already established in East Anglia, since no conquest of that district is on record. *Pearson*, Hist. Eng., I. 6.

Saxony (sak'sn-i). [ML. *Saxonia*, It. *Sassonia*, F. *Saxe*, from G. *Sachsen* (AS. *Seaxan*), prop. a tribe name, 'Saxons.'] The land of the Saxons: a geographical name the use of which has greatly varied in medieval and modern times. The ancient duchy of Saxony was one of the four great duchies of the old German kingdom. It was in northern Germany, comprised (roughly) between the Ems, North Sea, Eider, and Elbe, and extending to the south of the Harz, touching Franconia, but not the Rhine. Saxons appear first about 150 A. D., dwelling north of the Elbe estuary. Later they absorbed the Chauci, Cherusci, and Angrivarii; spread westward to the Rhine; and became noted as pirates, plundering the coasts of Gaul and Britain. They aided Carausius in 287; were defeated by Valentinian; founded Essex, Sussex, and Wessex in Britain in the 5th and 6th centuries; and settled at the mouth of the Loire and on the coast of Normandy. Their four divisions in northern Germany were the Westfalia, Ostfalia, Engern, and Nordalbingia. They were reduced by Charles the Great in a series of wars 772–804, and obliged to accept Christianity. About 800, bishoprics were established at Osnabrück, Verden, Bremen, Paderborn, Minden, Münster, Hildesheim, and Halberstadt. The duchy of Saxony arose under the Liudolfinger in the middle of the 9th century. It furnished the Saxon line of German kings and emperors from Henry the Fowler (919) to Henry II. (1024). "The modern kingdom of Saxony has nothing but its name in common with the Saxony which was brought under Frankish dominion by Charles the Great." (*Freeman*, Hist. Geog., p. 196.) It was governed later by the house of Billing, and opposed Henry IV. Its duke Lothaire became king of Germany in 1125. Henry the Lion of Saxony and Bavaria (duke from 1139) extended the territory, but was overthrown by Frederick Barba
in 1180. "The duchy of Saxony consisted of three
divisions, Westfalia, Engern or Angria, and Eastfalia.
The duchy was capable of any amount of extension to
the east, and the lands gradually won from the Wen

About 1638 he sustained some serious accident that left him a deformed paralytic deprived of the use of his lower limbs. About the same time his father died, leaving him without any share in the patrimony. He obtained some pensions and sought besides to help himself along by means of his pen. He attempted the burlesque style, and made a success of it in his first publication, "Le Typhon, ou la Gigantomachie" (1644). His style of writing became at once the fashion: this made the more acceptable his comedies "Jodelet, ou le maître valet" and "Les trois Dorothée, ou Jodelet soufflété" (1645), and his farce "Scènes du capitan Matamore et de Boniface pédant" (1647). In 1648 he began the publication of "Virgile travesti." Then he wrote some stinging pamphlets, among others "La mazarinade," and scored a great success with his "Roman comique" (1651). The following year Scarron married Françoise d'Aubigné, who became later Madame de Maintenon. During the last period of his life he wrote several short stories, "Nouvelles tragi-comiques" (1654), one of which ("L'Hypocrite") underlies Molière's "Tartufe," and composed also his best comedies, "Don Japhet d'Arménie" (1653), "L'Écolier de Salamanque" (1654), and "Le marquis ridicule" (1656), and a couple of posthumous plays, "La fausse apparence" and "Le prince corsaire" (1662).

Schamir (shä′mēr). A mysterious worm which, according to Persian and other traditions adopted by the Jews and woven around the legends of Solomon, was able to cut the hardest stone. It was about the size of a barleycorn, but nothing could resist its strength. It was with the aid of Schamir that Solomon built the temple, the stones of which were not hewn by human hands. In some versions it is called a stone. In early rabbinical fable it is not a worm, and is something more than a stone, being called a "creature." It is an impersonation of a mysterious force. The story passed over to the Greeks, and the force became a plant. In the English "Gesta Romanorum" it is again a worm called Thumare. Gervaise of Tilbury speaks of it in connection with Solomon as a worm called Thamir. The same legend in different forms is met with in Iceland and many other European countries. In some forms Schamir has the power of giving life or of paralyzing life.

It bursts locks and shatters stones; it opens in the mountains the hidden treasures hitherto concealed from men; or it paralyses, lulling into a magic sleep; or, again, it restores to life. I believe the varied fables relate to one and the same object — and that, the lightning.

Schiller (shil′ler), **Johann Christoph Friedrich von.** Born at Marbach, Würtemberg, Nov. 10, 1759: died at Weimar, May 9, 1805. A famous German poet, dramatist, and historian. His father, who had previously been a surgeon, entered the Würtemberg service at the outbreak of the Seven Years' War, and at the time of the birth of the poet was a lieutenant. Subsequently he rose to the rank of captain, and in 1768 was given the position of park-keeper at Ludwigsburg and the duke's country-seat, Solitude. He married, in 1749, Elizabeth Dorothea Kodweis, daughter of the landlord of the Golden Lion in Marbach. Schiller's earliest education was obtained in the village of Lorch, and then at the Latin school of Ludwigsburg. It was his original intention to study theology, but in accordance with the demand of the duke, Karl Eugen, who in 1770 had set up a military academy at his castle, Solitude, he entered there in 1773 and began the study of jurisprudence. In 1775 the academy was removed to Stuttgart, where he exchanged the study of law for that of medicine; and in 1780, on the conclusion of his studies, was appointed regimental surgeon at Stuttgart. His literary career began in 1781 with the publication of the tragedy "Die Rauber" ("The Robbers"), the plan of which he had conceived as early as 1778, when a pupil at the military academy. He was not able to find a publisher, and was obliged to print the work at his own expense, but the following year it was successfully produced at Mannheim. The publication of the drama had drawn upon him the displeasure of the duke, which was intensified when he went secretly to Mannheim in order to be present at its first representation. Subsequently he was forbidden by the duke to print anything which did not relate to his profession. Once more he went to Mannheim without leave, in order to see his drama, and this time, when it was discovered, he was condemned to a fortnight's arrest. He now determined to escape from this restraint, and the same year (1782) fled in company with a friend to Mannheim, and thence went to Darmstadt and Frankfort. Under the assumed name of Dr. Schmidt, he lived for a time at the village of Oggersheim, near Mannheim, and, not believing himself here free from pursuit, accepted the invitation of Frau von Wolzogen, and took up his abode on her estate Bauerbach, near Meiningen. In the meantime he had been at work on another drama which finally appeared in 1783, after having been twice rejected by the theater direction at Mannheim. This is his "Fiesco" (full title "Di Verschwörung des Fiesco zu Genua: republikanisches Trauerspiel": "The Conspiracy of Fiesco at Genoa: a Republican Tragedy"). At Bauerbach he lived until July, 1783, under the name of Dr. Ritter, engaged upon a third tragedy which he at first called "Luise Millerin," but which was published in 1784 under the name of "Kabale und Liebe" ("Love and Intrigue"). In 1783 he returned to Mannheim to accept the position of theater poet with a stipend of 300 florins, for which he was to furnish three plays a year: to eke out a support he had founded a journal (which was abandoned in 1793) called "Die rheinische Thalia" ("The Rhenish Thalia"), afterward "Die neue Thalia" ("The New Thalia"). His connection with the theater lasted only until Nov., 1784, when he resigned. In 1785, with the advice and assistance of Christian Gottfried Körner, the father of the poet Körner, he left Mannheim for Leipsic, where he arrived in April. Shortly after he moved out to the little village of Gohlis, near by, and then, that same year, accompanied Körner to Dresden: here, and in the village of Loschwitz, where his friend had a villa, he lived until 1787. In 1786 three lyrical poems had appeared in the "Thalia": "Freigeisterei der Leidenschaft," ("Free-thinking of Passion"), "Resignation," and "Lied an die Freude" ("Hymn to Joy"), the last written in Gohlis. In the garden-house at Loschwitz he completed the drama "Don Carlos," begun at Mannheim and finally published in 1787. Unlike the preceding dramas, which are all in prose, this like its successors, is written in iambic pentameter. To the Dresden period belongs, further, a novel that was never completed, called "Der Geisterseher" ("The Ghost-seer"). In 1787, having grown tired of his life in Dresden, he removed to Weimar, where, with the exception of the period from 1789 to 1799, he subsequently lived. In 1788 appeared his first historical work, the "Geschichte des Abfalls der Niederlande" ("History of the Revolt of the Netherlands"). Belonging also to this early time in Weimar are the poems "Die Gotter Griechenlands" ("The Gods of Greece") and "Die Künstler" ("The Artists"). In 1789 he was called as professor extraordinarius of history, but without a stipend, to the University of Jena. The succeeding year (1790) he married Lotte von Lengefeld, having previously been granted, on his application, a small stipend by the Duke of Weimar. During 1790–93 appeared his second historical work, the "Geschichte des dreissigjahrigen Kriegs" ("History of the Thirty Years' War"). In 1794 falls the beginning of the intimate association with Goethe, which had a marked influence upon both poets. In 1795, with the cooperation of Goethe, he founded the journal "Die Horen" ("The Horæ"), which was continued down to 1798. In 1796 the annual "Der Musenalmanach" ("The Almanac of the Muses") was begun under his editorship, and was published down to 1800, when it was abandoned. In it appeared the satiric epigrams, the famous "Xenien," written in collaboration with Goethe, and a number of his most celebrated poems, among them "Der Handschuh"

("The Glove"), "Der Ring des Polykrates" ("The Ring of Polycrates"), "Ritter Toggenburg" ("Knight Toggenburg"), "Der Taucher" ("The Diver"), "Die Kraniche des Ibycus" ("The Cranes of Ibycus"), "Der Gang nach dem Eisenhammer" ("The Walk to the Forge"), "Der Kampf mit dem Drachen" ("The Fight with the Dragon"), "Das Eleusische Fest" ("The Eleusinian Festival"), and (1800) "Das Lied von der Glocke" ("The Song of the Bell"), the most popular of all his poems. In 1799 another dramahad been completed, and the following year it was revised for publication. This is the trilogy "Wallenstein," which consists of the prelude "Wallensteins Lager" ("Wallenstein's Camp"), "Die Piccolomini" ("The Piccolomini"), a drama in five acts, and "Wallensteins Tod" ("Wallenstein's Death"), also in five acts. In 1798, further, he gave up his professorship at Jena and went back to Weimar, which was henceforth his home. The succeeding years were characterized by extraordinary dramatic productiveness. The tragedy "Maria Stuart" appeared in 1801. "Die Jungfrau von Orleans" ("The Maid of Orléans"), which he calls "a romantic tragedy," followed in 1802. This same year he was ennobled by the emperor Francis II. In 1803 appeared, further, "Die Braut von Messina" ("The Bride of Messina"), with the subtitle "Die feindlichen Brüder: Trauerspiel mit Chören" ("The Hostile Brothers: a Tragedy with Choruses"); and finally, in 1804, the drama "Wilhelm Tell." He died suddenly in 1805. Still another tragedy, "Demetrius," was left uncompleted at his death. His life may be divided into 3 periods. The first is that of his youth, from 1759 to 1785, when he removed to Leipsic: in this period fall the "Storm and Stress" dramas "The Robbers," "Fiesco," and "Love and Intrigue," and the lyric poems published in his "Anthologie" of 1782. A second period is the period of scientific production, in reality a time of research, from 1785 down to his intimate association with Goethe in the publication of the "Horen": in this period fall, most especially, "Don Carlos," his historical works, and several philosophical and esthetic treatises, the principal among them being that on "Naive und sentimentalische Dichtung" ("Naïve and Sentimental Poetry"). A third and last period is from 1794 until his death in 1805. This is the time of his greatest productivity: in it fall the best of his poems, of which there are many besides the ballads mentioned, and the most important of his dramas. A critical edition of his complete works was published at Stuttgart, 1867–76, in 17 volumes.

Schism, The Great. 1. The division between the Latin and Greek churches, which began in the 9th century, the principal doctrinal difficulty relating to the "filioque" in the creed. The immediate occasion of suspension of communion was the intrusion by the emperor Michael III., in 857, of the learned Photius into the see of Constantinople instead of Ignatius, at that time patriarch. The Roman see asserted jurisdiction in the matter as possessing supreme power, and mutual charges of false doctrine and excommunications followed; but Photius was finally acknowledged at Rome as patriarch. The final division was that between Pope Leo IX. and the patriarch Michael Cerularius, in 1054, since which time Roman Catholics regard the Greeks or Easterns as cut off from the Catholic Church, while the Greeks claim that they have remained faithful to the Catholic creed and ancient usages.

The "Danish Mark" was organized the German sovereigns in the 10th century. About 10 the emperor Conrad II. ceded the region to Canute, ki of Denmark, and for about 200 years Schleswig was close connected with Denmark, being generally ruled by mem bers of the Danish royal house, after which it was hereditary duchy, a fief of the Danish crown (ruled fro 1232 to 1375 by a branch of the Danish dynasty). In 13 Schleswig and Holstein were formally united. From 14 the kings of Denmark of the Oldenburg line ruled ov Schleswig-Holstein (being princes of the German Empi as dukes of Holstein). Under this house various division and subdivisions took place, but in 1777 nearly all Schleswig-Holstein was reunited with Denmark. Th King of Denmark entered the Germanic Confederatic for Holstein in 1815. The dual relations of Schleswig an Holstein toward Denmark and Germany led to the Schle wig-Holstein wars of 1848–50 and 1864 (see below). provisional government of the duchies was formed i 1848; and Danish rule was restored in 1851. The questio was reopened by the death of the King of Denmark i 1863. In consequence of the war of 1864, Schleswig an Holstein were handed over to Prussia and Austria; an in 1865, by the Convention of Gastein. Schleswig fell unde Prussian rule. After the war of 1866 both Schleswig an Holstein were annexed to Prussia. See *Holstein.*

The history of the relations of Denmark and the Duch ies to the Romano-Germanic Empire is a very small pa of the great Schleswig-Holstein controversy. But havin been unnecessarily mixed up with two questions properl quite distinct,—the first, as to the relation of Schleswi to Holstein, and of both jointly to the Danish crown; th second, as to the diplomatic engagements which the Dan ish kings have in recent times contracted with the Germa powers,—it has borne its part in making the whole ques tion the most intricate and interminable that has vexe Europe for two centuries and a half. Setting aside irrele vant matter, the facts as to the Empire are as follows:— I. The Danish kings began to own the supremacy of th Frankish Emperors early in the ninth century. Havin recovered their independence in the confusion that fol lowed the fall of the Carolingian dynasty, they were agai subdued by Henry the Fowler and Otto the Great, and con tinued tolerably submissive till the death of Frederick II and the period of anarchy which followed. Since tha time Denmark has always been independent, although he king was, until the treaty of 1865, a member of the Germa Confederation as duke of Holstein and Lauenburg. II Schleswig was in Carolingian times Danish; the Eyder be ing, as Eginhard tells us, the boundary between Saxonis Transalbiana (Holstein) and the Terra Nortmannorum (wherein lay the town of Sliesthorp), inhabited by the Scandinavian heathen. Otto the Great conquered al Schleswig, and, it is said, Jutland also, and added the southern part of Schleswig to the immediate territory o the Empire, erecting it into a margraviate. So it re mained till the days of Conrad II., who made the Eyde again the boundary. III. Holstein always was an integra part of the Empire, as it was afterwards of the Germani Confederation and is now of the new German Empire.

Operations were again suspended by a truce from July, 1849, to July, 1850. His reputation as the father of letter-founders, and the inventor of matrices and the type-mould, is entirely undeserved. His types show that he had no skill as a letter-cutter or mechanic. It is not possible that a man who has shown such feeble evidences of mechanical ability could have been the first inventor of the matrices and the type-mould. While Gutenberg and Fust were living, Schoeffer never made the claim that he was the inventor, or even a co-inventor, of printing. But when they were buried, he claimed that he was superior to both, and that he was really the first to enter the sanctuary of the art. In 1468 he falsely said that although Gutenberg was the first inventor, he was the man who perfected the art.

By 1827 his prospects had decidedly brightened, and he composed ceaselessly, surpassing his former achievements, and having many demands from foreign publishers; but poverty and hard work had already weakened his system, and in 1828 he succumbed to an attack of typhoid fever. The number of his compositions is large, including several operas, cantatas, 10 symphonies, many sonatas, masses, marches, quartets, fantasias, etc., and more than five hundred songs, in which he reached the highest level of song-writing. 'Gentillesse," and refers to Chaucer frequently as "my maistre." He is probably the man to whom Chaucer's "Lenvoy to Scogan" was written, and is not to be confounded with a jester named John or Thomas Scogan, to whom a book called "Scoggins Jests" is attributed, and who flourished at the court of Edward IV. It is this Scogan that Shakspere introduces anachronously in the second part of "Henry IV.," iii. 2; but the Scogan to whom Gower alludes in "The Fortunate Isles" is Henry Scogan.

A "stone of destiny" which formed part of the coronation chair was carried off to Westminster by Edward I. in 1296. The present Scone Palace, a modern building, is a seat of the Earl of Mansfield.

Scopas (skō'pas). [Gr. Σκόπας.] Born in the island of Paros about 420 B. C. A celebrated Greek sculptor and architect. His first important work was the temple of Athene Alea at Tegea, built on the site of an older temple. A few fragments of the sculpture of this temple have been recovered. In its interior a Corinthian order was superimposed upon an Ionic, the first recorded use of this order. Scopas probably went to Athens about 377 B. C., and remained there 5 years, when he went to Halicarnassus to superintend the sculpture of the Mausoleum. The fragments from this monument in the British Museum probably give us our only reliable information as to Scopas's style. A doubtful passage of Pausanias makes it probable that he is represented in the sculpture recovered from the Artemisium at Ephesus. The Apollo Citharœdus of the Vatican is always associated with Scopas as a copy of his statue. The original of the Niobe group was by either Scopas or Praxiteles, probably Scopas. The Niobide of the Vatican may have belonged to the original group. The style of Scopas was highly ideal and sympathetic. *Pathos* is the word by which his work is characterized in the old writers.

On May 24, 1806, as chief officer of the Resolution, he reached lat. 81° 30' N., long. 19° E., the farthest point north (?) which had been reached at that date. In 1811 he took command of the Resolution, which was engaged in the whale-fishery. In 1819 he communicated to the Royal Society of London a paper "On the Anomaly in the Variation of the Magnetic Needle." In 1820 he published his "History and Description of the Arctic Regions." He surveyed the east coast of Greenland between lats. 69° 30' N. and 72° 30' N. in 1822, and in 1823 published his "Journal of a Voyage to the Northern Whale-Fishery, etc." He now abandoned the sea, resided two years at Cambridge, and in 1825 was ordained and appointed curate of Bessingby. His especial study was terrestrial magnetism. He visited America in 1844–48, and Australia in 1856. Besides the works above mentioned, he wrote "Memorials of the Sea" (1850), "Journal of a Voyage to Australia for Magnetic Research" (1859), etc.

Scornful Lady, The. A comedy of domestic life, by Beaumont and Fletcher, published in 1616. It was played about 1609. In 1783 it was altered by Cooke and produced as "The Capricious Lady."

Scorpio (skōr'pi-ō). [L., 'the Scorpion.'] A constellation and the eighth sign of the zodiac, represented by the character ♏. The constellation, which is conspicuous in early summer in the skies of the southern United States (where the whole of the magnificent tail clears the horizon), contains the first-magnitude red star Antares and several of the second magnitude. With the Chaldeans and Greeks it extended over one sixth of the planetary circle, the Scorpion being represented with exaggerated claws embracing a circular space where Libra is now placed. From this irregularity it may be inferred that the constellation is older than the zodiac, which was formed before 2000 B. C. Libra, though later, is of no small antiquity, since it appears in the Egyptian discs. Its adoption by Julius Cæsar in his calendar made it familiar. Ptolemy, however, though living in Egypt early two centuries later, follows Babylonian and Greek astronomers in covering the place of Libra with the Scorpion's claws. In designating the stars of this constellation by means of the Greek letters, the genitive *Scorpii* from the alternative Latin form *scorpius*) is used: thus, Antares is *α Scorpii*.

Scorpion, The. See *Scorpio*.

Scot, or Scott (skot), **Michael.** [Identified by Lyte with Sir Michael Scot of Balwearie in Fifeshire, but by Camden with a Cistercian monk of Cumberland. The traditional date of his death is about 1291.] A Scottish scholar and man, with posthumous fame as a wizard and magician. He is said to have studied at Oxford and Paris, and to have learned Arabic at Toledo. On the invitation of the emperor Frederick II. he superintended a translation of Aristotle and his commentators from Arabic into Latin. His original works deal with astrology, alchemy, and the occult sciences. The chief are "Super auctorem sphæræ" (Bologna, 1495; Venice, 1631), "De sole et luna" (in "Theatrum chimicum," Strasburg, 1622), and "De physiognomia et de hominis procreatione." According to a tradition followed by Scott in "The Lay of the Last Minstrel," and to Border folk-lore, he was buried in Melrose Abbey.

An abridgment of the work written by Walter Bower is known as the "Book of Cupar": this has not been printed.

Scotists (skō'tists). The followers of Duns Scotus. His fundamental doctrine is that distinctions which the mind inevitably draws are to be considered as real, although they do not exist apart from their relations to mind. Such distinctions were called *formal*, the abstractions thence resulting *formalities*, and those who insisted upon them *formalists* or *formalizers* (Middle Latin *formalizantes*). He taught the important principle of hæcceity — that individual existence is no quality, is capable of no description or general conception, but is a peculiar element of being. He held that the natures of genera and species, as *animal* and *horse*, are real, and are not in themselves either general or particular, though they cannot exist except as particular nor be thought except as general. The teaching of Scotism in the English universities was prohibited by the royal injunctions of 1535.

Scotland (skot'land). [AS. *Scotland*, land of Scots; F. *Écosse*, G. *Schottland*, L. *Caledonia*.] A country of Europe, occupying the northern division of the island of Great Britain, and forming part of the United Kingdom of Great Britain and Ireland. Capital, Edinburgh; largest city, Glasgow. The mainland, which extends from lat. 54° 38'–58° 41' N., and from long. 1° 45'–6° 14' W., is bounded by the Atlantic on the west and north, the North Sea on the east, and England and the Irish Sea on the south. The country is divided generally into the Highlands in the north and west, and the Lowlands in the south and east. The chief indentations of the coast are the Moray Firth, Firths of Tay and Forth, Solway Firth, and Firth of Clyde. The highest mountains are the Grampians, about 4,000 feet (Ben Nevis, 4,406 feet). The chief river-systems are those of the Spey, Tay, Forth, Tweed, and Clyde. There are many mountain lakes, including Lochs Tay, Awe, Lomond, Katrine, etc. The principal islands are the Orkney Islands, Shetland Islands, Lewis and Harris, North Uist, South Uist, Skye, Mull, Jura, Islay, Arran, and Bute. Scotland has important commerce, valuable mines of iron and coal, fisheries, flourishing iron, cotton, woolen, linen, and jute manufactures, ship-building industries, whisky-distilleries, etc. It has 33 counties. The kingdom is represented by 72 members in the House of Commons; and the peerage, to which no additions have been made since 1707, but which still numbers 87 members, appoints 16 peers at the opening of each Parliament to sit in the House of Lords, in which, however, 51 of the other Scottish peers have seats as holders of British titles. The great majority of the Scots are Presbyterians (mostly of the Established Church, Free Church, or United Presbyterian Church); there are also Roman Catholics, Episcopalians, Congregationalists, etc. Gaelic (a Celtic language) is spoken in many parts of the Highlands. The original inhabitants were Celts. Scotland was invaded by the Romans under Agricola in the 1st century. A wall between the Clyde and Forth was built under Antoninus and Septimius Severus. Invasions of Roman Britain by the Picts and Scots took place in the 4th and 5th centuries. In the 6th century a kingdom was founded by the Dalriad Scots; there was a settlement of Angles in the southeast; and the conversion of the Picts was begun by Columba. A union of Picts and Scots into the kingdom of Albania or Scotia was effected in the 9th century. From the 8th century to the 11th there were raids by the Norsemen, and settlements were made by them especially in the Orkneys and Shetlands. King Malcolm II. achieved the conquest of Lothian in 1018. In the struggles between England and Scotland, the latter was invaded by William the Conqueror, but no territory was lost. The kingdom prospered in the 12th and 13th centuries, especially under the three Alexanders. The death of Margaret, the Maid of Norway, granddaughter of Alexander III., led to a notable dispute about the succession, and to the interference of Edward I. of England in Scottish affairs. In the contest between Bruce and Baliol, in which Edward was virtually arbitrator, Baliol (see *Baliol, John de*) was chosen king in 1292. He paid homage to Edward, but afterward renounced his allegiance, and a war followed which was really a struggle on Edward's part for sovereignty and on Scotland's for independence. Scotland was invaded by Edward in 1296. The Scots under Wallace were victorious at Stirling in 1297, but were defeated at Falkirk in 1298. On the death of Wallace in 1305, Robert Bruce succeeded as national leader, and was crowned king in 1306. The independence of Scotland was secured by the victory of Bannockburn in 1314, and was recognized by Edward III. in 1328. Robert II. (who succeeded in 1371), the son of Bruce's daughter, was the first sovereign of the Stuart dynasty. In 1513 the Scots under James IV. invaded England and suffered a disastrous defeat at Flodden, Sept. 9. The following are important among more recent events: reign of Mary Queen of Scots, 1542–67; introduction of the Reformation, 1560; invasion by the English under Somerset, and defeat at Pinkie, 1547; accession of James VI., king of Scotland, to the throne of England as James I., 1603; success of the Covenanters against Charles I., 1639–40; persecution of the Covenanters under Charles II. and James II.; legislative union of the two kingdoms of England and Scotland, 1707; Jacobite insurrections 1715 and 1745–46. Area, 29,785 square miles. Population (1901), 4,472,103.

When the disputed relations between the English and Scottish crowns began, the names of England and Scotland seem not to have been in use at all. And if we choose to use them as convenient ways of expressing the English and Scottish territories as they then stood, we must still remember that the limits of those territories in no way answered to the modern limits of England and Scotland. Part of modern England was not yet English, and a very large part of modern Scotland was not yet Scottish. The growth of the Scottish nation and kingdom is one of the most remarkable facts in history. It was formed by the fusing together of certain portions of all the three races which in the tenth century, as now, inhabited the Isle of Britain. Those three races may be most conveniently spoken of as English, Welsh, and Irish.

Scott, Sir Walter. Born at Edinburgh, Aug. 15, 1771: died at Abbotsford, Sept. 21, 1832. A famous Scottish novelist and poet. He was the son of Walter Scott, a writer to the signet, and Anne Rutherford, daughter of Professor John Rutherford of Edinburgh. He became lame in infancy. In 1779 he was sent to the Edinburgh high school, and later studied at the university and read for the bar. He was admitted member of the Faculty of Advocates in 1792, and in 1799 was made sheriff of Selkirkshire, and in 1806 one of the clerks of session. In 1797 he married Miss Charpentier (or Carpenter), daughter of a French refugee. Becoming inter-

ested in the new German romantic literature in 1788, he published translations of Bürger's ballads in 1796, and in 1799 a translation of Goethe's "Götz von Berlichingen." The "Minstrelsy of the Scottish Border" appeared 1802–03, and the first of his poems, "The Lay of the Last Minstrel," in 1805. These were published by Ballantyne with whom he established an unfortunate partnership in business. This was followed by the poems "Marmion" (1808), "The Lady of the Lake" (1810), "The Vision of Don Roderick" (1811), "Rokeby" (1813), "The Bridal of Triermain" (1813), "The Lord of the Isles" (1814), "The Field of Waterloo" (1815), and "Harold the Dauntless" (1817). In 1805 he wrote several chapters of a Scottish novel of the time of the last Jacobite rebellion: this was looked at in 1810, but was again laid aside till 1814, when it was completed and published anonymously (July 7) under the title of "Waverley, or 'Tis Sixty Years Since." It was the first of those masterpieces, the "Waverley Novels," which place Scott in the front rank of the writers of fiction. The following is the list of them: "Waverley" (1814), "Guy Mannering" (1815), "The Antiquary" (1816), "Old Mortality" (1816), "The Black Dwarf" (1816), "Rob Roy" (1818), "The Heart of Midlothian" (1818), "The Bride of Lammermoor" (1819), "The Legend of Montrose" (1819), "Ivanhoe" (1820), "The Monastery" (1820), "The Abbot" (1820), "Kenilworth" (1821), "The Pirate" (1822), "The Fortunes of Nigel" (1822), "Peveril of the Peak" (1823), "Quentin Durward" (1823), "St. Ronan's Well" (1824), "Redgauntlet" (1824), "The Betrothed" (1825), "The Talisman" (1825), "Woodstock" (1826), "The Two Drovers" (1827), "The Highland Widow" (1827), "The Surgeon's Daughter" (1827), "The Fair Maid of Perth" (1828), "Anne of Geierstein" (1829), "Count Robert of Paris" (1831), and "Castle Dangerous" (1831). His earliest printers and publishers were the Ballantynes with whom he formed a secret partnership. The publishing business was not successful — mainly, it would appear, from the production of costly works for which there was but a limited demand. In 1818 and later his copyrights were purchased by Constable, and when that publisher failed in 1826, the novelist was involved to the amount of £120,000 — in addition to which he had private debts of £30 000. The purchase of the estate of Abbotsford, and the erection, adornment, and maintenance of the mansion (which he occupied from 1812 to 1826), had been a very serious drain on his resources. He struggled manfully to meet his liabilities; and by his publications (written, after the failure, in gradually failing health), and the disposal of copyrights after his death, his creditors were paid in full. The writer of the novels long remained "the Great Unknown"; extraordinary precautions were taken to conceal the authorship, and the vast amount of literary work published by Scott under his own name helped to preserve the secret of his identity. It was not till Feb. 23, 1827, that he publicly confessed himself "the total and undivided author." He was the first on whom the title of baronet was conferred (1820) by George IV. He edited the works of Dryden (1808: in 18 vols., with life) and of Swift (1814: in 19 vols., with life), and wrote, in addition to the works mentioned above, a "Life of Napoleon (9 vols. 1827), "Tales of a Grandfather" (1827–30), "History of Scotland" (1829–30), "Letters on Demonology and Witchcraft" (1830), etc., besides numerous introductions, prefaces, and articles in magazines and reviews. His "Familiar Letters" were published in 1893. A biography of Scott, by his son-in-law, J. G. Lockhart, appeared 1836–38.

Their name means 'separatist' or 'renegade.'] A tribe of North American Indians composed of the members of the Creek Confederacy who during the 18th and the early part of the 19th century left the main body and settled in Florida. They were engaged in two wars with the United States (1817–18 and 1835–42). That of 1817–18 was occasioned by their depredations on the frontier settlements of Georgia and of Alabama Territory. General E. P. Gaines destroyed an Indian village on the refusal of the inhabitants to surrender certain alleged murderers, and the Indians retaliated by waylaying a boat ascending the Appalachicola with supplies for Fort Scott, and killing 34 men and a number of women. General Jackson took the field against the Indians in Jan., 1818, and after a short but sharp campaign destroyed the Seminole villages in the neighborhood of the present city of Tallahassee, in April. He court-martialed and executed two British subjects, Arbuthnot and Ambrister, who were among the captives, and whom he accused of stirring up the Indians, and on May 24, 1818, entered the Spanish town of Pensacola, which he claimed had given refuge to the savages. The war of 1835–42 was the most bloody and stubborn of all those against Indian tribes. It originated in the refusal of a part of the tribe to cede their Florida lands and remove to the Indian Territory according to a treaty ratified in 1834. Osceola was the Seminole leader, and the war was conducted with varying success under Scott, Call, Jesup, Taylor, and others, till the subjugation of the Indians in 1842. The number of Seminoles finally removed in 1843 was officially reported as 3,824. Those who reached the Indian Territory constituted one of the five "civilized nations" there, now numbering about 3,000, including negroes and adopted whites, and more than 200 remain in southern Florida. Semiramis (se-mir′a-mis). [Assyr. *Sammuramat*, loving doves; Gr. Σεμίραμις.] In the Greek historiographers, wife of Ninus the founder of Nineveh. She was the daughter of the Syrian goddess Derketo, and was endowed with surpassing beauty and wisdom. She assumed the government of Assyria after her husband's death; built the city of Babylon with its hanging gardens, the temple of Bel, and the bridge over the Euphrates; conquered Egypt, Ethiopia, and Libya; and organized a campaign against India: in short, everything marvelous in the Orient was ascribed by the Greeks to the supernatural queen. These statements of Greek writers find no confirmation in the cuneiform monuments. Some of the exploits of Semiramis are identical with those recorded of the goddess Ishtar in the so-called Nimrod epic. It is possible, however, that there was some historical foundation for these legends, as the name Sammuramat occurs in the inscriptions as the queen of Ramman-Nirari III. (811–782 B. C.). She is the only Assyrian queen whose name is recorded on the monuments.

Semites (sem′its). The descendants, or supposed descendants, of Shem, son of Noah: a name given by Eichhorn to the Hebrews and allied races in southwestern Asia and eastern Africa.

The true Semite, whether we meet with him in the deserts and towns of Arabia, in the bas-reliefs of the Assyrian palaces, or in the lanes of some European ghetto, is distinguished by ethnological features as definite as the philological features which distinguish the Semitic languages. He belongs to the white race, using the term "race" in its broadest sense. But the division of the white race of which he is a member has characteristics of its own so marked and peculiar as to constitute a special race — or, more strictly speaking, a sub-race. The hair is glossy-black, curly and strong, and is largely developed on the face and head. The skull is dolichocephalic. It is curious, however, that in Central Europe an examination of the Jews has shown that while about 15 per cent. are blonds, only 25 per cent. are brunettes, the rest being of intermediate type, and that brachycephalism occurs almost exclusively among the brunettes. It is difficult to account for this except on the theory of extensive mixture of blood. Whenever the race is pure, the nose is prominent and somewhat aquiline, the lips are thick, and the face oval. The skin is of a dull white, which tans but does not redden under exposure to the sun. There is usually, however, a good deal of colour in the lips and cheeks. The eyes are dark like the hair. *Sayce*, Races of the O. T., p. 77.

C., son and successor of Sargon, one of the great Assyrian monarchs, and well known in biblical history. He was first engaged, like his father, in many bloody wars against the Babylonian and Elamite alliance headed by Merodach-baladan, the hereditary foe of Assyria. These ended with the capture and destruction of Babylon in 689, and the defeat of Elam in the memorable battle of Halule in 691 B. C. (See *Elam.*) Of his further expeditions, which according to Greek and cuneiform accounts reached as far as Phœnicia in Asia Minor, where he is supposed to have founded the city of Tarsus, may be mentioned that against Phœnicia and Palestine known from the Old Testament. (Concerning the relation of the biblical account to that of the cuneiform inscriptions, see *Hezekiah* and *Jerusalem.*) The expedition was provoked by the coalition of Phœnicia, Palestine, and the principalities of Syria with Egypt, Mesopotamia's rival for the supremacy over Asia, and its object was to isolate Egypt. The bulk of the Assyrian army met the forces of the coalition at Eltekeh (Assyrian *Altaku*). The battle seems to have been indecisive. The siege of Jerusalem had to be given up on account of a pestilence which broke out in the Assyrian army. Like Sargon, Sennacherib indulged in building, and endeavored to promote the welfare of the country by introducing improvements. His reign was of special importance for the history of the city of Nineveh, which, after having long been neglected, was again raised by him to the dignity of a capital, and restored to unprecedented splendor and glory. > It is even possible to go back for another 500 years, when we come at last to the very earliest extant inscription in the world. This venerable record is a tablet now in the Ashmolean Museum at Oxford, which was erected by Sent, a king of the second dynasty, to the memory of Shera, who appears to have been his grandson. According to the chronological scheme of M. Mariette, King Sent must have lived about the year 4700 B. C. But, as will presently be shown, this very inscription, the oldest written record in existence, affords conclusive proof that even at that distant date of some 60 or 70 centuries, the hieroglyphic writing was already an extremely ancient graphic system, with long ages of previous development stretching out behind it into a distant past of almost inconceivable remoteness. *Taylor,* The Alphabet, I. 56.

Sepharad (sef'ạ-rad). A region where deported Israelites lived. Its geographical location is uncertain. The Septuagint renders it by Ephratha, the Vulgate by Bosphorus. Some identify it with Spard which occurs in the Persian cuneiform inscriptions, and which is supposed to represent Sardis and Lydia; others with Sepurda in the southwest of Media, mentioned in Sargon's inscriptions; still others with Sepurd, a mountain southwest of Erzerum. The Syriac translation of the Peshita and Jewish interpreters render it by Spain, and in medieval and modern Jewish writings the name always designates Spain.

Sepharvaim (sef-ạr-vā'im). In the Assyrian inscriptions, Sippara, a city in Mesopotamia, on the left bank of the Euphrates. It was divided by the "Royal Canal" or the "Canal of Agade," one part being originally called Sippar, the other Agade; but the name of Agade, it seems, was lost in the lapse of time, and both cities became one. In the cuneiform inscriptions the two portions of the city are distinguished as "Sippar of Shamash" and "Sippar of Annuit," being centers of the cult of these divinities. The temple of Shamash, the sun-god, called E-babbara, was also consecrated to the worship of Moloch, who was the sun-god in his destructive aspect. This agrees with 2 Ki. xvii. 31, according to which the colonists from Sepharvaim settled in Samaria "burned their sons with fire to Adrammelech and Anammelech." Sepharvaim is now represented by the ruins of Abuhabba, where, in 1881, Hormuzd Rassam discovered the temple of the sun-god.

> "Weep not, my wanton, smile upon my knee:
> When thou art old, there 's grief enough for thee"—

In 339 (under Constantine) it was destroyed in consequence of a revolt of the Jews. During the Crusades, the tradition that Sepphoris was the home of Joachim and Anna, the parents of the Virgin Mary, was generally accepted, and the Crusaders erected a church on the traditional site of their dwelling. The modern Sefuriyeh numbers about 600 inhabitants.

September (sep-tem'bėr). [L. *September,* sc. *mensis,* the 'seventh month' of the Roman year, which began with March.] The ninth month of the year, containing thirty days.

September, Massacres of. A series of murders perpetrated by the extreme revolutionists at Paris, Sept. 2–6, 1792, the victims being royalists and constitutionalists confined in prison. The massacres were undertaken by the Commune of Paris, and were occasioned by the consternation felt over the approach of the Prussians, whose avowed object was to restore the king.

> Danton believed that before going forth to conquer foreign enemies it was necessary to exterminate those at home, at least to "strike terror to the royalists." He ordered, or allowed the committee of surveillance to order, the frightful massacres of September 2–6. A band of four or five hundred assassins, hired by the Commune, took possession of the prisons. Some of them constituted themselves a tribunal, others served as executioners. The prisoners were called, and after a few questions they were set at liberty or led into the courtyard of the prison and despatched with sabres, pikes, axes, and clubs. After having killed the political prisoners, they murdered prisoners of all classes. The number of killed amounted to nine hundred and sixty-six. *Duruy,* Hist. of France, p. 552 (trans.).

Septuagint (sep′tū-a-jint). [From L. *septuaginta*, seventy.] A Greek version of the Hebrew Scriptures made, according to tradition, by about seventy translators: usually expressed by the symbol LXX ('the Seventy'). The legend is that it was made by seventy-two persons in seventy-two days. It is said by Josephus to have been made in the reign and by the order of Ptolemy Philadelphus, king of Egypt, about 270 or 280 B. C. It is supposed, however, by modern critics that this version of the several books is the work not only of different hands but of separate times. It is probable that at first only the Pentateuch was translated, and the remaining books gradually; but the translation is believed to have been completed by the 2d century B. C. The Septuagint is written in the Hellenistic (Alexandrine) dialect, and is linguistically of great importance from its effect upon the diction of the New Testament, and as the source of a large part of the religious and theological vocabulary of the Greek fathers, and (through the Old Latin version of the Bible and the influence of this on the Vulgate) of that of the Latin fathers also and of all western nations to the present day. In the Greek Church the Septuagint has been in continuous use from the earliest times, although other Greek versions (see *Hexapla*) were anciently also in circulation, and it is the Old Testament still used in that church. The Septuagint contains the books called Apocrypha intermingled among the other books. It is the version which agrees with most of the citations in the New Testament.

Over them rise the bulbous dome and cupolas of St. Sophia, with its Turkish minarets, and beyond are other domes and minarets innumerable. Rounding Seraglio Point, the vessel glides into the Golden Horn — the wide inlet which forms the splendid harbour of Constantinople, and divides the city into its European and its Turkish quarters. *Poole*, Story of Turkey, p. 262.

See *Serapis* and *Sakkarah*.—**2.** A famous temple of Serapis in ancient Alexandria, destroyed by Theodosius. See the extract, and that under *Serapis*, below.

The Serapion, at that time, appeared secure in the superstition which connected this inviolable sanctuary, and the honor of its god, with the rise and fall of the Nile, with the fertility and existence of Egypt, and, as Egypt was the granary of the East, the existence of Constantinople. The Pagans had little apprehension that the Serapion itself, before many years, would be levelled to the ground. The temple of Serapis, next to that of Jupiter in the Capitol, was the proudest monument of Pagan religious architecture. Like the more celebrated structures of the East, and that of Jerusalem in its glory, it comprehended within its precincts a vast mass of buildings, of which the temple itself formed the center. It was built on an artificial hill, in the old quarter of the city, called Rhacotis, to which the ascent was by a hundred steps. All the substructure was vaulted over; and in these dark chambers, which communicated with each other, were supposed to be carried on the most fearful and, to the Christian, abominable mysteries. All around the spacious level platform were the habitations of the priests, and of the ascetics dedicated to the worship of the god. Within these outworks of this city rather than temple was a square, surrounded on all sides with a magnificent portico. In the center arose the temple, on pillars of enormous magnitude and beautiful proportion. The work either of Alexander himself or of the first Ptolemy aspired to unite the colossal grandeur of Egyptian with the fine harmony of Grecian art. *Milman*, Hist. of Christianity, III. 150.

Serapis (se-rā′pis). The Greek and Roman name of a deity of Egyptian origin whose worship was officially promoted under the Ptolemies, and was introduced into Greece and Rome. Serapis was the dead Apis, honored under the attributes of Osiris; he was lord of the under world and identified with the Greek Hades. His worship was a combination of Egyptian and Greek cults, and was favored by the Ptolemies for political reasons. See *Serapeum*.

Egyptian and Greek met as worshippers of Serapis. The Serapis of Egypt was said to have been worshipped for ages at Sinope; he was transported from that city with great pomp and splendor, to be reincorporated, as it were, and reidentified with his ancient prototype. . . . The colossal statue of Serapis [in the Serapeum] embodied these various attributes. It filled the sanctuary: its outstretched and all-embracing arms touched the walls; the right the one, the left the other. It was said to have been the work of Sesostris; it was made of all the metals fused together — gold, silver, copper, iron, lead, and tin; it was inlaid with all kinds of precious stones; the whole was polished, and appeared of an azure color. The measure or bushel, the emblem of productiveness or plenty, crowned its head. By its side stood the symbolic three-headed animal, one the fore-part of a lion, one of a dog, one of a wolf. In this the Greeks saw the type of their poetic Cerberus. The serpent, the symbol of eternity, wound round the whole, and returned resting its head on the hand of the god. *Milman*, Hist. of Christianity, III. 151–152.

Servia (sėr'vi-ä). [F. *Serbie* or *Servie,* G. *Serbien.*] A kingdom in the Balkan peninsula, southeastern Europe. Capital, Belgrad. It is bounded by Austria-Hungary (separated by the Save and Danube) on the north, Rumania (separated by the Danube) and Bulgaria on the east, Turkey and Bosnia on the south, and Bosnia (mainly separated by the Drina) on the west. The surface is generally mountainous and hilly. The principal river (besides the frontier rivers) is the Morava. The leading occupations are agriculture and the raising of live stock; the chief products are hogs, sheep, wheat, and maize. The government is a constitutional hereditary monarchy. The legislative body is the Skupshtina. The prevailing religion is the Greek Catholic. The inhabitants are mostly Serbs (with over 100,000 Rumanians, besides Gipsies, etc.). The Serbs (or Croats) expelled the Avars and settled the country in the 7th century, and expelled the Byzantine governors in the 11th century. The title of king was assumed in the 11th century. The country was most flourishing under Stephen Dushan (about 1334–56), who assumed the title of emperor and annexed Macedonia, Albania, etc. The Servian power was overthrown by the Turks at the battle of Kossova in 1389, and Servia was incorporated with Turkey about 1458. The greater part of the country was occupied by Austria 1718–1739. A rising under Czerny George in 1804 resulted in the expulsion of the Turks, but they reconquered the country in 1813. A rising in 1815 under Milosh Obrenovitch (who was elected prince in 1817) was more successful, and Servia became practically independent. The Turkish garrisons were withdrawn in 1867. The war against Turkey in 1876 was unsuccessful. Servia took part with Russia against Turkey in 1877–78, and became absolutely independent, receiving a considerable addition of territory in 1878. Prince Milan assumed the title of king in 1882. A war with Bulgaria in Nov. and Dec., 1885, proved unsuccessful. King Alexander in 1893 and 1894 conducted the government in a reactionary sense. Area, 19,050 square miles. Population (1891), 2,162,759.

On the Aventine there is a fine fragment of 11 courses, and in the Vigna Torlonia there is a stretch which attains 25 courses, and is 50 feet high and 10½ thick. The masonry is massive ashlar of tufa, in the lower part quarry-faced with margin-draft. The upper part consisted of a range of fine arches.

(2) The second war (102–99 B. C.) was occasioned by an insurrection, also in Sicily, under Tryphon and Athenion, which was put down by the consul Manius Aquillius. (3) The third war (73–71 B. C.), also called the war of the gladiators, was occasioned by bands of gladiators who had escaped from a gladiatorial school at Capua and occupied Vesuvius, whence under the command of two Gauls and the Thracian Spartacus they plundered the neighborhood. They were joined by runaway slaves, defeated four Roman armies in succession, and wandered about Italy, even threatening the capital, but were finally put down by M. Licinius Crassus and Cn. Pompeius. Spartacus fell fighting.

river Paraná (lat. 24° 2′ 59″ S., long. 53° 57′ 53″ W., according to Bourgade la Dardye). The river above is broad and lake-like, but at the falls is suddenly divided into many small channels. "Traversing slightly inclined planes, the waters gather themselves in circular eddies, whence they flow in falls varying from 50 feet to 60 feet in depth. These circular eddies, which are quite independent of each other, range along an arc of about two miles in its stretch; they are detached, like giant cauldrons yawning unexpectedly at one's feet, in which the flood seethes with incredible fury; every one of these has opened for itself a narrow orifice in the rock, through which, like a stone from a sling, the water is hurled into the central whirlpool. The width of these outlets rarely exceeds 15 yards, but their depth cannot be estimated. They all empty themselves into one central channel, about 200 feet wide, rushing into it with astounding velocity."—*Bourgade la Dardye*, Paraguay.

He was a fellow of Trinity College, Oxford, and wrote and edited many political pamphlets in the time of Charles II. He offended Dryden, who attacked him in a coarse pamphlet (assisted by Crowne and Shadwell); he criticized and "answered" all Dryden's political poems in retaliation, and the town took sides, Settle being the favorite among the younger Cambridge and London men. He has been immortalized by the ridicule of Dryden and Pope, being the Doeg of "Absalom and Achitophel" and appearing in the "Dunciad." Later he was made city poet, and composed verses to be recited at the pageants: he was the last to hold that office. Shadwell (shad'wel), **Thomas.** Born in Norfolk, 1640: died at London, Nov. 20, 1692. An English playwright and poet laureate. He was educated at Cambridge and the Inner Temple, but deserted the law for literature. He is chiefly remembered for his quarrel with Dryden, who revenged Shadwell's attack upon him in "The Medal of John Bayes" by mercilessly satirizing him in "MacFlecknoe," and as "Og" in the second part of "Absalom and Achitophel." He succeeded Dryden, however, as poet laureate and historiographer royal in 1688 (when Dryden would not take the oath), notwithstanding his predecessor's satire in "MacFlecknoe,"

> "The rest to some faint meaning make pretence,
> But Shadwell never deviates into sense."

Shadwell was heavy, but not so dull as Dryden saw fit to depict him. His plays are coarse and witty. Among them are "The Sullen Lovers, or the Impertinents" (1668), "The Humourists," "Psyche" (an opera), "Epsom Wells," "The Virtuoso," "The Libertine," "The True Widow" (a comedy to which Dryden wrote an epilogue in 1678, before their quarrel), "The Lancashire Witches, etc.," "The Squire of Alsatia," "Bury Fair," "The Volunteers." His son, Charles Shadwell, was the author of several plays sometimes confounded with Thomas Shadwell's. They are "The Fair Quaker of Deal, or the Humours of the Navy" (1710: Hester Santlow played Dorcas in this play and contributed largely to its success), "The Humours of the Army" (1716), "Rotheric O'Connor," "The Sham Prince," etc.

A great battle was fought at Kahror, near the eastern limits of the great desert of Marwar. The Indo-Scythians were utterly defeated and lost their place in history. The battle of Kahror was probably fought about A. D. 73. It is said that the year 78 A. D. has become known as the Shaka or Shalivahana era in consequence of this battle.

Shakspere (shāk'spēr, originally shak'spēr), **William.** [Also *Shakespeare*, *Shakespear*, *Shaxper*, and many other forms, the proper modern form etymologically being *Shakespear*, as in the 1664 impression of the third folio and the fourth folio of the dramatist's works; lit. 'one who shakes a spear,' orig., like *Breakspear*, a complimentary or sarcastic name for a knight or soldier; from *Shake* and *spear*.] Born at Stratford-on-Avon, April, 1564 (baptized April 26): died there, April 23, 1616 (buried April 25). A famous English poet, the greatest of dramatists. Little is known of his life. He was the first son and the third child of John Shakspere, a glover, and Mary Arden, both children of husbandmen. His parents were possessed of a little property, and the father held various public offices (constable, alderman, and high bailiff) in Stratford: but their prosperity did not survive the poet's boyhood. Where or when Shakspere was educated is not known. On Nov. 28, 1582, he took out a bond (in which the name is written *Shagspere*) for license of marriage with Anne (or Agnes) Hathaway of Shottery, who survived him seven years. (Her birthplace was bought for the nation in 1892.) The date of the religious ceremony is not known. A child, Susanna, was born to them May 26, 1583, and on Feb. 2, 1585, twins, Hamnet and Judith. About 1587 Shakspere went to London to seek his fortune in connection with the stage, and became an actor, probably in Lord Leicester's company of players, who had visited Stratford about that time. After the death of Leicester it became Lord Strange's company. (The story that he was forced to leave Stratford for deer-stealing in the park of Sir Thomas Lucy at Charlecote is a fable; but there may be truth in Davenant's story that he held horses at the theater doors.) Shakspere had the advantage of being associated with Alleyne, the best tragic actor in England, and with Kempe and Pope, the best comedians. Greene, Kyd, Marlowe, Wilson, Peele, Lodge, Lyly, Munday, and others were all at this time writing plays for the different companies playing in the London theaters; and as early as 1589 or 1590 Shakspere was part author or reviser of some of the plays acted by his own company, Lord Strange's men. It was this collaboration that induced Greene, his rival playwright, to allude to him in his "Groatsworth of Wit" as "an upstart crow beautified with our feathers, that, with his Tiger's heart wrapped in a player's hide, supposes he is as well able to bombast out a blank verse as the best; and, being an absolute Johannes-fac-totum, is in his own conceit the only Shake-scene in a country." About 1593 he ceased to work as a collaborator, and in reviving the plays produced at this period seems to have taken out the work of the other hands, substituting lines of his own. In 1593 Lord Strange's men played at the Rose Theatre. At Lord Strange's death in this year the company became "The Chamberlain's," and with Shakspere and Burbage played at "The Theatre." After this time Shakspere was one of the chief actors in the best company in London, and its acknowledged play-writer, and attained fame as a poet as well. His son Hamnet having died in 1596, Shakspere went for a short time to Stratford. He obtained a grant of arms, and in 1597 bought New Place. In this year the Chamberlain's Company removed to "The Curtain," and about this time Ben Jonson began to write for them. Shakspere lived at this time in St. Helen's, Bishopsgate, with occasional absences in Stratford. In 1598 he played in Ben Jonson's "Every Man in his Humour." The Globe Theatre was opened in 1599, and after this Shakspere's plays were first produced here. In 1601 the Chamberlain's Company traveled, having become obnoxious to the court for playing "Richard II." They played at Oxford and Cambridge, and also went to Scotland. In this year Shakspere's father died. The turbulent quarrel known as "the war of the theaters," which had raged since 1599 between Jonson, Dekker, Chapman, Marston, Shakspere, and others, seems to have been composed about 1602. The plays produced between these years are filled with bitter personal allusions. In this latter year the Chamberlain's Company went back to the court. In 1603 the theaters were closed on account of the plague; the queen died; and the chamberlain's men took the name of "The King's Company." In 1605 Shakspere invested money in a lease of the tithes of Bishopton, Welcombe, Stratford, and Old Stratford. In 1607 his daughter Susanna married John Hall, a physician at Stratford, and his brother Edmund died. His mother died in 1608. In 1610 he retired from the theater, and was living in Stratford in 1611. In 1613 he bought a house near Blackfriars Theatre, his brother Richard died, and it is thought that at this time Shakspere sold his shares in the Globe and Blackfriars theaters. Little is known of his life in Stratford after his retirement from the stage, but his name appears in documents until 1615. On Feb. 10, 1616, his daughter Judith married Thomas Quiney, a vintner. Shakspere died the following April (it is supposed on the 23d, which is also celebrated as his birthday). Shakspere's poems are "Venus and Adonis" (entered on the "Stationers' Register" 1593), "The Rape of Lucrece" (1594), "Sonnets" (not published till 1609, but conjectured to have been written 1594–98), "A Lover's Complaint" (published with the "Sonnets," probably written about 1594). The sonnets are 154 in number, and were published with a dedication by the publisher, Thomas Thorpe, to "Mr. W. H.," "their only begetter," about whom controversy has raged. The "Passionate Pilgrim" was first published in 1594. A volume called "Poems: written by Wil. Shakespeare, Gent.," was published in 1640. It contains many poems now known to be by others. In 1796 the famous Ireland forgeries were published (see *Ireland, W. H.*). The authenticity of Shakspere's plays was first discussed in 1848 by J. C. Hart in "The Romance of Yachting." He was followed by others, notably by Miss Delia Bacon in 1857 and by Nathaniel Holmes in 1866 and 1888, and by Ignatius Donnelly, all striving to prove that Bacon wrote the plays. About 500 works have appeared on the subject. In the following list the dates of production are given as nearly as possible; but reference should be made to the separate entries. "Love's Labour's Lost" (1589: revised in 1597), "Two Gentlemen of Verona" (1591 and 1595), "Romeo and Juliet" (1591 and 1596), "Henry VI." (in three parts, 1592–94), "A Comedy of Errors" (1594), "King Richard III." (1594), "Titus Andronicus" (?) (1594), "A Midsummer Night's Dream" (1595), "King Richard II." (1596), "The Merchant of Venice" (1598), "King John" (1596), "Henry IV." (in two parts, 1597 and 1598), "Much Ado about Nothing" (1598), "As you Like it" (1599), "Henry V." (1599), "Merry Wives of Windsor" (1600), "Troilus and Cressida" (1600), "Julius Cæsar" (1600), "Hamlet" (1601), "Macbeth" (1601), "All 's Well that Ends Well" (1601), "Twelfth Night" (1602), "The Taming of the Shrew" (1603), "Othello" (1604), "Measure for Measure" (1604), "King Lear" (1605), "Antony and Cleopatra" (1607), "Timon of Athens" (1607–08), "Coriolanus" (1608), "Pericles" (1608), "Cymbeline" (1609), "The Tempest" (1611), "The Winter's Tale" (1611), "King Henry VIII." (1613). The doubtful plays were first attributed to Shakspere in the 1664 issue of the third folio: they are "The Two Noble Kinsmen," "Edward III.," "The London Prodigal," "Thomas Lord Cromwell," "Sir John Oldcastle," "The Puritan Widow," "Locrine," and "A Yorkshire Tragedy." "Arden of Feversham," "The Birth of Merlin," and other plays have also been attributed to him. Some of the plays were printed in quarto during Shakspere's lifetime. The first collected edition was the folio of 1623; the second folio appeared in 1632, a third in 1663 and 1664, a fourth in 1685. Rowe issued the first critical edition of the plays with the poems in 1709. Among the many later editions may be mentioned that of Pope (1725), Johnson (1765), Johnson and Steevens (1773), Malone (1790), Boydell's edition, revised by Steevens (1802), Bowdler's expurgated edition (1818), Knight (1838–43 and later), Collier (1841–44 and later), Halliwell (1853), Dyce (1857), Richard Grant White (1857–65 and 1883), Hudson (1860), Cambridge edition (1863–66), Globe edition (1864). Variorum editions have been edited by Reed (1803) and Boswell (1821), and notably by Furness (begun in 1877).

Shaktas (shäk'taz). [Skt. *shākta*, relating to Shakti (which see).] In India, the worshipers of the divine power under its female representation. As Hinduism has resolved itself into two great systems (Shaivism and Vaishnavism), so the adherents of each of these are divided into two great classes (the Dakshinamargis and the Vamamargis). Both are Shaktas, but the first, the 'followers of the right-hand path,' worship Shiva and Vishnu in their double nature as male and female, do not show undue preference for the female or left-hand side of the deity, and are not addicted to mystic or secret rites; while the second, the Vamamargis, or 'followers of the left-hand path,' worship exclusively the female side of Shiva and Vishnu. The former find their Bible in the Puranas, the latter in the Tantras. The rites of the latter are orgiastic, and represent the most corrupt development of Hinduism.

Shakti (shak'ti). In Sanskrit, 'strength, energy,' and then in Hindu religion the energy or active power of a deity personified as his wife and worshiped under various names. Fifty different forms of the Shakti of Vishnu besides Lakshmi are reckoned, and fifty of the Shakti of Shiva besides Durga or Gauri. Brahmanism holds that the One Universal Self-existent Spirit is pure existence. The moment he becomes conscious, his nature becomes duplex; and this double nature is held to be partly male and partly female, the female constituting his left side. The male side of the god is believed to relegate his more onerous functions to the female; hence the female side of the personal god is more often propitiated than the male. See *Shaktas*.

Shakuntala (sha-kön'ta-lä). The heroine of the great drama of Kalidasa. She was the daughter of the sage Vishvamitra by the nymph Menaka, and was left at birth in a forest where she was nourished by birds until found by the sage Kanva, who brought her up in his hermitage as his daughter. In the drama she is seen in the forest by King Dushyanta, who has gone there to hunt. He induces her to contract with him a Gandharva marriage—that is, one formed by a simple declaration of mutual acceptance. On leaving her to return to his capital, he gives her a ring. When Shakuntala goes back to the hermitage, she does not heed the approach of the testy sage Durvasas, who pronounces upon her the curse of being forgotten by her beloved. Relenting, however, Durvasas promises that Dushyanta shall remember her on seeing the ring. Shakuntala sets out to join her husband, but on the way bathes in a sacred pool and loses the ring. The king does not recognize her, and she is obliged to return to the forest, where she gives birth to Bharata. A fisherman catches a fish in which he finds a royal ring, which is taken to the king with the fisherman, who is thought to have stolen it. On seeing the ring the king recognizes it, remembers Shakuntala, and goes in quest of her. The play exists in two recensions, one known as the Devanagari, the other as the Bengali, of which the former is thought to be the older and purer. It was from the latter that Sir William Jones made his celebrated translation of 1789, which, translated into German by Forster in 1791, so excited the admiration of Herder and Goethe. Monier-Williams has published an exquisite and masterly translation of the Devanagari recension.

Among his works are "A First Book in Geology" (1884), "Kentucky" (1884: in American Commonwealths series), "The Interpretation of Nature" (1893), etc.

Shallow (shal'ō). A solemn, insignificant country justice in the "Merry Wives of Windsor," and in the 2d part of "King Henry IV.," by Shakspere. He has lofty pretensions to having been a roaring blade in his youth, and is a satire on Sir Thomas Lucy, the author's old Stratford enemy. Phelps made a great hit in London in this part.

Shalmaneser (shal-ma-nē'zėr). [Assyr. *Šulman-asarid*, the god Shulman is the leader.] The name of four Assyrian kings. The first reigned about 1330 B. C. From an inscription of Asurnazirpal (884–860 B. C.) it is known that he founded the city of Calah (modern Nimrud), which he made his residence, and that he extended the boundaries of the Assyrian empire in the northwest. The second reigned 860–824 B. C. He was warlike and enterprising like his father Asurnazirpal, and under him the first direct collision between Assyria and Israel took place. The extant monuments of him are the "black obelisk," about 7 feet high, with 190 lines of cuneiform writing and representations of war-scenes in bas-relief, discovered by Layard in the Nimrud mound; two bull-colossi covered with inscriptions, found in the same place; a monolith, found in Kurkh; the bronze coverings of his palace doors decorated with scenes of war, games, sacrifices, etc., and an account of the first nine years of his reign, in repoussé work, discovered by Hormuzd Rassam in Balawat. From these monuments we learn that Shalmaneser II. invaded Babylonia, conquering the city of Babylon and many other cities. He then directed his forces against the confederation of the Syrian kings to which also Ahab of Israel belonged, and defeated it in the battle of Karkar. In 842, after the defeat of Hazael of Damascus, he received tribute from Tyre, Sidon, and Jehu of Israel. The last four years of his reign were occupied with the rebellion which one of his sons had aroused, and which his other son put down two years after his father's death. The third reigned 782–772 B. C. During the ten years of his reign he made six expeditions against Armenia (Urartu), one against Damascus, and one against Chatarika (the biblical Hadrach). The fourth reigned 727–722. He is known from the Old Testament. He undertook an expedition into the west, on which occasion Hosea, king of Israel, who became tributary to his predecessor, Tiglath-Pileser III., repeated the assurance of his submission and brought him presents. But, soon after the departure of the Assyrian king, Hosea sent an embassy to the Egyptian king Shabe (biblical So) offering him his alliance, whereupon Shalmaneser IV. appeared before Samaria, took the faithless Hosea captive, and laid siege to the city (2 Ki. xvii.). From the cuneiform inscriptions it is known that Shalmaneser IV. himself met with his death during the siege, and that it was his successor, Sargon, who succeeded in taking Samaria after a three years' siege.

Shankara (shang'ka-ra), or **Shankaracarya** (-ä-chär'ya). ['The teacher or doctor Shankara.'] One of the most renowned theologians of India. His exact date is uncertain: Wilson puts it in the 8th or 9th century A.D. Tradition generally makes him a native of Malabar. He is described as having led a wandering, controversial life, and as having gone toward the close of it to Kashmir and then to Kedarnath in the Himalaya, where he is said to have died at the age of 32. He is held to have worked various miracles, among others reanimating and entering the dead body of King Amaru in order to become temporarily the husband of Amaru's widow that he might be able to argue with a Brahman on the wedded state, and was even regarded as an incarnation of Shiva. He is made the founder of the Dashnamidandins, or 'Ten-named Mendicants,' (so called as divided into 10 classes, each distinguished by the name of one of the 10 pupils of each of Shankara's 4 chief pupils), one of the principal Shaiva sects. South Indian pandits represent him also as founder of all the 6 principal sects of Hinduism—viz., the Shaivas, the Vaishnavas, the Shaktas, the Ganapatyas, the Sauras, and the Pashupatas—though falsely, as Shankara was opposed to all sectarian ideas. He is said to have established several maths, or monasteries, particularly one still flourishing at Sringiri on the Western Ghats, near the sources of the Tungabudra. The essential fact of his life is that he molded the Uttaramimansa or Vedanta philosophy into its final form, and popularized it into a national religion. A large number of works are ascribed to him, of which the most important are commentaries on the Vedantasutras, the Bhagavadgita, and the principal Upanishads.

He was a leader of the Resolutioners against the Protesters. In 1656 he went to London to counteract the influence of the Protesters with the Protector. In Feb., 1660, he visited London again to watch the movements of Monk. He was well received by Monk and sent to Charles II. at Breda, ostensibly to advocate the Presbyterian cause. He was in confidential communication with Charles and Clarendon, assisted in the restoration of Episcopacy in Scotland, and for his treachery was appointed archbishop of St. Andrews in Aug., 1661. When Lauderdale became supreme, Sharp cooperated in passing the National Synod Act of 1663, the first step in subjecting the church to the crown. In 1667, with Rothes, he was the governing power in Scotland. Their tyranny and cruelty provoked a rising of the Covenanters. Sharp, Rebecca (Becky Sharp). One of the principal characters in Thackeray's "Vanity Fair": a friendless girl, "with the dismal precocity of poverty," whose object it is to rise in the world. She is agreeable, cool, selfish, and entirely unmoral; "small and slight of person, pale, sandy-haired, and with green eyes, habitually cast down, but very large, odd, and attractive when they looked up."

> But the finest character in the whole novel is Miss Rebecca Sharp, an original personage, worthy to be called the author's own, and as true to life as hypocrisy, ability, and cunning can make her. She is altogether the most important person in the work, being the very impersonation of talent, tact, and worldliness, and working her way with a graceful and executive impudence unparalleled among managing women. She indicates the extreme point of worldly success to which these qualities will carry a person, and also the impossibility of their providing against all contingencies in life.

We hear of them as existing from the Egyptian frontier up to the north of Palestine, 'the land of the Amorite,' where their place was taken in the fifteenth century before our era by the invading Hittite. They were properly inhabi-

tants of the desert, who perpetually hovered on the borders of the cultivated land, taking advantage of every opportunity to harry and plunder it.

He was an ensign in Woodbridge's regiment at the battle of Bunker Hill, and attained the rank of captain in the Continental army. After resigning his commission he settled at Pelham (now Prescott), Massachusetts. He fled on the suppression of the insurrection in question to New Hampshire and thence to Vermont, where he remained about a year, at the end of which time he received a pardon. He thereupon removed to Sparta, New York. He enjoyed a pension during his later years for his services in the Revolution.

Shays's Rebellion. An insurrection in western Massachusetts against the State government, 1786–87, under the leadership of Daniel Shays and others, occasioned by the unsettled condition of affairs at the close of the Revolution and the consequent popular discontent. The chief grievances complained of were that the governor's salary was too high, that the Senate was aristocratic, that the lawyers were extortionate; and that taxes were too burdensome; and the principal remedy demanded was a large issue of paper money. Shays, in Dec., 1786, attempted at the head of 1,000 followers to prevent the session of the Supreme Court at Springfield, but was forestalled by the militia. In Jan., 1787, three bodies of insurgents, under Shays, Luke Day, and Eli Parsons respectively, marched on Springfield with a view to capturing the Continental arsenal. The largest body, that under Shays, numbering 1,000, was attacked by the militia (about 4,000) under General Benjamin Lincoln on the 28th, and was put to flight with a loss of 3 men killed and 1 wounded. The fugitives, including Shays, joined the force under Eli Parsons. The insurgents were finally dispersed Feb. 1787, at Petersham, where 150 of them were captured. Shays escaped. Some of the other leaders were sentenced to death, but were ultimately pardoned.

The Sabæans were, according to biblical and classical notices, the most important people of South Arabia. They were settled in southwestern Arabia, Yemen, with the capital Mariba. The numerous inscriptions bear evidence of their culture. From this country there came a queen to test Solomon's wisdom (1 Ki. x. 1): Arabic legends give her the name of Balkis, and assert that she bore a son to Solomon. It is from this son that the Ethiopians claim descent. In 24 B. C. the Egyptian governor Ælius Gallus undertook an expedition against Mariba with the aid of the Nabatæans, but without success. According to Arabic accounts the capital was destroyed by a flood 200 A. D. The Himyarite dynasty of Yemen was extinguished shortly before Mohammed.

Shechem (or Sichem) played an important part throughout the history of Israel. The patriarch Jacob and his sons sojourned there for some time. It fell to the lot of the tribe of Ephraim, and Joshua held there his farewell meeting. It was one of the free Levitical cities. During the period of the judges it was the center of the rule of Abimelech, and after the division of the kingdom Jeroboam made it his temporary residence. She Stoops to Conquer, or the Mistakes of a Night. A comedy by Oliver Goldsmith, first played March 15, 1773, printed 1774.

> At the present day it is probably the best known of the author's works, and, outside Shakespeare and Sheridan, the English play with which the greatest number of persons are familiar. Of post-Elizabethan comedies which preceded it in this country, those of Congreve alone can be named by its side; and, if it is less artistically constructed, somewhat less carefully written, and much less witty, its moral purity and wholesomeness, its fund of good spirits, and its wonderful flow of natural dialogue, are qualities that raise it almost to a level with "Love for Love" or "The Way of the World." Of succeeding comedies, but one has approached it in lasting popularity — the "School for Scandal," produced four years later, by Sheridan.

Shiva (shi′va). The third god of the Hindu triad, in the later mythology regarded as the destroyer, while Brahma is the creator and Vishnu the preserver. The Shaivas, or Shiva-worshipers, assign to him the first place in the triad, identifying him with creation and reproduction as well as destruction, and so constituting him the Supreme Being. This character in present Hinduism is supposed to be a development of that of the Vedic Rudra (which see) by the addition of many characteristics drawn from the popular as distinguished from the priestly religion, and taken especially from the religion of the aborigines, whose chief god some suppose Shiva to have been. The name Shiva, 'the propitious,' seems to have been at first only a euphemistic epithet used to propitiate Rudra, the god of storms, and then to have supplanted the name Rudra itself. According to the Vishnupurana there are 8 principal manifestations of Shiva, viz.: Rudra, Bhava, Sharva, Ishana, Pashupati, Bhima, Ugra, and Mahadeva, which are visibly represented under 8 tanus, or material forms, viz.: the Sun, Water, Earth, Air, Fire, Ether, the officiating Brahman, and the Moon. Shiva upholding the universe by means of these forms. As presiding over reproduction which follows destruction, he is generally worshiped under phallic symbols. As sharing with Yama and Varuna the attributes of justice and punishment, he rides on a white bull, Dharma having taken this form to become Shiva's vehicle: as Kala, or destroying 'time,' he is black; as Ardhanari, 'half-female,' he symbolizes the unity of the generative principle; as Panchanana he has 5 faces; he has 3 eyes, one in his forehead, which are held to denote his view of present, past, and future; while a crescent about the central eye marks the measure of time by months, a serpent around his neck that by years, and a necklace of skulls and serpents about his person the revolution of ages. His hair is thickly matted, and projects like a horn from his forehead. On his head he bears the Ganges. His throat is dark blue from the poison which would have destroyed the world had he not swallowed it at the churning of the ocean. He wears sometimes a deerskin, sometimes a tigerskin, sometimes an elephant's skin, and at times sits on a tiger-skin or holds a deer in one of his hands. His weapons are a trident (now held to symbolize him as Creator, Destroyer, and Regenerator), a bow, a thunderbolt, an ax, a skull-surmounted staff, and a nondescript weapon, the khinkira. He carries a drum shaped like an hour-glass, and a noose. His servants are the demons called Pramathas, his chief wife Durga with her various names, and his sons Ganesha and Karttikeya. His residence is Kailasa, one of the loftiest peaks of the Himalaya. He is especially worshiped at Benares. He has even more names than Vishnu, 1,008 being specified in the Shiva Purana and the Mahabharata. See Barth's "Religions of India," 159 ff.; Williams's "Brahmanism and Hinduism," III. IV.; and Muir's "Original Sanskrit Texts," Vol. IV.

Sibylline Books, Sibylline Oracles. See *Sibyls.*

Sibyls (sib'ilz). In ancient mythology, certain women reputed to possess special powers of prophecy or divination and intercession with the gods in behalf of those who resorted to them. Different writers mention from one to twelve sibyls, but the number commonly reckoned is ten, enumerated as the Persian or Babylonian, Libyan, Delphian, Cimmerian, Erythræan, Samian, Cumæan, Hellespontine or Trojan, Phrygian, and Tiburtine. Of these the most celebrated was the Cumæan sibyl (of Cumæ in Italy), who, according to the story, appeared before Tarquin the Proud and offered him nine books for sale. He refused to buy them, whereupon she burned three, and offered the remaining six at the original price. On being again refused, she destroyed three more, and offered the remaining three at the price she had asked for the nine. Tarquin, astonished at this conduct, bought the books, which were found to contain directions as to the worship of the gods and the policy of the Romans. These Sibylline Books, or books professing to have this origin, written in Greek hexameters, were kept with great care at Rome, and consulted from time to time by oracle-keepers under the direction of the senate. They were destroyed at the burning of the temple of Jupiter in 83 B. C. Fresh collections were made, which were finally destroyed soon after A. D. 400. The Sibylline Oracles referred to by the Christian fathers belong to early ecclesiastical literature, and are a curious mixture of Jewish and Christian material, with probably here and there a snatch from the older pagan source. In composition they seem to be of various dates, from the 2d century before to the 3d century after Christ.

But the Sibylline verses, which clearly belong to this period [of Antoninus], express, in the most remarkable manner, this spirit of exulting menace at the expected simultaneous fall of Roman idolatry and of Roman empire. The origin of the whole of the Sibylline oracles now extant is not distinctly apparent, either from the style, the manner of composition, or the subject of their predictions. It is manifest that they were largely interpolated by the Christians to a late period; and some of the books can be assigned to no other time but the present. Much, no doubt, was of an older date. It is scarcely credible that the Fathers of this time would quote contemporary forgeries as ancient prophecies. The Jews of Alexandria, who had acquired some taste for Grecian poetry, and displayed some talent for the translation of their sacred books into the Homeric language and metre, had, no doubt, set the example of versifying their own prophecies and of ascribing them to the Sibyls, whose names were universally venerated, as revealing to mankind the secrets of futurity. They may have begun by comparing their own prophets with these ancient seers, and spoken of the predictions of Isaiah or Ezekiel as their Sibylline verses, which may have been another word for prophetic or oracular.

Milman, Hist. of Christianity, II. 121.

Almost every region of heathenism boasts its Sibyl. Poetic predictions, ascribed to these inspired women, were either published or religiously preserved in the sacred archives of cities. Nowhere were they held in such awful reverence as in Rome. The opening of the Sibylline books was an event of rare occurrence, and only at seasons of fearful disaster or peril.

Sicily (sis'i-li). [Gr. Σικελία, from Σικελοί (L. *Siculi*), the ancient inhabitants; L. *Sicilia*, It. *Sicilia*, F. *Sicile*, G. *Sicilien.*] An island in the Mediterranean, belonging to the kingdom of Italy, and forming (with small neighboring islands) a compartimento. Its chief cities are Palermo, Catania, and Messina. It is situated southwest of the mainland of Italy (separated by the Strait of Messina), and is triangular in shape. The general surface is elevated and mountainous: the culminating point is Mount Etna, and the principal ranges are in the north (Peloritan, Nebrodian, and Madonie). The principal plain is Catania. The leading products are wheat, oranges, citrons, olives, lemons, and other fruits, sulphur, silk, and salt. Sicily was formerly famous as the granary of Italy and Rome. It contains 7 provinces — Messina, Catania, Syracuse, Caltanissetta, Palermo, Girgenti, and Trapani. The inhabitants are of mixed descent. The early inhabitants were the Sicani, Siculi, and Elymi; and Phenician colonies were settled in early times. Greek colonization commenced in the 8th century B. C.: among the chief Greek cities were Syracuse, Catana, Agrigentum, Selinus, and Himera. An unsuccessful Carthaginian invasion occurred in 480 B. C., and an Athenian invasion in 415–413. The western part of Sicily was conquered by Carthage in the end of the 5th century B. C. Syracuse was the leading Greek power under Dionysius the Elder, Timoleon, Agathocles, etc., in the 4th century. The island was the scene of important events in the campaigns of Pyrrhus and in the first Punic war. The greater part of it was annexed by Rome in 241. Syracuse and Agrigentum were annexed in the second Punic war. Sicily suffered in the Servile Wars of the 2d century B. C., and under the administration of Verres (73–71 B. C.). It was conquered by the Vandals, and passed to the East Goths in the 5th century; was taken from the Goths by the Eastern Empire in the 6th century (the conquest beginning with the successes of Belisarius in 535); was conquered by the Saracens 827–965; was temporarily conquered by the Christians about 1040; and was conquered by the Normans under Robert and Roger Guiscard 1061–1090. Roger II. united Sicily with southern Italy (Sicily this side of the Faro) in 1127, and in 1130 assumed the title of king. The Two Sicilies were taken possession of by the Hohenstaufen emperor Henry VI. in 1194. The Hohenstaufens were overthrown by Charles of Anjou in 1266. The Sicilians revolted against the Angevins in 1282, and Sicily came under the rule of Aragon. It was separated from Aragon in 1296; was reunited with it in 1412; was several times united and separated from Naples, and finally united with it under Spanish rule in 1503; was ceded to Savoy in 1713, and to Austria in 1720; was conquered by Spain in 1734; was united with Naples and ruled by a Bourbon dynasty in 1734; and was separated from Naples and made a separate kingdom under British protection 1806–15. There were unsuccessful risings in 1820, 1836, and 1848–49. The Bourbons were overthrown by the expedition of Garibaldi in 1860, and Sicily was annexed to the dominions of Victor Emmanuel. Area, 9,936 square miles. Population (1892), 3,364,940.

Sidon (sī'don). ['Fishing town.' Gr. Σιδών.] The oldest city of ancient Phenicia. From the 17th century to about 1100 B. C. it held supremacy in Phenicia and established most of the Phenician colonies. Later it was outrivaled by Tyre, but continued to maintain an important position. In 351 B. C. it was destroyed in consequence of a revolt against the Persian king Artaxerxes III. Ochus. It was still a wealthy city about the beginning of the Christian era. During the Crusades it was several times destroyed. At present Sidon is represented by the town of Saida, with about 15,000 inhabitants. The ancient Necropolis, long known and exploited, has yielded numerous monuments of the most diverse ages and civilizations, from the oldest Phenician, still under Egyptian influence, through the various stages of Greek art. In 1887 an important discovery was made, consisting of an intact subterranean mausoleum of several chambers, containing 22 sarcophagi, several of them bearing polychrome sculptures in relief of the best Greek art, and almost uninjured. The sarcophagi were transported to the museum at Constantinople, where they form one of the most important existing collections of ancient art. The Greek sarcophagi were not executed at Sidon, but were imported from different places and at different times. Their usual form is that of a temple. Four only are completely covered with sculpture; but these four rank with the finest existing productions of Greek art, and are the only sarcophagi known which belong to the best period of sculpture. The oldest is of Lycian form, with Centaurs and Lapiths and hunting-scenes. The second, dating from the beginning of the 4th century B. C., is called "the Sarcophagus of the Weeping Women," from the graceful figures in the intercolumniations of its Ionic colonnade. The third bears varied scenes from the life of an Oriental ruler. The fourth is so splendid that its discoverers may be pardoned for proclaiming it the sarcophagus of Alexander. Four of its six sculptured panels represent hunting- or battle-scenes in which the portrait of Alexander, almost contemporaneous, actually figures. It is no doubt the tomb of an Oriental chief who had enjoyed the companionship of the Macedonian conqueror. See *Phenicia.*

[From Hind. *Sikh*, lit. a 'disciple': a distinctive name of the disciples of Nanak Shah, who founded the sect.] The members of a politico-religious community in India, founded near Lahore about 1500 as a sect based on the principles of monotheism and human brotherhood. Under their hereditary theocratic chiefs the Sikhs were organized into a political and military force, collectively called Khalsa, 'the portion' (of God), while every member received the surname of Singh (in Sanskrit *sinha*, 'lion'). This military organization was especially due to Govind Singh. Social inequality was abolished. Of the Hindu usages only the respect paid to cows was retained. Every one was an unbeliever who had not been admitted to the Khalsa by having five of the initiated drink with him the sherbet of the Pahlul. A Sikh was forbidden to return the salutation of a Hindu, and was bound to kill a Mussulman on meeting him. The holy war was his vocation. The Sikh soldier prayed to his sword. Govind Singh struggled with the Moguls 30 years, and then accepted a command in the imperial army. He fell by an Afghan assassin in 1708, appointing no successor and declaring the Granth (see *Adi-Granth*) to be the future guru. After him an ascetic named Banda was the chief of the Khalsa. Under him the Sikhs were almost annihilated by the armies of Farrukhsihr. Banda himself was captured, compelled for a week to witness the torture of 740 companions (of whom no one winced) and the death of his own son, and then tortured to death with red-hot pincers, while he praised God for choosing him to be the instrument of his vengeance. After Banda's death in 1716, the Akalis, 'the faithful of the Eternal,' became the guardians of the sanctuary at Amritsar, where the Adi-Granth was kept. The Gurmata, 'council of the guru,' held supreme authority. The political history of the Sikhs

ended in 1849, when the English, after a violent struggle, annexed the Panjab. The Sikhs have now ceased their religious fanaticism, and are a valuable contingent of the British armies. See *Adi Granth* and *Nanak*.

It is a speaking fact that of what must have been one of the greatest Roman cities of Britain we have absolutely no history whatever. Antiquaries are, we believe, now pretty well agreed that Silchester is the Roman Calleva Atrebatum — in Gaul the place might have been called Arras and its district Artois — and it is so marked in Dr. Guest's map. But this is merely a geographical and not an historical fact. Calleva is simply a name in the Itineraries; nothing that we ever heard of is recorded to have happened there.

In later accounts he is represented as the founder of a heretical sect. The legend of Doctor Faustus contains traces of the legends of Simon and Helena, his companion.

Simon probably was one of that class of adventurers which abounded at this period, or like Apollonius of Tyana and others at a later time, with whom the opponents of Christianity attempted to confound Jesus and his apostles. His doctrine was Oriental in its language and in its pretensions. He was the first Æon or Emanation, or rather perhaps the first manifestation, of the primal Deity. He assumed not merely the title of the Great Power or Virtue of God, but all the other appellations — the Word, the Perfection, the Paraclete, the Almighty — the whole combined attributes of the Deity. He had a companion, Helena, according to the statement of his enemies a beautiful prostitute, whom he found at Tyre, who became in like manner the first conception (the Ennœa) of the Deity; but who, by her conjunction with matter, had been enslaved to its malignant influence, and, having fallen under the power of evil angels, had been in a constant state of transmigration, and, among other mortal bodies, had occupied that of the famous Helen of Troy.

Simonides (sī-mon'i-dēz), or **Semonides** (semon'i-dēz), **of Amorgos.** [Gr. *Σιμωνίδης*.] Born in Samos: lived about 660 B. C. A famous Greek iambic poet. Fragments of his poems have been preserved (Bergk's "Poetæ lyrici Græci").

The next poet of this period is Simonides, or, as some call him, Semonides, son of Krines, of Samos, who led a colony to the island of Amorgos, after which the poet is called, to distinguish him from the later Simonides of Keos. Here he dwelt in the town of Minoa. The chronologists place him about Ol. 29 or 30 (660 B. C.), and make him contemporary with, if not later than, Archilochus. Though chiefly celebrated as one of the earliest iambic poets, he wrote the "Archæology of Samos," in two books of elegiacs, of which no trace now remains. About forty fragments of his iambic verse are to be found in Bergk's collection, but only two of them are of any importance. One (25 lines) reflects on the restlessness and trouble of life, and recommends equanimity in a spirit of sad wisdom. The other (120 lines) is the famous satire on women, comparing them to sundry animals, owing to their having been created of these respective natures.

Simurgh (sē-mörgh'). [From *sī*, thirty, and *murgh*, bird (as having the size of thirty birds).] In the Shahnamah, the huge bird that cared for and reared the infant Zal when, in consequence of his white hair, he had been exposed by his father Sam near Mount Alburz.

> The child remained thus in this place one day and one night without shelter. Sometimes he sucked his thumb, sometimes he uttered cries. The little ones of the Simurgh being hungry, the mighty bird rose from his nest into the air. He saw a child who needed milk and was crying, he saw the earth that seemed like a surging sea. Thorns formed the cradle of the child, his nurse was the earth, his body was naked, his mouth devoid of milk. Around him was the soil black and burned, above the sun that had become fiery hot. Oh, why were his father and his mother not tigers? He would then perhaps have found a shelter against the sun. God gave to Simurgh an impulse of pity, so that the bird did not think of devouring that child. He came down from the clouds, took him in his talons, and carried him from the burning rock. He bore him swiftly to Mount Alburz, where was the nest of his family. He bore him to his little ones that they might see him, and that his mournful voice might prevent them from devouring him, for God granted him his favors, since he was predestined to enjoy life. The Simurgh and his little ones looked at this child, whose blood was streaming from his two eyes. They surrounded him with marvellous tenderness, they were astonished at the beauty of his countenance. The Simurgh chose the tenderest venison, that his little guest, who had no milk, might suck blood. So a long time passed during which the child remained hidden in this place. When the child had grown, a long time still passed upon this mountain. He became a man like a lofty cypress, his breast was like a hill of silver, his stature like a reed.

The iconostasis is richly sculptured, and adorned with curious Russian icons. See *Sinaitic Peninsula*.

Sinaitic (sī-nạ-it'ik) **Peninsula.** A peninsula situated between the Gulf of Suez and the Gulf of Akaba. In the north of the peninsula is the desert Paran (modern et-Tih), a desolate limestone plateau, bounded on the south by the Jebel-et-Tih (4,000 feet high). This is joined in the south by a tract of low sandstone mountains, ravines, and valleys rich in minerals which had been worked as early as 3000 B. C. Then rises the barren, rugged, and majestic triangle of the Sinai Mountain, the Jebel-et-Tur or Tur-Sinai, formed of masses of granite rock and gneiss, intermingled with diorites and porphyries. In this mountain-chain are to be distinguished the following groups: in the northwest is the Jebel-Serbal (6,731 feet high), overhanging the coast plain el-Koah and the Wady Feiran, the most fertile spot of the peninsula. From here through the Wady esh-Sheikh in the southeast appears the Jebel-Musa ('mountain of Moses'), or Sinai proper, which embraces the Jebel-Musa itself (7,362 feet high, and in the south the highest point of the peninsula) and the Jebel Katherin ('mountain of St. Catherine') (8,538 feet high). In the southwest rises the third and last group, the Jebel Um-Shomar ('the watch or guard') (over 8,000 feet high), in the neighborhood of el-Koah. The Jebel-Musa is generally thought to be the mountain of the law (Lepsius and Ebers claim the distinction for the Serbal), and the plain er-Rahah, north of the Musa group, to be the valley in which the Israelites camped during their sojourn at Sinai. The Wady er-Rahah is joined in a right angle from the northeast by the Wady ed-Deir, while to the southeast of the Musa stretches the high plateau Wady es-Sebaiyeh. The western ridge of the Musa is the Jebel el-Humr ('the red mountain'), from which the St. Catherine Mountain in the south rises; the eastern ridge is the Jebel ed-Deir ('mountain of the monastery'). In the Wady Shurib, or Jethro valley, between the Musa and ed-Deir, the monastery of St. Catherine is situated, with its beautiful gardens. Tradition attributes its foundation to the emperor Justinian (527–565), and it was originally dedicated to the remembrance of the Transfiguration. Its present name was obtained when the relics of St. Catherine were transferred thither. The monastery contains at present only 20–30 monks instead of the 300–400 of former times. It became celebrated in recent years by the discovery of the Codex Sinaiticus (the Greek version of the Old Testament and the Greek New Testament), made in it by Tischendorf in 1844. The Sinaitic peninsula is, as a whole, barren. The mountains are naked, and the valleys are dry river-beds. There are, however, exceptions, as the lovely Wady Feiran and other oases. The present population of the peninsula consists of about 6,000 Bedouins.

During this last voyage he finds a valley filled with the dead bodies of elephants, from which he obtains much ivory. Sometimes spelled *Sinbad*.

> Well known in Europe as having the history of his voyages incorporated in the Thousand and One Nights, but they form in Arabic a distinct work, which Baron Walckenaer (in "Nouvelles Annales des Voyages," tome LIII, p. 6) regards as of equal value with those of Soliman and Abu Said. The voyages belong to the 9th century, when the commerce of the Arabs under the khalifs of Baghdad was at its highest activity. In his first voyage Sindbad reaches the country of the maharaja. . . . In Sindbad's second voyage mention is made of the kingdom of Rha (the Malay Peninsula according to some), and the manner of the preparation of camphor, produced in the mountain forests there, is accurately described. In the third voyage the island of Silaheth is mentioned. In the fourth he was carried to a country (Malabar) where he found men gathering pepper, and from it he went to the isle of Nacous (the Nicobars?) and on to Kela (Quedah or Keydah?). In the fifth voyage he is shipwrecked on the island (*i. e.* country) of the Old Man of the Sea, probably somewhere on the Konkan coast. Thence he crossed the sea to the Maldives, and back again to the pepper country of Malabar, passing on to the peninsula of Comorin, where he found the aloes-wood called santy, and afterwards to the pearl-fisheries of the Gulf of Manaar, whence he traveled back to Baghdad. In the sixth voyage he visited an island (*i. e.* country) where were superb trees of the kind named santy and comary, and the island of Serendib (Ceylon), which was also the limit of his seventh and last voyage.

Sipylus (sip'i-lus). [Gr. *Σίπυλος.*] In ancient geography, a mountain of Lydia, Asia Minor, near Smyrna.

Not far from Karabel another monument of Hittite art has been discovered. Hard by the town of Magnesia, on the lofty cliffs of Sipylos, a strange figure has been carved out of the rock. It represents a woman, with long locks of hair streaming down her shoulders, and a jewel like a lotus-flower upon the head, who sits on a throne in a deep artificial niche. Lydian historians narrate that it was the image of the daughter of Assaon, who had sought death by casting herself down from a precipice; but Greek legend preferred to see in it the figure of "weeping Niobé" turned to stone. Already Homer told how Niobé, when her twelve children had been slain by the gods, "now changed to stone, broods over the woes the gods had brought there, among the rocks, in lonely mountains, even in Sipylos, where they say are the couches of the nymphs who dance on the banks of the Akheloios." But it was only after the settlement of the Greeks in Lydia that the old monument on Mount Sipylos was held to be the image of Niobé. The limestone rock out of which it was carved dripped with moisture after rain; and as the water flowed over the face of the figure, disintegrating and disfiguring the stone as it ran, the pious Greek beheld in it the Niobé of his own mythology. The figure was originally that of the great goddess of Asia Minor, known sometimes as Atergatis or Derketo, sometimes as Kybelé, sometimes by other names.

Sirens (sī'renz). In Greek mythology, two, three, or an indeterminate number of sea-nymphs who by their singing fascinated those who sailed past their island, and then destroyed them. In works of art they are represented as having the head, arms, and generally the bust of a young woman, and the wings and lower part of the body, or sometimes only the feet, of a bird. In Attic usage they are familiar as goddesses of the grave, personifying the expression of regret and lamentation for the dead.

In the classic Sirens we cannot fail to detect the wailing of the rising storm in the cordage, which is likely to end in shipwrecks. The very name of Siren is from the Greek to pipe or whistle, just as their representatives in Vedic mythology, the Ribhus, draw their name from the word to sound. . . .
